SEO monitoring - March 2026

https://www.orslabs.fr/

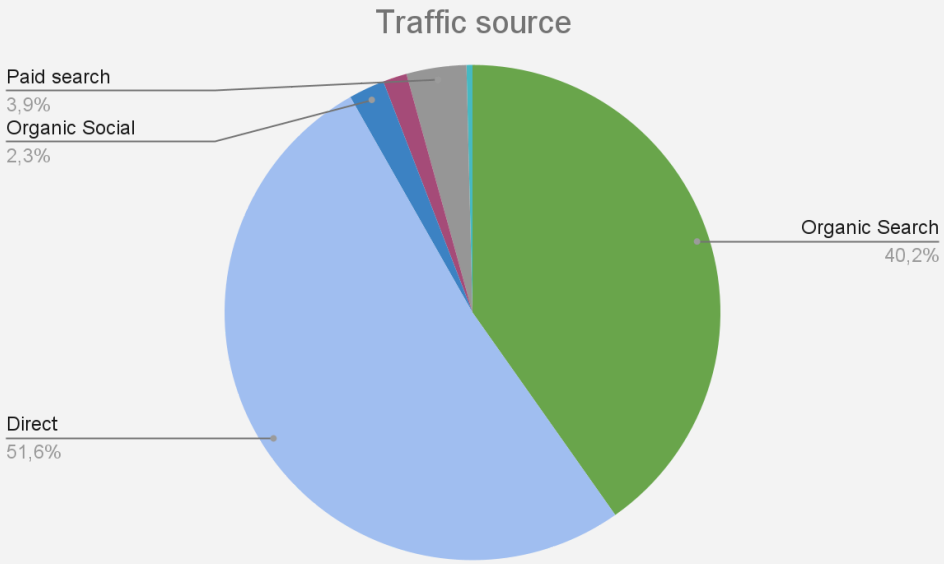
This report provides an overview of the SEO performance of the website orslabs.fr for the period **from March 1 to March 31, 2026**.

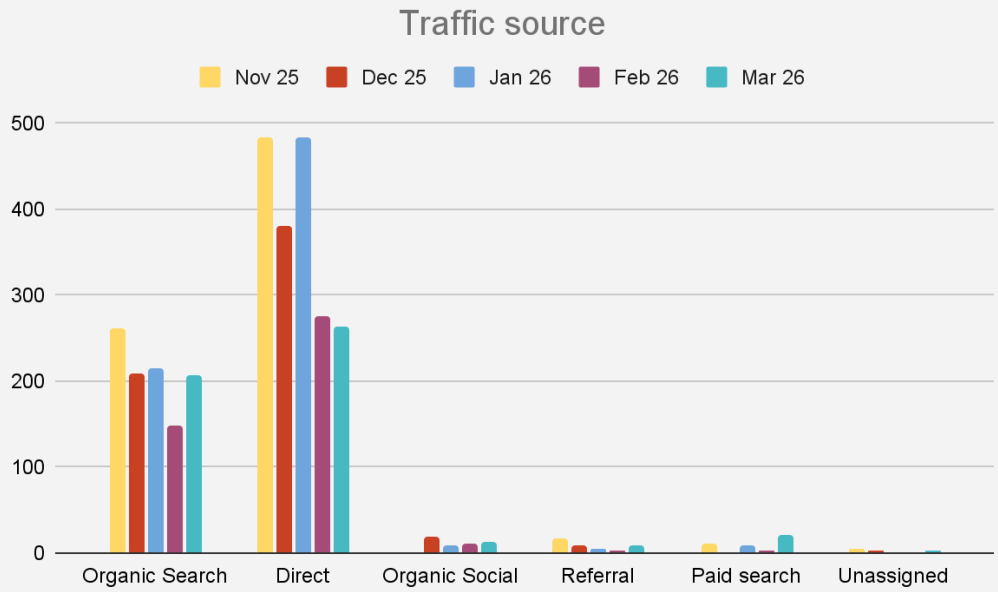
Note: the figures for the current month are compared with those for the previous months, but also with those for the previous year over the same period (if available).

No SEO updates to the site were made in February 2026.

LinkedIn posts were published in March, but no newsletter was sent.

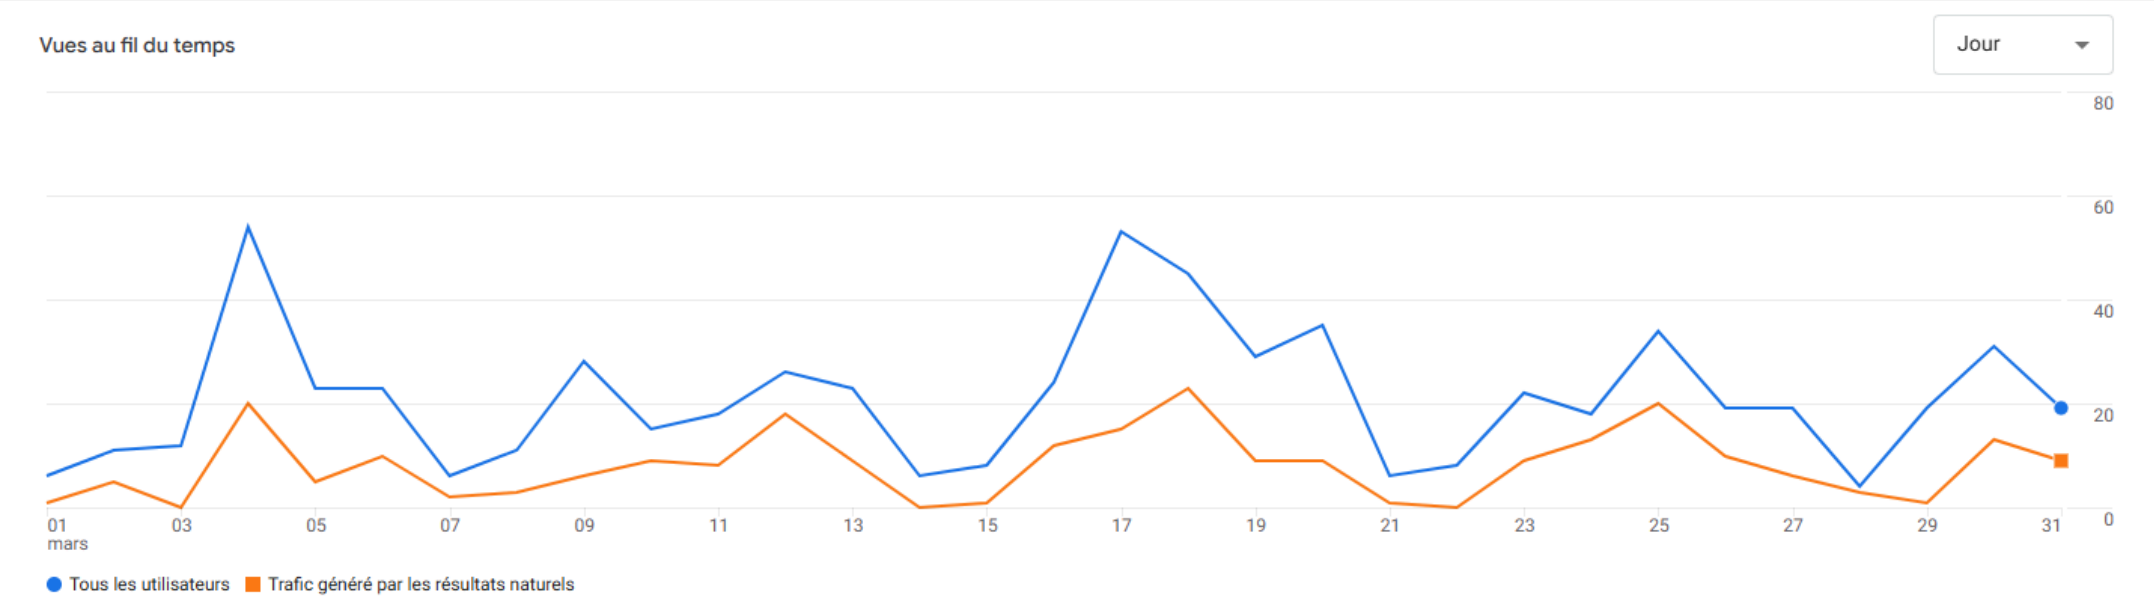
Traffic source





Source	Mar 26	Feb 26	Jan 26	Dec 25	Nov 25	Mar 25
Organic Search	**206**	147	215	208	261	N/A
Direct	**264**	276	484	380	484	N/A
Organic Social	**12**	10	8	18	0	N/A
Referral	**8**	3	5	8	16	N/A
Paid search	**20**	3	8	1	10	N/A
Unassigned	**2**	0	0	2	5	N/A

Organic clicks vs. all clicks over the month (per day)

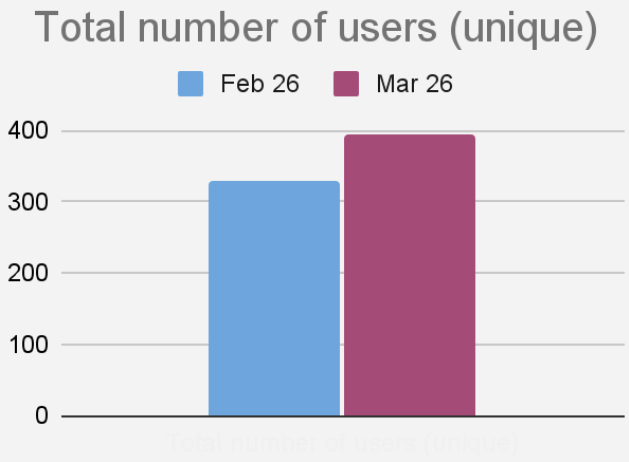


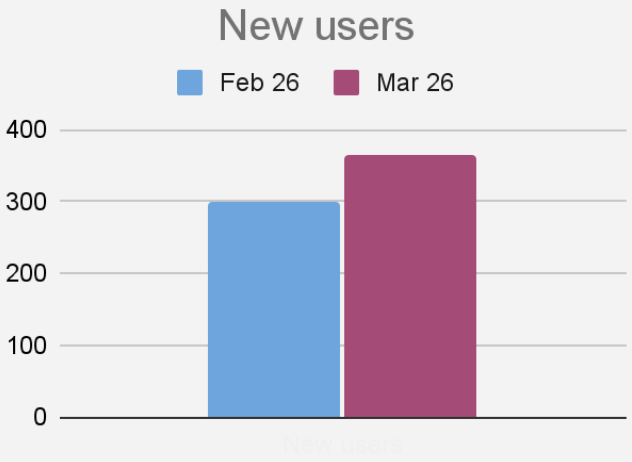
📌 **Notes** :

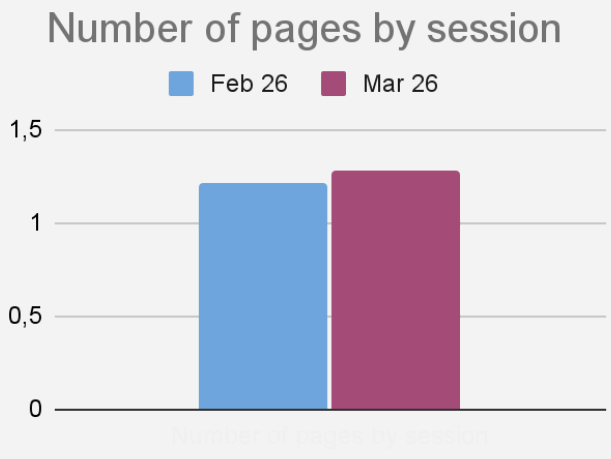
- **Organic search** increased to 206 sessions (+40% vs February).
- **Direct traffic** remained broadly stable at 264 sessions (-4%).
- **Organic social** increased slightly to 12 sessions.
- **Referral traffic** from 3 to 8 sessions.
- **Paid search** increased to 20 sessions.

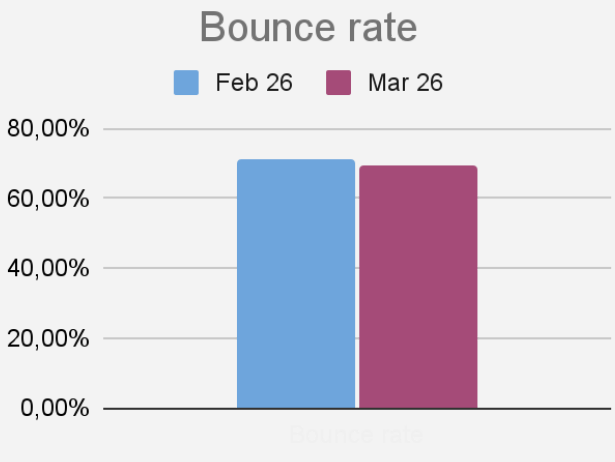
👉 **Key takeaway**: March confirms that February's decline was likely a temporary fluctuation rather than the start of a longer-term trend. Organic traffic rebounded strongly, while direct traffic remained stable, reinforcing the resilience of the site's main acquisition channels. Organic social and referral show interesting secondary sources of traffic.

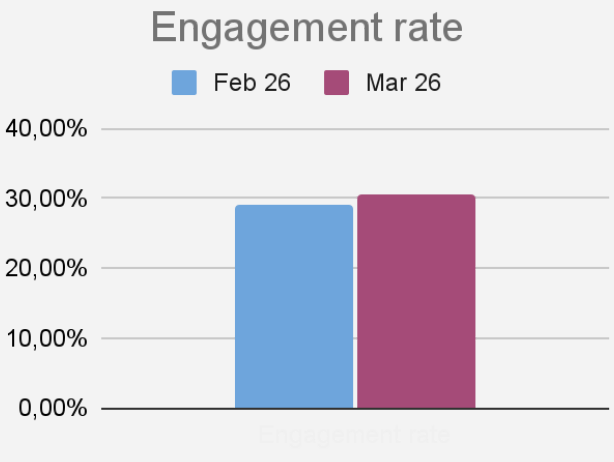
User behavior

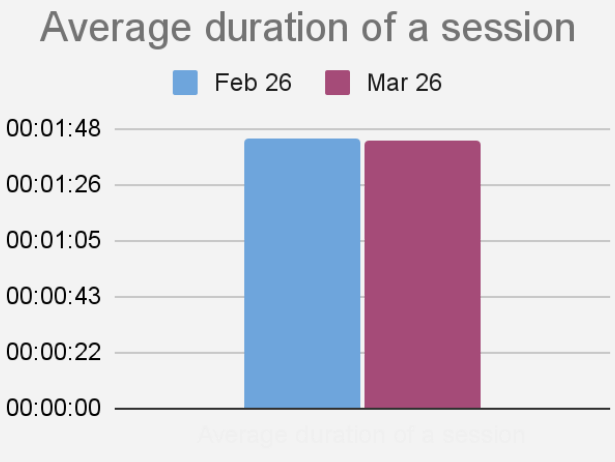












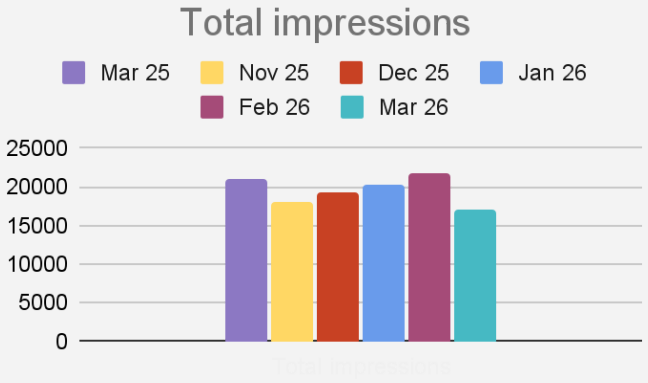
KPI	Mar 26	Feb 26	Jan 26	Dec 25	Nov 25	Mar 25
Total number of users (unique)	**393**	329 (19%)	568 (-31%)	517 (-24%)	657 (-40%)	N/A (N/A)
New users	**364**	300 (21%)	544 (-33%)	493 (-26%)	641 (-43%)	N/A (N/A)
Number of sessions	**512**	439 (17%)	721 (-29%)	617 (-17%)	777 (-34%)	N/A (N/A)
Number of pages by session	**1,28**	1,21 (6%)	1,22 (5%)	1,16 (10%)	1,16 (10%)	N/A (N/A)
Bounce rate	**69,34%**	71,07% (-1,73)	75,17% (-5,83)	70,50% (-1,16)	75,93% (-6,59)	N/A (N/A)
Engagement rate	**30,66%**	28,93% (1,73)	24,83% (5,83)	29,50% (1,16)	24,05% (6,61)	N/A (N/A)
Average duration of a session	**0:01:43**	0:01:44 (-0:00:01)	0:01:34 (0:00:09)	0:01:30 (0:00:13)	0:01:12 (0:00:31)	#VALUE!

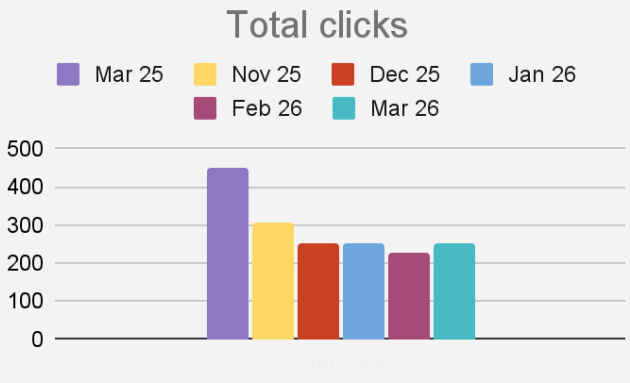
📌 **Notes** :

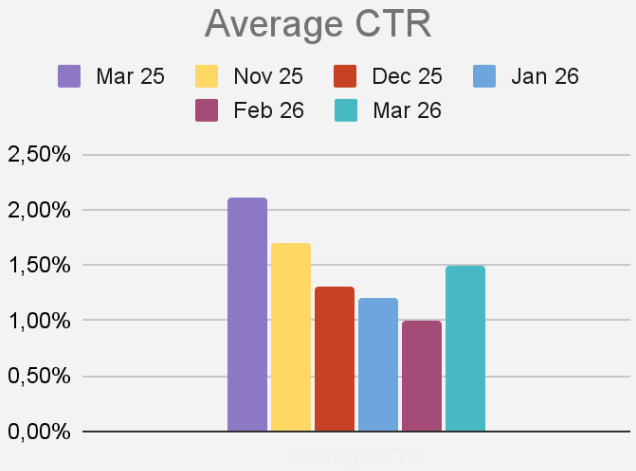
- **Users and sessions** increased this month (around +19%).
- **Pages per session** improved to 1.28.
- **Engagement rate** increased to 30.66%.
- **Session duration** remained stable.

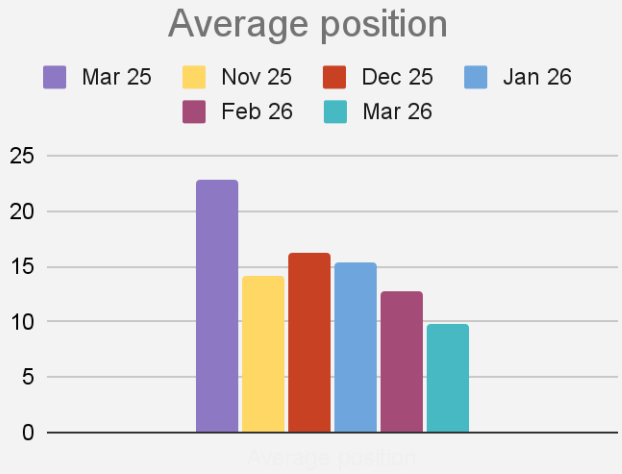
👉 **Key takeaway**: The recovery in traffic was accompanied by continued improvements in engagement quality (the best performance in recent months). This is particularly positive, as it shows that growth in traffic did not dilute visitor quality — a strong signal in a technical B2B environment.

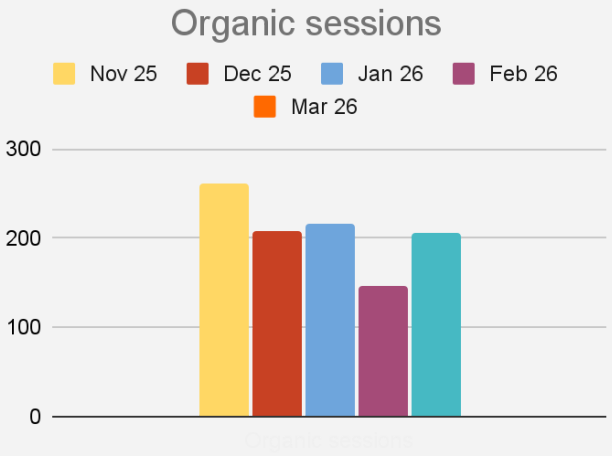
SEO Performance Summary

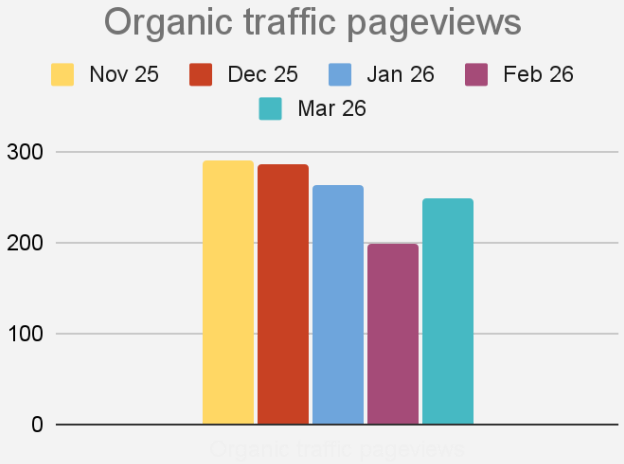












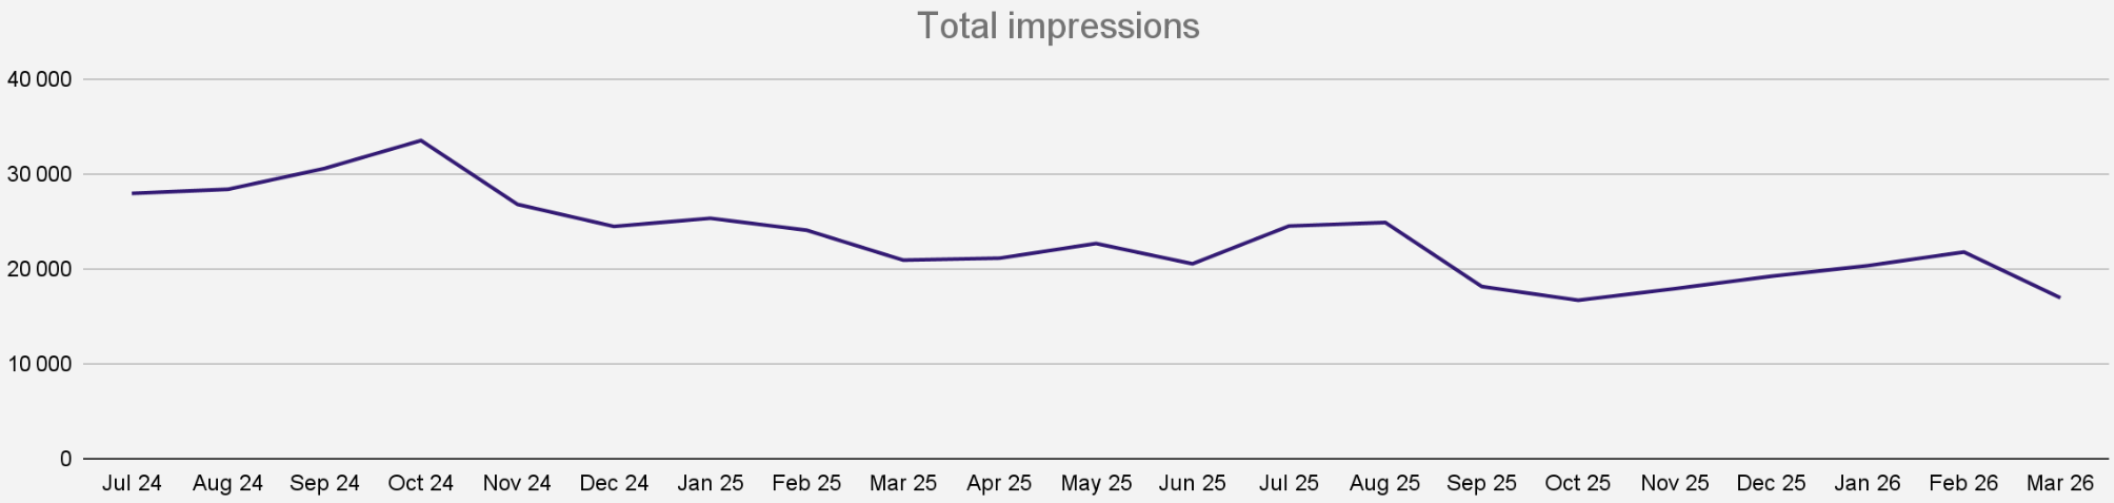
KPI	Mar 26	Feb 26	Jan 26	Dec 25	Nov 25	Mar 25
Total impressions	**16 946**	21 779 (-22%)	20 334 (-17%)	19 222 (-12%)	17 910 (-5%)	20 921 (-19%)
Total clicks	**250**	227 (10%)	250 (0%)	251 (0%)	305 (-18%)	448 (-44%)
Average CTR	**1,50%**	1,00% (50%)	1,20% (25%)	1,30% (15%)	1,70% (-12%)	2,10% (-29%)
Average position	**10**	13 (-23%)	15 (-35%)	16 (-39%)	14 (-30%)	23 (-57%)
Organic sessions	**206**	147 (40%)	215 (-4%)	208 (-1%)	261 (-21%)	N/A (N/A)
Organic traffic pageviews	**250**	199 (26%)	264 (-5%)	287 (-13%)	291 (-14%)	N/A (N/A)

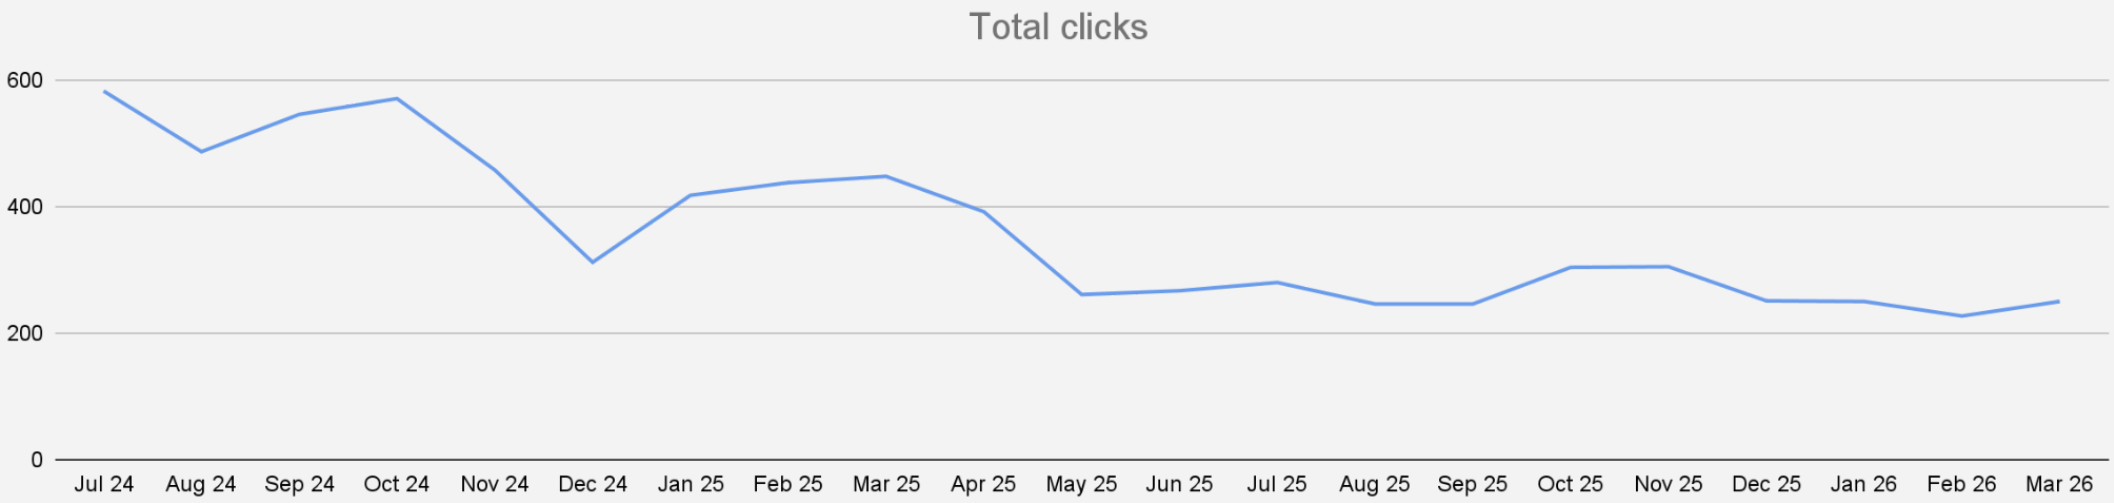
📌 **Notes** :

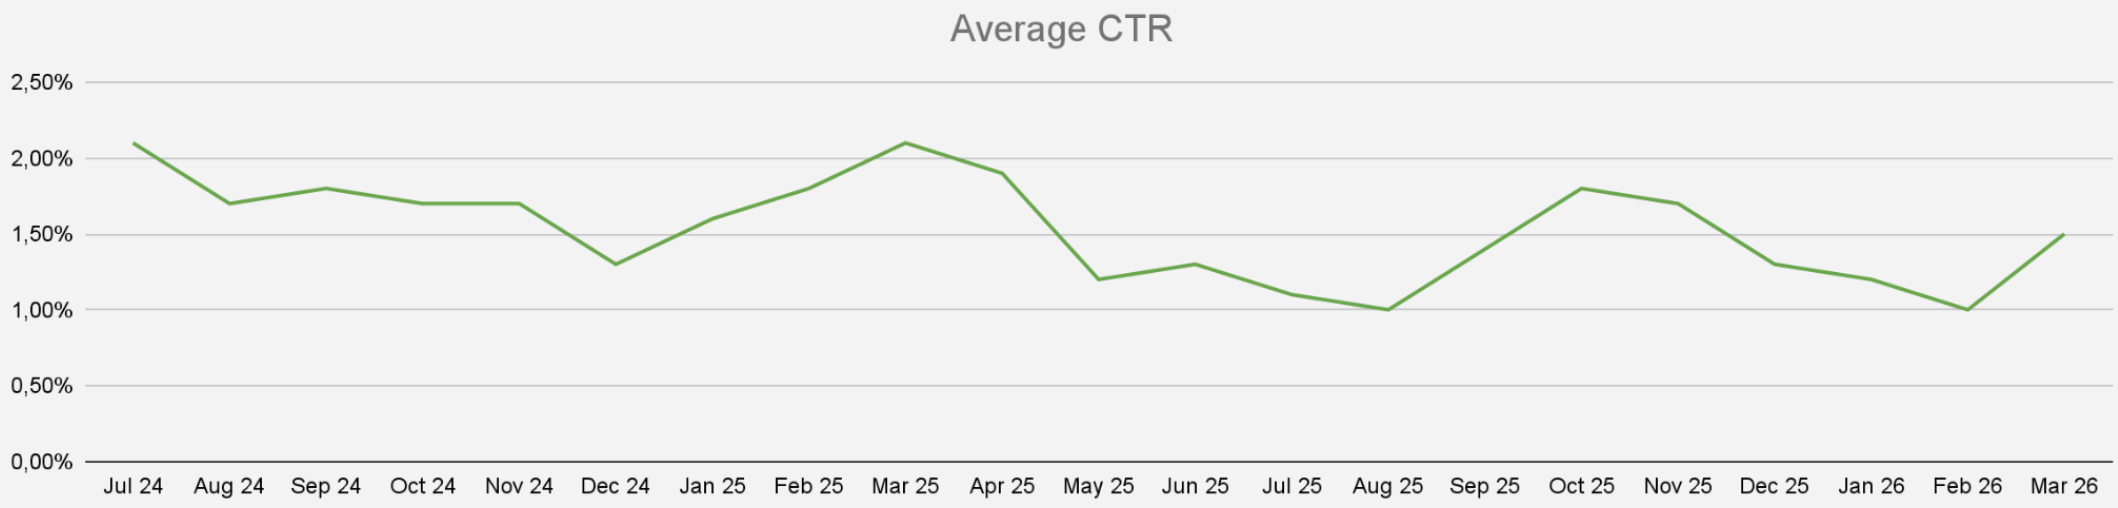
- **Impressions** decreased to 16,946 (-22% vs February).
- **Clicks** increased to 250 (+10%).
- **CTR** improved significantly to 1.50%.
- **Average position** improved to 10 (vs 13).
- **Organic sessions** increased to 206 (+40%).
- **Organic pageviews** rose to 250 (+26%).

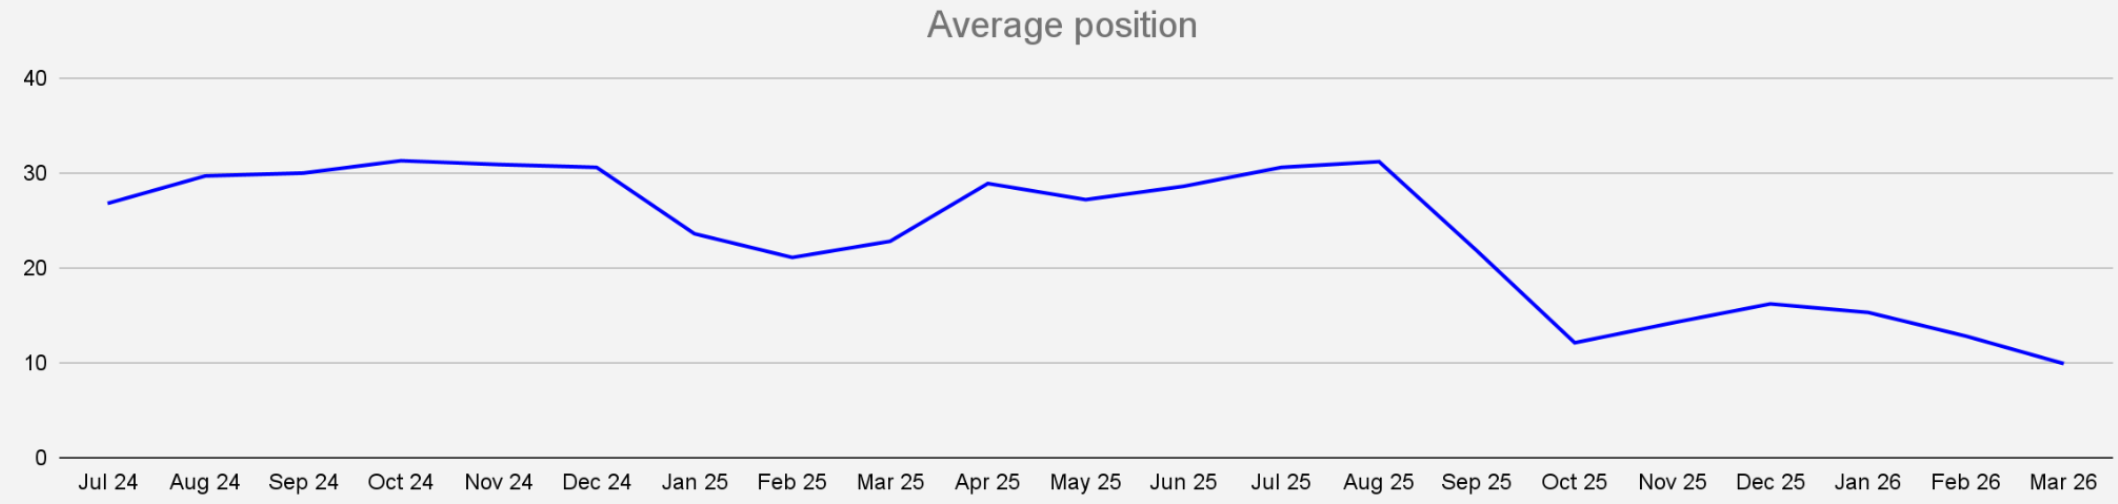
👉 **Key takeaway:** Although visibility (impressions) declined, SEO efficiency improved significantly. Better rankings and a much stronger CTR translated into more clicks and organic sessions, suggesting that search visibility became more qualified and better aligned with user intent.

SEO Performance Evolution









📌 **Notes** :

- The drop in **impressions** should be interpreted alongside the rise in clicks as a sign of higher search efficiency rather than weaker SEO visibility.
- **Click's** trend remains relatively stable from May 2025.

- The **CTR** continues to fluctuate and reached one of its highest recent levels.
- March stands out with the best **average position** (10) observed in the reporting period.

👉 **Key takeaway:** March marks a shift from visibility growth to performance efficiency: the site is attracting more clicks from fewer impressions thanks to stronger rankings.

This analysis will provide a clearer understanding of the cause–effect relationships driving the site's SEO performance: whether the observed trends result from website changes or from Google algorithm updates.

ℹ️ Here are the major Google algorithm updates from July 2024:

- August 2024: high-quality content update (As part of the August Core Update, Google took a big focus on high-quality content. The algorithm update focused on delivering content that's actually helpful to users, rather than content that's built to rank well in search results. Ultimately, this new update focuses on helping searchers see more content that's genuinely helpful and relevant to them).
- November 2024: site reputation abuse (This update tackled parasite SEO — a tactic websites use to help them manipulate search rankings through third-party content on well-established domains).
- From Mars 2025: ongoing core updates (Google continues to roll out ongoing updates in 2025, focusing on improving search rankings and performance for searchers).

Top performing organic queries

Top 10 keywords driving clicks

Most frequent queries driving clicks	Clicks	Impressions	CTR	Position
gross leak test	5	255	2 %	5,6
moisture calculator	3	49	6,1 %	5,5
relative humidity to ppm calculator	3	18	16,7 %	3,4
ors lab	2	25	8 %	3,8
oneida recherche services	2	23	8,7 %	2,6
conversion humidité relative absolue	2	21	9,5 %	4,7
hermeticity testing	2	15	13,3 %	15,9
oneida research services	1	263	0,4 %	5,4
ors labs	1	169	0,6 %	9
gross leak testing	1	31	3,2 %	5,9

Top 10 keywords driving impressions

Most frequent queries driving impressions	Clicks	Impressions	CTR	Position
hermeticity	0	732	0 %	4,6
oneida research services	1	263	0,4 %	5,4
gross leak test	5	255	2 %	5,6
ors labs	1	169	0,6 %	9
gross leak bubble tester	0	163	0 %	13,6
gross leak	0	111	0 %	2,1
orslabs	0	101	0 %	10,4
hshld	0	78	0 %	7,1
internal vapor analysis	0	74	0 %	7
test de fuite	0	71	0 %	7,9

📌 **Notes** : Search performance remains driven by a mix of highly targeted technical queries and branded searches. Queries related to gross leak testing, humidity conversion, and moisture calculation continue to generate the most qualified traffic and strongest engagement.

The improvement in CTR suggests that more search demand is now converting into clicks, especially on specific problem-solving topics. Broad generic terms such as hermeticity still contribute mainly to visibility rather than traffic.

👉 **Key takeaway:** The strongest SEO gains continue to come from specialized, intent-driven technical content, confirming that ORS Labs' growth depends more on precise engineering use cases than on broad generic keyword coverage.

Most visited pages via natural referencing

Most popular pages	Clicks			Impressions			CTR			Position		
	Mar 26	Feb 26	Difference	Mar 26	Feb 26	Difference	Mar 26	Feb 26	Difference	Mar 26	Feb 26	Difference

/tests-dhermeticite/hshld/	4	4	**0**	498	468	**30**	0,8 %	0,9 %	**-0,1 %**	20,8	29,2	**-8,4**
/en/hermeticity/kr85/	4	3	**1**	418	357	**61**	1 %	0,8 %	**0,1 %**	9,2	9,3	**0**
/pdf/Variable_leak_rate_phenomena_in_glass_to_metal_seals.pdf	4	3	**1**	332	811	**-479**	1,2 %	0,4 %	**0,8 %**	8,4	11,1	**-2,7**
/pdf/Hydrogen_Desorption_From_Packaging_Alloy.pdf	4	10	**-6**	166	457	**-291**	2,4 %	2,2 %	**0,2 %**	7,1	10,4	**-3,3**

📌 **Notes** :

- The **Moisture Calculator** strengthened its leadership with 76 clicks, despite fewer impressions (5,547 nonetheless).
- The **Humidity Conversion Tool** recorded one of the strongest monthly gains with +25 clicks, confirming the value of highly practical tool-based content.
- **Gross Leak Test** and **HSHLD** pages improved their position (respectively by 6.6 and 8.4 points).

👉 **Key takeaway:** Tool pages remain the strongest traffic drivers, while strategic service pages such as Gross Leak Test and HSHLD are building stronger ranking momentum. Technical PDFs continue to support authority and could still be leveraged as future landing pages.

Conclusion

March confirms a strong rebound after the temporary decline observed in February. Traffic increased again across the site's primary acquisition channels, with a particularly strong recovery in organic sessions. At the same time, engagement metrics continued to improve.

From an SEO perspective, March is especially encouraging. While impressions declined, rankings improved significantly, resulting in more clicks and stronger organic traffic. This month, the site attracted more qualified traffic from better-positioned and better-converting search results.

Tool-based pages continue to be the strongest growth drivers, especially the Moisture Calculator and the humidity conversion tool, both of which recorded substantial click gains. In parallel, strategic service pages such as Gross Leak Test and HSHLD showed meaningful ranking improvements, building a stronger foundation for future traffic growth if we make these pages attractive.

Technical PDFs remain valuable authority assets, continuing to attract highly specialized traffic.

Overall, March marks a positive shift toward SEO efficiency and qualified acquisition, confirming that ORS Labs' strongest growth lever remains highly targeted technical content built around concrete engineering needs.

👉 **Strategic priorities** for the coming months:

- **Improve CTR** on high-impression technical pages.
- **Strengthen internal linking** to increase user depth and session value.
- **Continue optimizing** high-performing tool pages.
- **Leverage technical PDF content** by transforming key documents into optimized landing pages integrated within the site architecture.

👉 **Actions**:

- Publish the proposed content (sent in December) on /outils/conversions-dhumidite/ page (french and english versions) — Status: paused, waiting approval from ORS Labs.
- Rework content of the /tests-dhermeticite/hshld/ page based on the new proposed structure — Status: paused, waiting structure approval from ORS Labs.

- Identify high-visibility PDF documents and prioritize their conversion into structured HTML pages to enhance SEO impact and lead generation potential: we could start with Variable_leak_rate_phenomena_in_glass_to_metal_seals.pdf if you agree with the proposition. — Status: paused, waiting approval from ORS Labs regarding the proposal.
- Improve attractiveness of Gross Leak Test and HSHLD pages to take advantage of the ranking gain (HSHLD meta description/title to update based on the proposal waiting for approval + Gross Leak Test meta description/title to rewrite).

Glossary

SEO (Search Engine Optimization): Set of techniques aimed at improving a website's visibility in search engine results.

SERP (Search Engine Results Page): The page displayed by search engines (Google, Bing, etc.) showing results in response to a query.

Internal linking: The organization of a website's internal links that connect different pages together to improve navigation and search engine indexing.

Crawl: The process by which search engine bots browse and analyze a website's pages to decide whether or not to add them to their index.

Indexable: Describes a page that can be added to a search engine's index and therefore appears in search results. A non-indexable page will not be shown in the SERP.

Backlinks: Inbound links coming from other websites and pointing to a given site.

Impressions: The number of times a link appears in search engine results, regardless of whether it is clicked or not.

CTR (Click-Through Rate): The percentage of users who clicked on a link compared to the total number of impressions of that link in the SERP.

PAA (People Also Ask): A section in Google results displaying frequently asked questions related to the query, with answers from various websites.

Canonical URL: The canonical URL indicates which version of a page should be considered as the main one by search engines. It helps prevent duplicate content issues when multiple pages have very similar content.
