SEO monitoring - June 2026

<https://www.orslabs.fr/>

This report provides an overview of the SEO performance of the website orslabs.fr for the period **from June 1 to June 30, 2026**.

Note: the figures for the current month are compared with those for the previous months, but also with those for the previous year over the same period (if available).

No SEO updates to the site were made in May 2026.

2 linkedIn posts were published and 1 newsletter was sent in June.

Traffic source

Source	Jun 26	May 26	Apr 26	Mar 26	Feb 26	Jun 25
Organic Search	193	220	191	191	206	229
Direct	384	372	277	277	264	304
Organic Social	0	6	13	13	12	0
Referral	16	10	7	7	8	6
Paid search	9	10	72	72	20	0
Unassigned	5	58	1	1	2	4

Organic clicks vs. all clicks over the month (per day)

📌 Notes :

- **Organic search** decreased slightly to 193 sessions (-12% vs May).
- **Direct traffic** continued to grow, reaching 384 sessions (+3%).
- **Organic social** dropped to 0 sessions.
- **Referral traffic** increased to 16 sessions.
- **Paid search** remained limited with 9 sessions.
- **Unassigned traffic** returned to a normal level (5 sessions).

👉 **Key takeaway:** Traffic remained globally stable in June. Organic and direct traffic continue to be the site's primary acquisition channels. Adding a tag to the newsletter links would help better track this traffic, preventing it from being attributed to direct traffic or another source.

User behavior

Total number of users (unique)

New users

Number of pages by session

Bounce rate

Engagement rate

Average duration of a session

KPI	Jun 26	May 26	Apr 26	Mar 26	Feb 26	Jun 25
Total number of users (unique)	473	525 (-10%)	407 (16%)	393 (20%)	329 (44%)	N/A (N/A)
New users	450	501 (-10%)	377 (19%)	364 (24%)	300 (50%)	N/A (N/A)
Number of sessions	607	677 (-10%)	562 (8%)	512 (19%)	439 (38%)	N/A (N/A)
Number of pages by session	1,23	1,10 (12%)	1,40 (-12%)	1,28 (-4%)	1,21 (2%)	N/A (N/A)
Bounce rate	67,55%	70,01% (-2,46)	64,23% (3,32)	69,34% (-1,79)	71,07% (-3,52)	N/A (N/A)
Engagement rate	32,45%	29,99% (2,46)	35,77% (-3,32)	30,66% (1,79)	28,93% (3,52)	N/A (N/A)
Average duration of a session	0:01:25	0:01:22 (0:00:03)	0:03:14 (-0:01:49)	0:01:43 (-0:00:18)	0:01:44 (-0:00:19)	#VALUE!

Notes :

- **Users (total and new)** decreased (-10% vs May).
- **Sessions** decreased to 607 (-10%).
- **Pages per session** increased to 1.23.
- **Engagement rate** increased to 32.45%.
- **Session duration** remained stable at 1:25.

 **Key takeaway:** Although traffic volume declined slightly, engagement improved across all key metrics. This confirms once again that lower traffic volumes on ORS Labs tend to be associated with more qualified visitors and stronger user engagement.

SEO Performance Summary

Total impressions

Total clicks

Average CTR

Average position

Organic sessions

Organic traffic pageviews

KPI	Jun 26	May 26	Apr 26	Mar 26	Feb 26	Jun 25
Total impressions	20 858	18 121 (15%)	17 396 (20%)	16 946 (23%)	21 779 (-4%)	20 534 (2%)
Total clicks	249	205 (21%)	211 (18%)	250 (0%)	227 (10%)	267 (-7%)
Average CTR	1,20%	1,10% (9%)	1,20% (0%)	1,50% (-20%)	1,00% (20%)	1,30% (-8%)
Average position	12	11 (13%)	10 (27%)	10 (23%)	13 (-5%)	29 (-57%)
Organic sessions	193	220 (-12%)	128 (51%)	206 (-6%)	147 (31%)	304 (-37%)
Organic traffic pageviews	218	271 (-20%)	251 (-13%)	250 (-13%)	199 (10%)	245 (-11%)

Notes :

- **Impressions** increased significantly to 20 858 (+15% vs May).
- **Clicks** increased to 249 (+21%).
- **CTR** improved slightly to 1.2%.
- **Average position** declined by 1 position.
- **Organic sessions** decreased to 193 (-12%).
- **Organic pageviews** declined to 218 (-20%).

 **Key takeaway:** June delivered a strong visibility, with notable increases in impressions and clicks.

SEO Performance Evolution

👉 **Key takeaway:** The long-term SEO trend remains stable.

 Here are the [major Google algorithm updates](#) from July 2024:

- August 2024: high-quality content update (As part of the August Core Update, Google took a big focus on high-quality content. The algorithm update focused on delivering content that's actually helpful to users, rather than content that's built to rank well in search results. Ultimately, this new update focuses on helping searchers see more content that's genuinely helpful and relevant to them).
- November 2024: site reputation abuse (This update tackled parasite SEO — a tactic websites use to help them manipulate search rankings through third-party content on well-established domains).
- From March 2025: ongoing core updates (Google continues to roll out ongoing updates in 2025, focusing on improving search rankings and performance for searchers).

Top performing organic queries

Top 10 keywords driving clicks

Most frequent queries driving clicks	Clicks	Impressions	CTR	Position
oneida recherche services	4	19	21,1 %	1,5
relative humidity to ppm	3	14	21,4 %	2,1
gross leak test	2	287	0,7 %	7,1
oneida research services	2	240	0,8 %	7,2
orslabs	2	154	1,3 %	15,4
ors lab	2	9	22,2 %	8,1
iva ors	1	77	1,3 %	30,8
moisture calculator	1	68	1,5 %	7,3
test de fuite	1	24	4,2 %	9,5
saturation specific humidity	1	2	50 %	13,5

Top 10 keywords driving impressions

Most frequent queries driving impressions	Clicks	Impressions	CTR	Position
hermeticity	0	787	0 %	4,6
gross leak test	2	287	0,7 %	7,1
oneida research services	2	240	0,8 %	7,2
gross leak bubble tester	0	206	0 %	7,9
ors labs	0	180	0 %	17,6
orslabs	2	154	1,3 %	15,4
gross leak	0	86	0 %	2,1
internal vapor analysis	0	83	0 %	17,4
oneida research services inc	0	78	0 %	14,8
iva ors	1	77	1,3 %	30,8

Notes :

- Search performance continues to be driven by a combination of branded searches and highly specialized technical queries.
- Relative humidity to ppm continues to deliver an excellent CTR (21.4%) and maintains a top-three position.
- Gross leak test remains one of the site's most visible non-branded keywords, although its CTR remains relatively low compared with its visibility.
- Branded searches remain stable and continue to generate strong CTRs.

 **Key takeaway:** ORS Labs continues to perform best on highly targeted technical searches. Broad industry terms mainly contribute to visibility, while specific engineering queries remain the strongest drivers of qualified traffic.

Most visited pages via natural referencing

Most popular pages	Clicks			Impressions			CTR			Position		
	Jun 26	May 26	Difference	Jun 26	May 26	Difference	Jun 26	May 26	Difference	Jun 26	May 26	Difference

Notes :

- The **Humidity Conversion Tool** became the site's top organic landing page this month, gaining 22 additional clicks and improving both CTR and average position.
- The **Moisture Calculator** remained a major traffic driver despite a slight decline in clicks and impressions.
- The **HSHLD** page continued its positive trend with higher clicks, improved CTR.
- Several **technical PDF documents** recorded significant increases in clicks and impressions, particularly Humidity Equations.pdf, Interpretation of RGA Data, and Hermeticity of Electronic Packages.pdf.

- The **Gross Leak Test** page remained stable but lost some ranking positions.

👉 **Key takeaway:** June highlights the growing importance of educational technical content. Alongside the site's calculators and tools, several PDF documents continue to gain visibility, reinforcing the opportunity to transform high-performing technical resources into optimized HTML landing pages.

Conclusion

June confirms the positive long-term trajectory of the ORS Labs website. While overall traffic decreased slightly compared with May, the site's two main acquisition channels—organic search and direct traffic—remained stable. In parallel, user engagement improved across several key metrics, suggesting that the site continues to attract a highly qualified audience despite month-to-month fluctuations in traffic volume.

From an SEO perspective, June confirmed the site's strong visibility in search results. Impressions and clicks both increased compared with May, while rankings remained significantly stronger than those observed throughout 2025. These results confirm the positive long-term SEO trajectory despite normal month-to-month fluctuations.

The analysis also reinforces the importance of educational and technical content in the site's SEO strategy. The Humidity Conversion Tool became the top organic landing page, while the HSHLD page continued to gain visibility and clicks. At the same time, several technical PDF documents generated notable growth in impressions but with a low CTR, highlighting strong search visibility but untapped traffic potential, which could be unlocked by converting these resources into optimized HTML landing pages.

These results support the current content strategy and confirm the opportunity to further capitalize on existing technical assets. Converting high-performing PDF documents into optimized HTML landing pages, while continuing to strengthen strategic service pages and technical tools, would help reinforce topical authority, improve internal linking, and create additional opportunities to convert organic visibility into qualified business leads.

Overall, June demonstrates that the site's SEO foundations remain positive. The priorities for the coming months should be to maintain this positive visibility trend, continue improving the performance of strategic pages, and maximize the value of ORS Labs' expert content through targeted optimization and better integration within the site's content ecosystem.

👉 **Strategic priorities** for the coming months:

- **Improve CTR** on high-impression technical pages.
- **Strengthen internal linking** to increase user depth and session value.
- **Continue optimizing** high-performing tool pages.
- **Leverage technical PDF content** by transforming key documents into optimized landing pages integrated within the site architecture.

👉 Actions:

- Publish the proposed content (sent in December) on /outils/conversions-dhumidite/ page (french and english versions) — Status: paused, waiting approval from ORS Labs.
- Rework content of the /tests-dhermeticite/hshld/ page based on the new proposed structure — Status: paused, waiting structure approval from ORS Labs.
- Identify high-visibility PDF documents and prioritize their conversion into structured HTML pages to enhance SEO impact and lead generation potential: we could start with Variable_leak_rate_phenomena_in_glass_to_metal_seals.pdf if you agree with the proposition. — Status: paused, waiting approval from ORS Labs regarding the proposal.
- Publish to proposed meta data for Gross Leak Test page — Status: paused, waiting approval from ORS Labs.

Glossary

SEO (Search Engine Optimization): Set of techniques aimed at improving a website's visibility in search engine results.

SERP (Search Engine Results Page): The page displayed by search engines (Google, Bing, etc.) showing results in response to a query.

Internal linking: The organization of a website's internal links that connect different pages together to improve navigation and search engine indexing.

Crawl: The process by which search engine bots browse and analyze a website's pages to decide whether or not to add them to their index.

Indexable: Describes a page that can be added to a search engine's index and therefore appears in search results. A non-indexable page will not be shown in the SERP.

Backlinks: Inbound links coming from other websites and pointing to a given site.

Impressions: The number of times a link appears in search engine results, regardless of whether it is clicked or not.

CTR (Click-Through Rate): The percentage of users who clicked on a link compared to the total number of impressions of that link in the SERP.

PAA (People Also Ask): A section in Google results displaying frequently asked questions related to the query, with answers from various websites.

Canonical URL: The canonical URL indicates which version of a page should be considered as the main one by search engines. It helps prevent duplicate content issues when multiple pages have very similar content.
