SEO monitoring - February 2026

https://www.orslabs.fr/

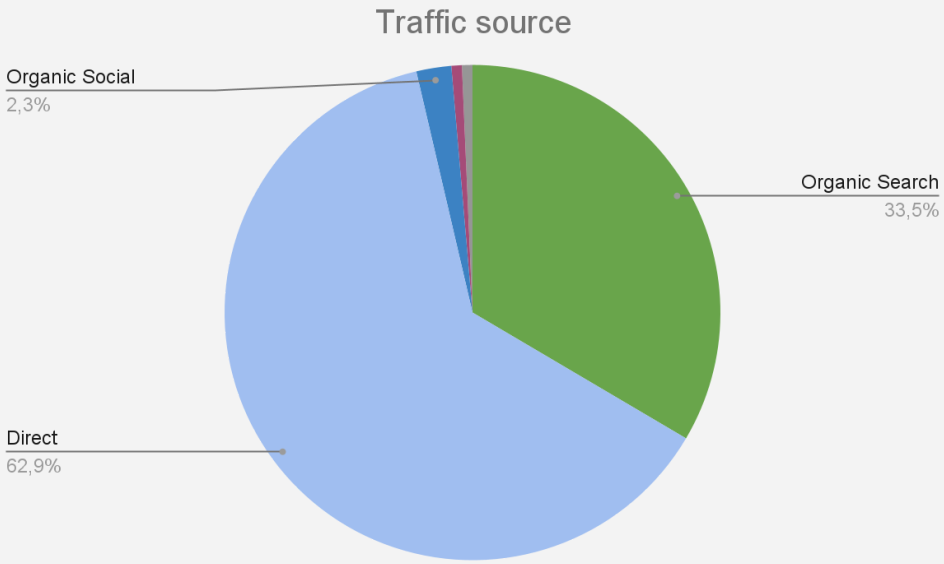
This report provides an overview of the SEO performance of the website orslabs.fr for the period **from February 1 to February 28, 2026**.

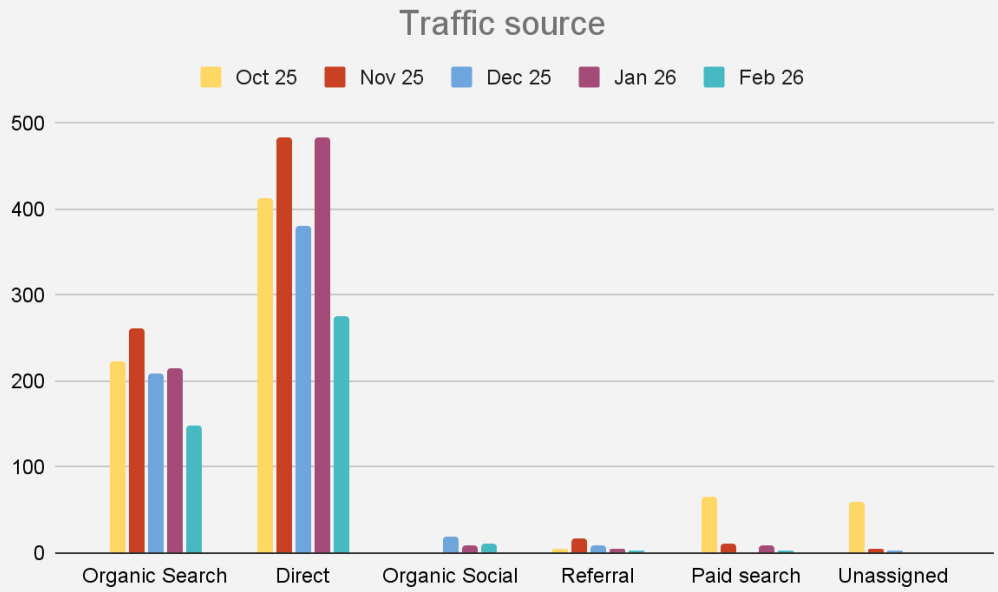
Note: the figures for the current month are compared with those for the previous months, but also with those for the previous year over the same period (if available).

No SEO updates to the site were made in January 2026.

LinkedIn posts were published and one newsletter was sent in February.

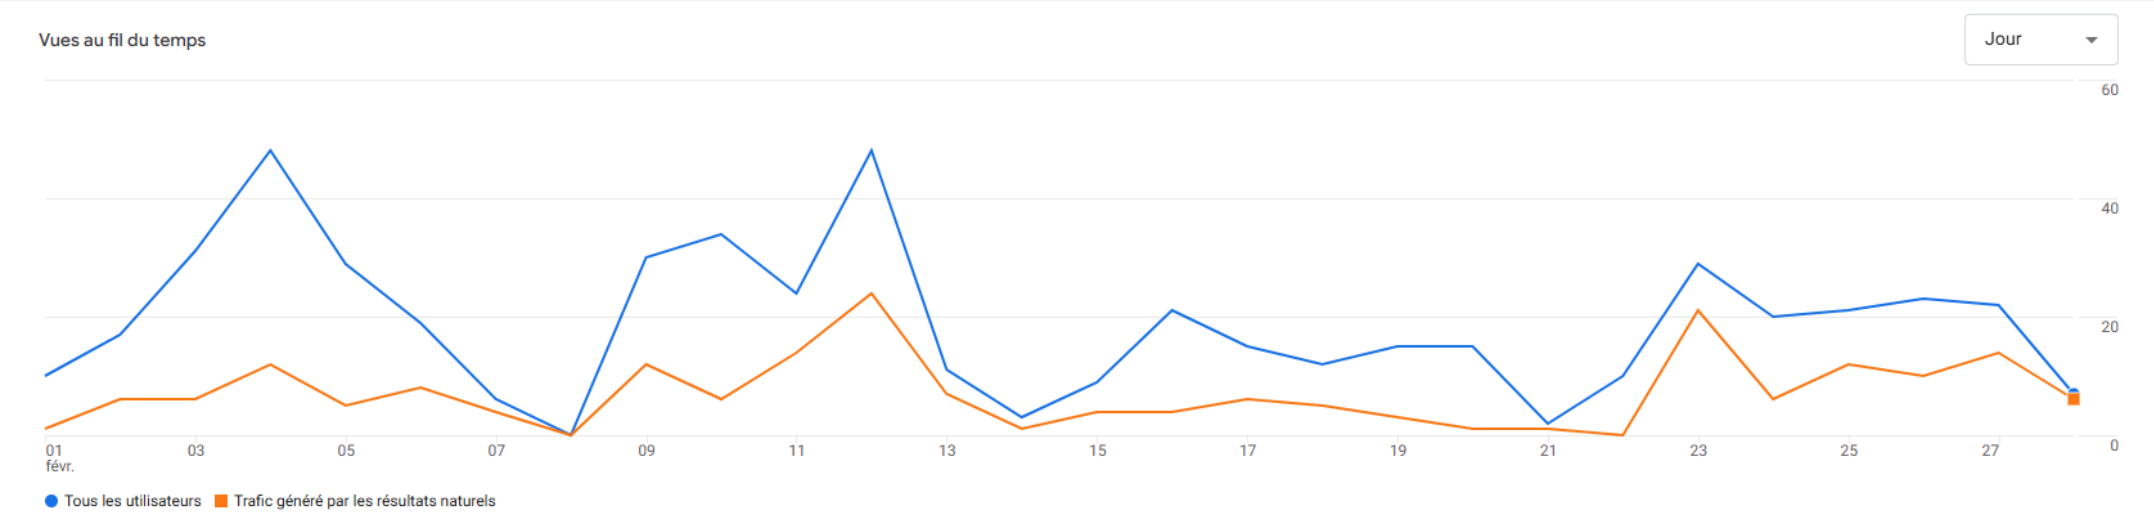
Traffic source





Source	Feb 26	Jan 26	Dec 25	Nov 25	Oct 25	Feb 25
Organic Search	**147**	215	208	261	223	N/A
Direct	**276**	484	380	484	412	N/A
Organic Social	**10**	8	18	0	0	N/A
Referral	**3**	5	8	16	5	N/A
Paid search	**3**	8	1	10	66	N/A
Unassigned	**0**	0	2	5	59	N/A

Organic clicks vs. all clicks over the month (per day)

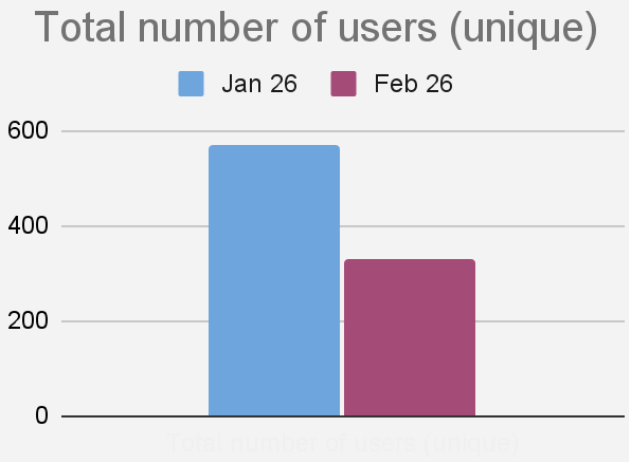


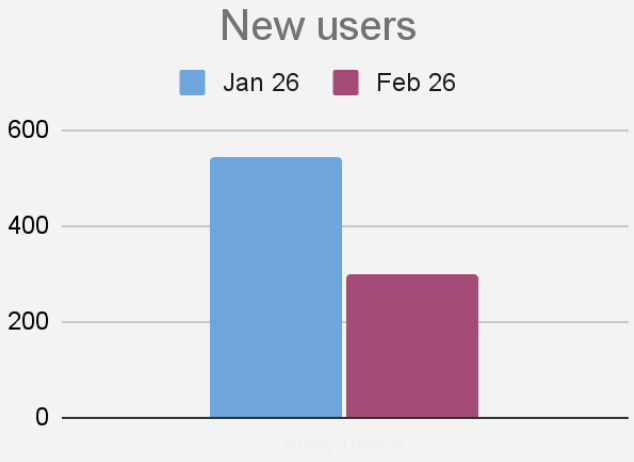
📌 **Notes** :

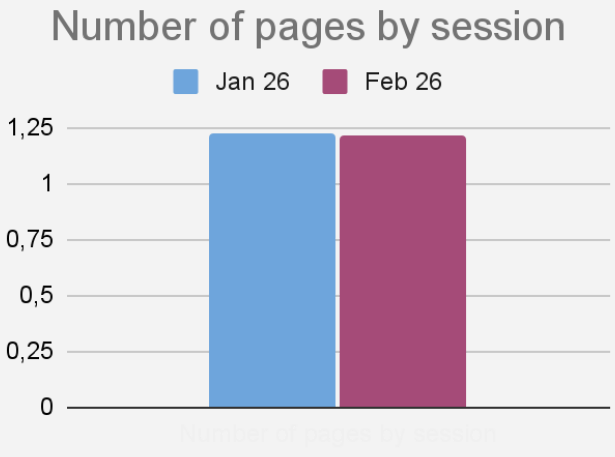
- **Organic search** decreased significantly to 147 sessions (-32% vs January).
- **Direct traffic** also declined to 276 sessions (-43%).
- **Organic social** increased slightly (10 vs 8), likely reflecting LinkedIn activity during the month.
- **Referral traffic** remained marginal (3 sessions).
- **Paid search** dropped to 3 sessions.

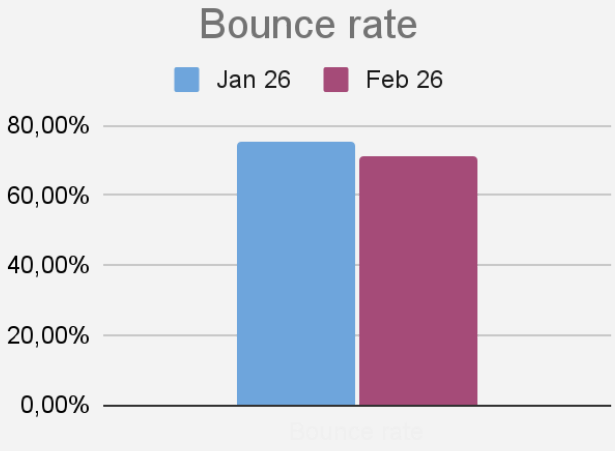
👉 **Key takeaway**: Traffic declined in February across the main acquisition channels. Organic and direct traffic remain the dominant sources. This decrease should be monitored over the coming months to determine whether it reflects a temporary fluctuation or a longer-term trend.

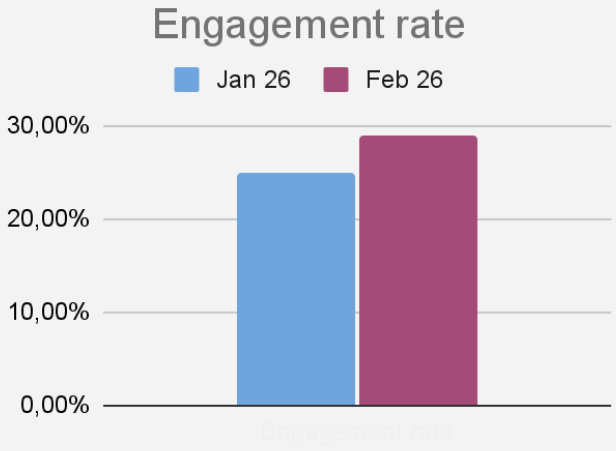
User behavior

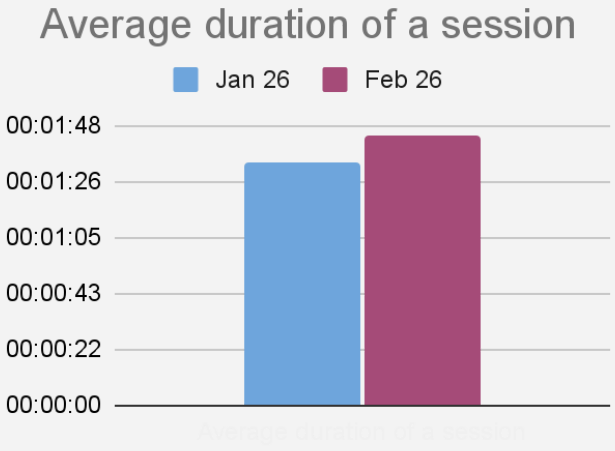












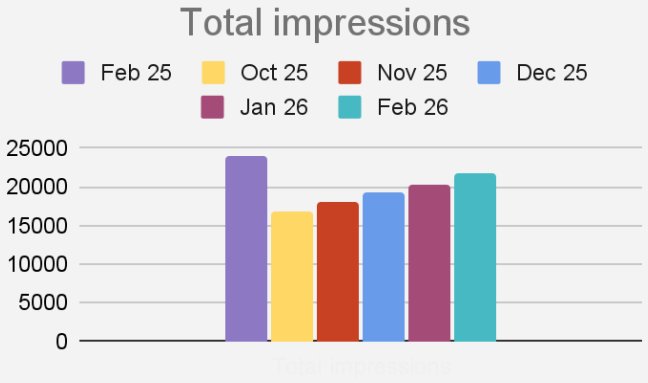
KPI	Feb 26	Jan 26	Dec 25	Nov 25	Oct 25	Feb 25
Total number of users (unique)	**329**	568 (-42%)	517 (10%)	657 (-21%)	686 (-25%)	N/A (N/A)
New users	**300**	544 (-45%)	493 (10%)	641 (-23%)	608 (-19%)	N/A (N/A)
Number of sessions	**439**	721 (-39%)	617 (17%)	777 (-21%)	764 (-19%)	N/A (N/A)
Number of pages by session	**1,21**	1,22 (-1%)	1,16 (5%)	1,16 (0%)	1,11 (5%)	N/A (N/A)
Bounce rate	**71,07%**	75,17% (-4,10)	70,50% (4,67)	75,93% (-5,43)	71,90% (-1,40)	N/A (N/A)
Engagement rate	**28,93%**	24,83% (4,10)	29,50% (-4,67)	24,05% (5,45)	28,10% (1,40)	N/A (N/A)
Average duration of a session	**0:01:44**	0:01:34 (0:00:10)	0:01:30 (0:00:04)	0:01:12 (0:00:18)	0:01:04 (0:00:26)	#VALUE!

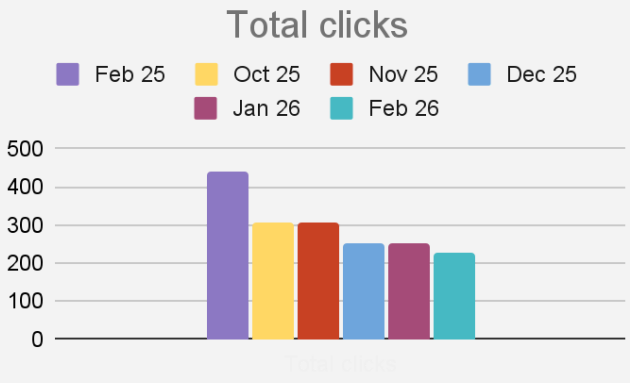
📌 **Notes** :

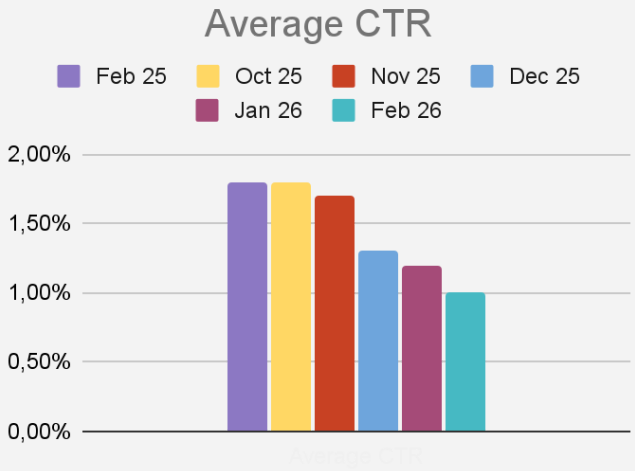
- **Users and sessions** decreased this month (around -42%).
- **Pages per session** remained stable.
- **Engagement rate** increased to 28.93% (+4.1).
- **Session duration** gained 10 seconds.

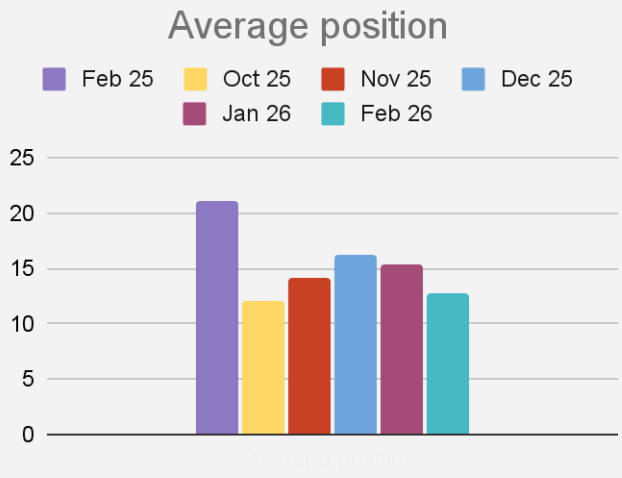
👉 **Key takeaway**: Despite the drop in traffic volume, user engagement improved across most metrics, indicating that visitors interacting with the site are more qualified or more interested in the content. This reinforces the pattern observed in previous months.

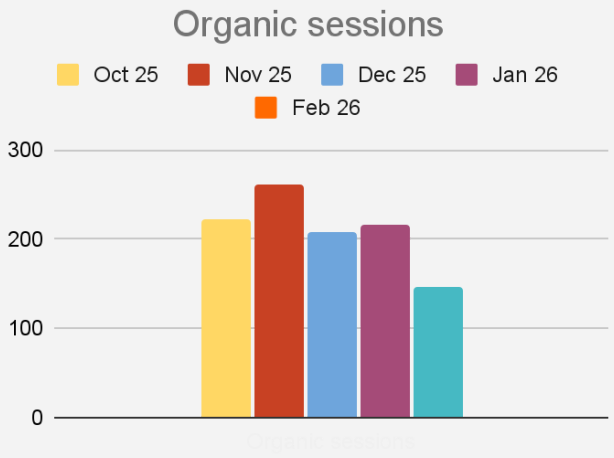
SEO Performance Summary

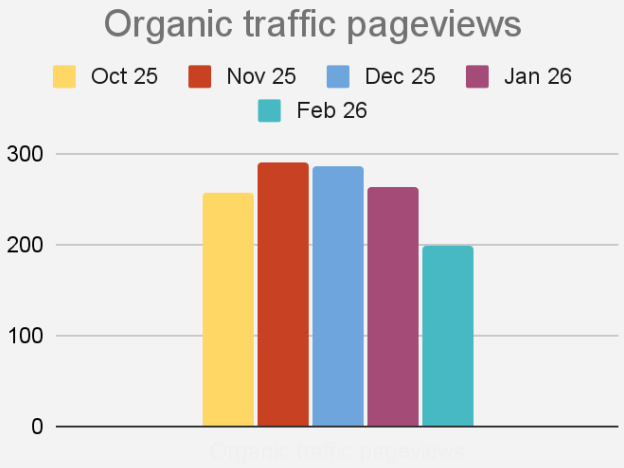












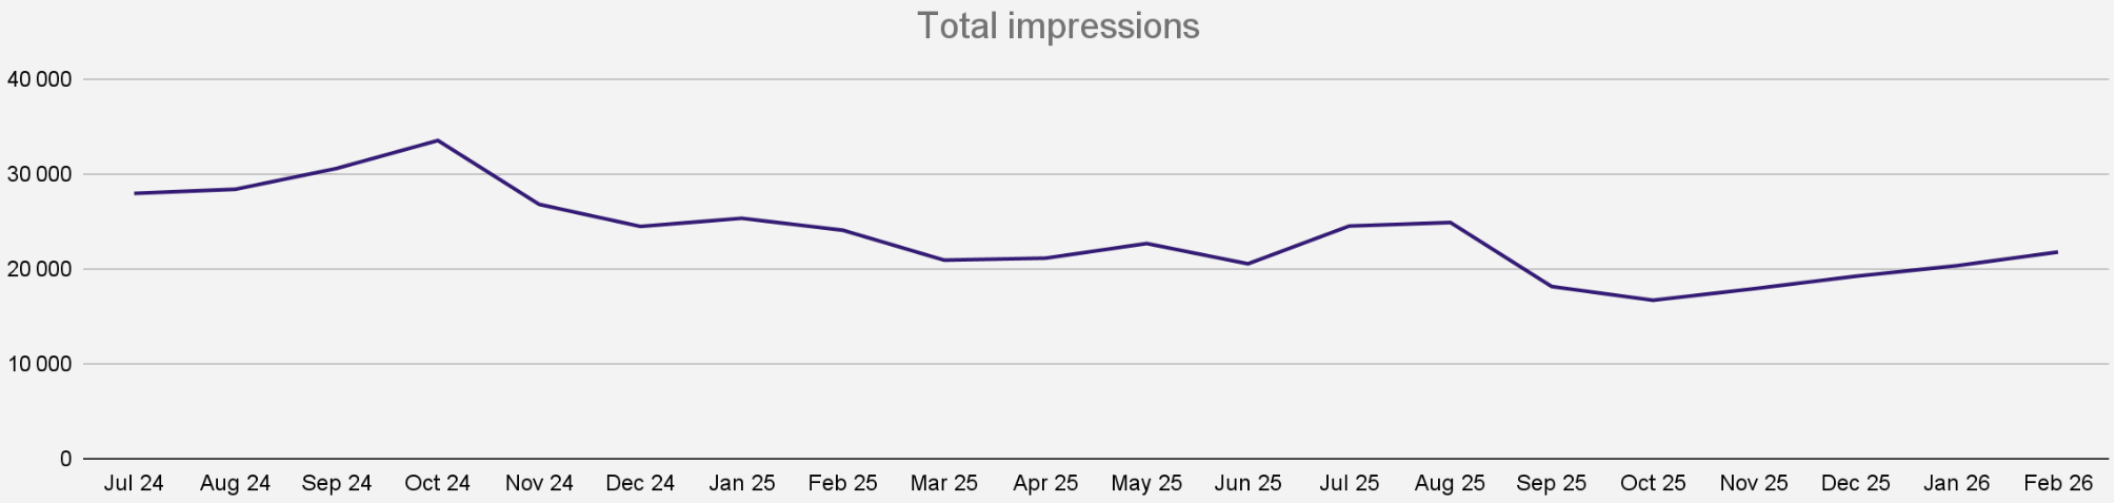
KPI	Feb 26	Jan 26	Dec 25	Nov 25	Oct 25	Feb 25
Total impressions	**21 779**	20 334 (7%)	19 222 (6%)	17 910 (7%)	16 692 (15%)	24 075 (-10%)
Total clicks	**227**	250 (-9%)	251 (0%)	305 (-18%)	304 (-17%)	438 (-48%)
Average CTR	**1,00%**	1,20% (-17%)	1,30% (-8%)	1,70% (-24%)	1,80% (-28%)	1,80% (-44%)
Average position	**13**	15 (-16%)	16 (-6%)	14 (14%)	12 (34%)	21 (-39%)
Organic sessions	**147**	215 (-32%)	208 (3%)	261 (-20%)	223 (-7%)	N/A (N/A)
Organic traffic pageviews	**199**	264 (-25%)	287 (-8%)	291 (-1%)	257 (12%)	N/A (N/A)

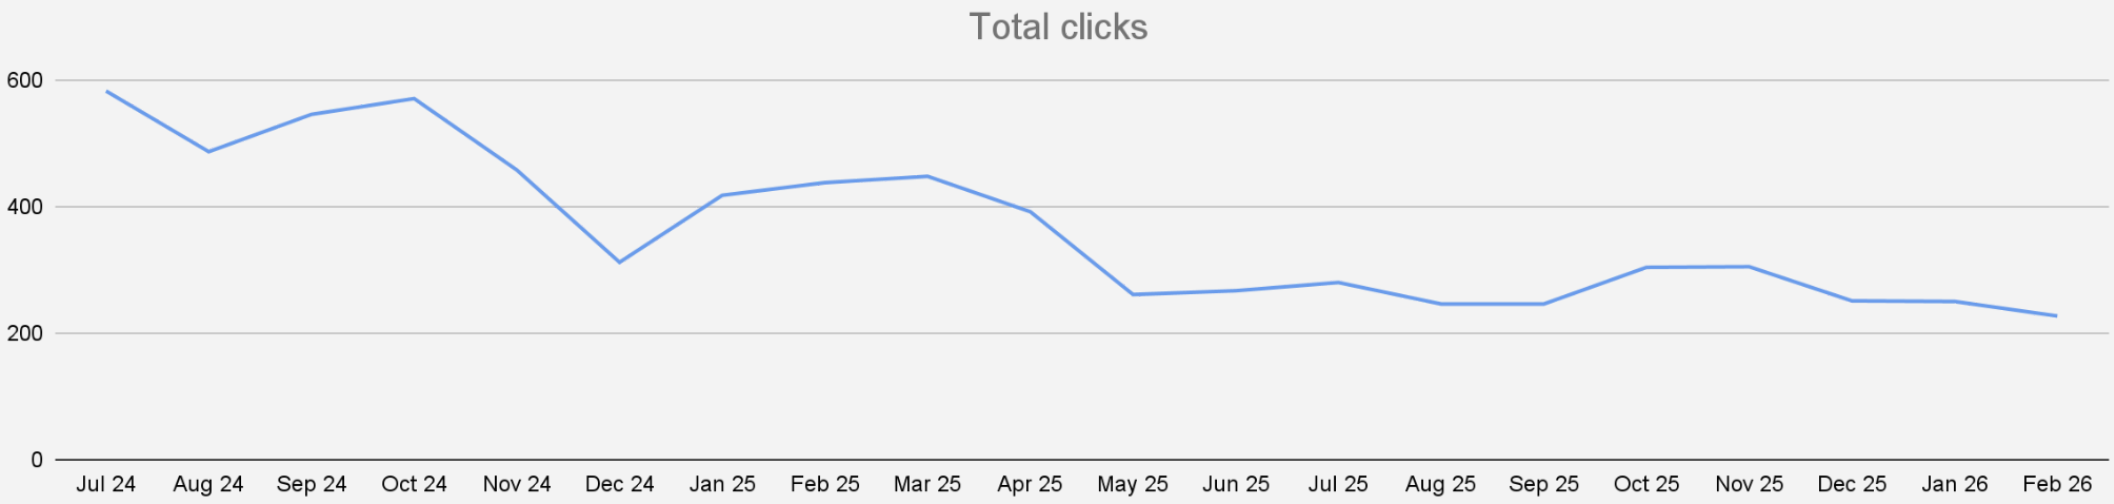
📌 **Notes** :

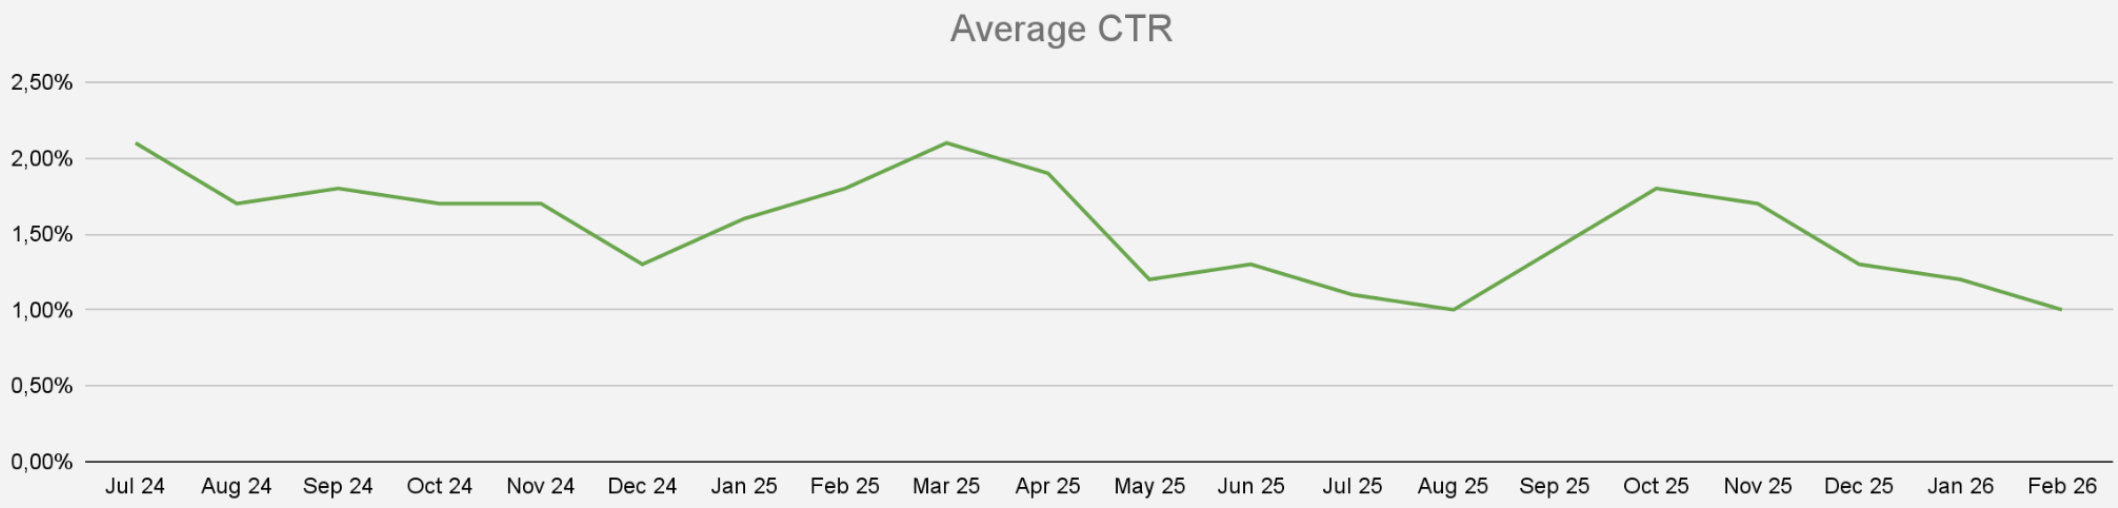
- **Impressions** increased to 21,779 (+7%).
- **Clicks** decreased to 227 (-9%).
- **CTR** declined to 1.0%.
- **Average position** improved to 13 (vs 15).
- **Organic sessions** dropped to 147 (-32%).
- **Organic pageviews** decreased to 199 (-25%).

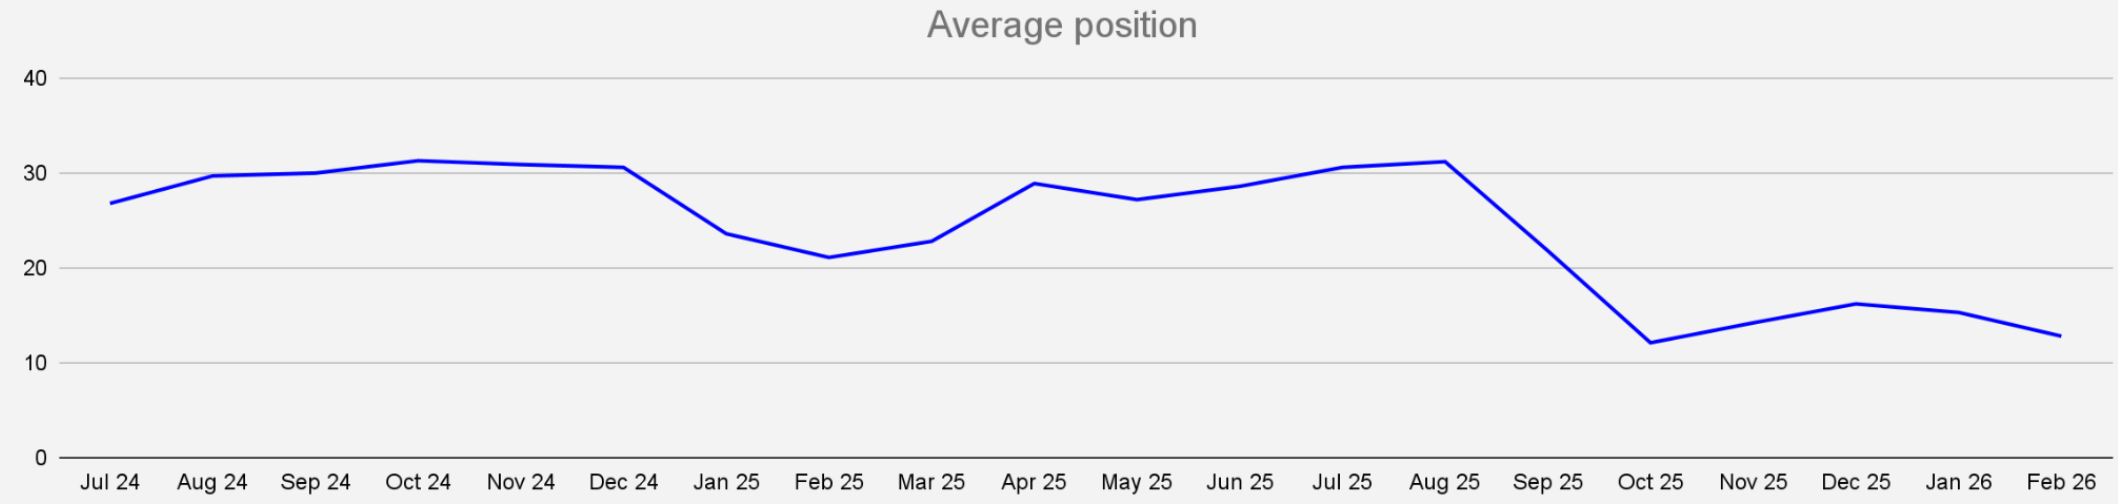
👉 **Key takeaway:** SEO visibility continues to strengthen, with higher impressions and improved rankings. However, the decline in CTR suggests that SERP optimization (titles, meta descriptions) remains a key lever to convert visibility into clicks.

SEO Performance Evolution









📌 **Notes** :

- The long-term growth trend in **impressions** continues since October 2025.
- **Click's** trend remains relatively stable from May 2025.

- The **CTR** continues to fluctuate.
- **Average ranking** continues to improve, reaching one of its best levels**.**

👉 **Key takeaway:** The overall SEO trajectory remains positive: visibility and rankings continue to improve structurally. Performance fluctuations appear to be driven more by demand variability than by technical SEO issues.

This analysis will provide a clearer understanding of the cause–effect relationships driving the site's SEO performance: whether the observed trends result from website changes or from Google algorithm updates.

ℹ️ Here are the major Google algorithm updates from July 2024:

- August 2024: high-quality content update (As part of the August Core Update, Google took a big focus on high-quality content. The algorithm update focused on delivering content that's actually helpful to users, rather than content that's built to rank well in search results. Ultimately, this new update focuses on helping searchers see more content that's genuinely helpful and relevant to them).
- November 2024: site reputation abuse (This update tackled parasite SEO — a tactic websites use to help them manipulate search rankings through third-party content on well-established domains).
- From Mars 2025: ongoing core updates (Google continues to roll out ongoing updates in 2025, focusing on improving search rankings and performance for searchers).

Top performing organic queries

Top 10 keywords driving clicks

Most frequent queries driving clicks	Clicks	Impressions	CTR	Position
gross leak test	6	244	2,5 %	5,7
oneida recherche services	6	21	28,6 %	1,8
ors lab	2	21	9,5 %	2,8
relative humidity to ppm	2	16	12,5 %	2,4
gross leak tester	2	10	20 %	1,7
oneida research services	1	261	0,4 %	5,5
ors calculator	1	27	3,7 %	6,1
relative humidity to ppm calculator	1	19	5,3 %	4,3
conversion humidité relative absolue	1	18	5,6 %	5,5
ors rga	1	17	5,9 %	3

Top 10 keywords driving impressions

Most frequent queries driving impressions	Clicks	Impressions	CTR	Position
hermeticity	0	760	0 %	3,9
oneida research services	1	261	0,4 %	5,5
gross leak test	6	244	2,5 %	5,7
gross leak bubble tester	0	181	0 %	10,5
ors labs	0	126	0 %	9
gross leak	0	121	0 %	2
herméticité	0	83	0 %	10,9
orslabs	0	82	0 %	9,6
test helium	0	72	0 %	16,2
leak test	0	71	0 %	62,1

📌 **Notes** : Search performance remains largely driven by a mix of branded queries and a small set of technical keywords related to hermeticity testing and measurement tools. Highly specific technical queries continue to generate the strongest engagement, confirming that problem-solving content targeting precise engineering needs performs best.

👉 **Key takeaway:** SEO performance continues to rely on highly targeted technical queries, reinforcing the value of focusing on specialized, intent-driven content rather than broad generic keywords.

Most visited pages via natural referencing

Most popular pages	Clicks			Impressions			CTR			Position		
	Feb 26	Jan 26	Difference	Feb 26	Jan 26	Difference	Feb 26	Jan 26	Difference	Feb 26	Jan 26	Difference

/wp-content/uploads/2019/03/ORS-SOP_MEL1053.pdf	5	4	**1**	68	54	**14**	7,4 %	7,4 %	**-0,1 %**	12,6	7,6	**5,1**
/pdf/Hermeticity_of_Electronic_Packages.pdf	4	3	**1**	855	193	**662**	0,5 %	1,6 %	**-1,1 %**	7	9,7	**-2,8**
/tests-dhermeticite/hshld/	4	5	**-1**	468	542	**-74**	0,9 %	0,9 %	**-0,1 %**	29,2	33,4	**-4,3**

📌 **Notes** :

- The **Gross Leak Test** page experienced a significant increase in clicks (+10) and an improvement in ranking.
- Several **technical PDF documents** recorded strong growth in both impressions and clicks, including the RGA interpretation paper and hydrogen desorption study.
- The **homepage** improved in ranking, impressions and clicks.

👉 **Key takeaway:** Tool pages continue to drive the majority of organic traffic, while technical PDF documents are gaining visibility and engagement. These documents represent a strategic opportunity to strengthen topical authority and attract highly qualified technical audiences. Converting these

PDFs into optimized landing pages and integrating them into the internal linking structure could be an opportunity to turn passive technical assets into active SEO and conversion drivers.

Conclusion

February shows a decline in overall traffic compared with January, particularly in organic and direct channels. However, engagement indicators improved during the same period, with higher engagement rate and longer session duration. This suggests that, despite the lower traffic volume, visitors interacting with the site remain highly qualified and interested in the technical content offered.

From an SEO perspective, the site continues to strengthen its visibility. Total impressions increased and the average ranking improved, confirming the positive structural trajectory observed since the end of 2025. At the same time, the decline in CTR highlights an opportunity to better convert this growing visibility into clicks through improved SERP optimization (titles, meta descriptions, and search intent alignment).

The analysis of organic queries confirms that search performance remains driven by a combination of branded searches and highly specific technical queries. As observed in previous months, specialized problem-solving topics continue to generate the strongest engagement, reinforcing the importance of focusing on targeted technical content.

Tool pages remain the strongest organic assets. In parallel, several technical PDF documents gained significant visibility and engagement, demonstrating strong interest in in-depth scientific content.

These documents represent a valuable strategic opportunity. By transforming the most visible PDFs into optimized HTML landing pages — enriched with structured explanations, internal links, and clear calls to action — ORS Labs could leverage existing expert content to strengthen topical authority, improve user navigation, and convert technical visibility into measurable business opportunities.

The traffic decline should be monitored over the coming months to determine whether it reflects a temporary fluctuation.

👉 **Strategic priorities** for the coming months:

- **Improve CTR** on high-impression technical pages.
- **Strengthen internal linking** to increase user depth and session value.
- **Continue optimizing** high-performing tool pages.
- **Leverage technical PDF content** by transforming key documents into optimized landing pages integrated within the site architecture.

👉 **Actions**:

- Publish the proposed content (sent in December) on /outils/conversions-dhumidite/ page (french and english versions) — Status: paused, waiting approval from ORS Labs.
- Rework content of the /tests-dhermeticite/hshld/ page based on the new proposed structure — Status: paused, waiting structure approval from ORS Labs.
- Identify high-visibility PDF documents and prioritize their conversion into structured HTML pages to enhance SEO impact and lead generation potential: we could start with Variable_leak_rate_phenomena_in_glass_to_metal_seals.pdf if you agree with the proposition. — Status: paused, waiting approval from ORS Labs regarding the proposal.

Glossary

SEO (Search Engine Optimization): Set of techniques aimed at improving a website's visibility in search engine results.

SERP (Search Engine Results Page): The page displayed by search engines (Google, Bing, etc.) showing results in response to a query.

Internal linking: The organization of a website's internal links that connect different pages together to improve navigation and search engine indexing.

Crawl: The process by which search engine bots browse and analyze a website's pages to decide whether or not to add them to their index.

Indexable: Describes a page that can be added to a search engine's index and therefore appears in search results. A non-indexable page will not be shown in the SERP.

Backlinks: Inbound links coming from other websites and pointing to a given site.

Impressions: The number of times a link appears in search engine results, regardless of whether it is clicked or not.

CTR (Click-Through Rate): The percentage of users who clicked on a link compared to the total number of impressions of that link in the SERP.

PAA (People Also Ask): A section in Google results displaying frequently asked questions related to the query, with answers from various websites.

Canonical URL: The canonical URL indicates which version of a page should be considered as the main one by search engines. It helps prevent duplicate content issues when multiple pages have very similar content.
