SEO monitoring - July 2026

<https://www.orslabs.fr/>

This report provides an overview of the SEO performance of the website orslabs.fr for the period **from July 1 to July 31, 2026**.

Note: the figures for the current month are compared with those for the previous months, but also with those for the previous year over the same period (if available).

No SEO updates to the site were made in June 2026.

4 linkedIn posts were published and no newsletter was sent in July.

Traffic source

Source	Jul 26	Jun 26	May 26	Apr 26	Mar 26	Jul 25
Organic Search	177	193	220	191	191	241
Direct	381	384	372	277	277	231
Organic Social	3	0	6	13	13	0
Referral	16	16	10	7	7	23
Paid search	6	9	10	72	72	7
Unassigned	3	5	58	1	1	2

Organic clicks vs. all clicks over the month (per day)

📌 Notes :

- **Organic search** decreased slightly to 177 sessions (-8% vs June).
- **Direct traffic** remained stable with 381 sessions (-1%).
- **Organic social** remained limited with 3 sessions.
- **Referral traffic** remained stable with 16 sessions.
- **Paid search** decreased slightly to 6 sessions.
- **Unassigned traffic** remained very low (3 sessions).

👉 **Key takeaway:** Traffic remained relatively stable in July, with organic and direct search continuing to represent the site's main acquisition channels. The slight decline in organic traffic may be partly seasonal, with the summer holiday period potentially contributing to lower search activity. This trend should therefore be monitored over the coming months.

User behavior

Total number of users (unique)

New users

Number of pages by session

Bounce rate

Engagement rate

Average duration of a session

KPI	Jul 26	Jun 26	May 26	Apr 26	Mar 26	Jul 25
Total number of users (unique)	466	473 (-1%)	525 (-11%)	407 (14%)	393 (19%)	398 (17%)
New users	441	450 (-2%)	501 (-12%)	377 (17%)	364 (21%)	372 (19%)
Number of sessions	586	607 (-3%)	677 (-13%)	562 (4%)	512 (14%)	504 (16%)
Number of pages by session	1,18	1,23 (-4%)	1,10 (7%)	1,40 (-16%)	1,28 (-8%)	1,16 (2%)
Bounce rate	73,04%	67,55% (5,49)	70,01% (3,03)	64,23% (8,81)	69,34% (3,70)	67,30% (5,74)
Engagement rate	26,96%	32,45% (-5,49)	29,99% (-3,03)	35,77% (-8,81)	30,66% (-3,70)	32,70% (-5,74)
Average duration of a session	0:01:35	0:01:25 (0:00:10)	0:01:22 (0:00:13)	0:03:14 (-0:01:39)	0:01:43 (-0:00:08)	0:02:04 (-0:00:29)

Notes :

- **Users (total and new)** remained stable (respectively -1% and -2% vs June).
- **Sessions** slightly decreased by 3%.
- **Pages per session** slightly decreased to 1.18.
- **Engagement rate** decreased to 26.96%.
- **Session duration** increased slightly to 1:35.

 **Key takeaway:** User engagement softened slightly in July, despite traffic remaining relatively stable and above last year's levels. This reinforces the importance of looking beyond traffic volume alone and focusing on the ability of the site to encourage deeper interaction with its content.

SEO Performance Summary

Total impressions

Total clicks

Average CTR

Average position

Organic sessions

Organic traffic pageviews

KPI	Jul 26	Jun 26	May 26	Apr 26	Mar 26	Jul 25
Total impressions	15 658	20 858 (-25%)	18 121 (-14%)	17 396 (-10%)	16 946 (-8%)	24 519 (-36%)
Total clicks	179	249 (-28%)	205 (-13%)	211 (-15%)	250 (-28%)	280 (-36%)
Average CTR	1,10%	1,20% (-8%)	1,10% (0%)	1,20% (-8%)	1,50% (-27%)	1,10% (0%)
Average position	12	12 (-2%)	11 (10%)	10 (24%)	10 (20%)	31 (-62%)
Organic sessions	177	193 (-8%)	220 (-20%)	128 (38%)	206 (-14%)	241 (-27%)
Organic traffic pageviews	213	218 (-2%)	271 (-21%)	251 (-15%)	250 (-15%)	282 (-24%)

Notes :

- **Impressions** decreased to 15 658 (-25% vs June).
- **Clicks** decreased to 179 (-28%).
- **CTR** remained broadly stable at 1.1%.
- **Average position** remained stable at 12.
- **Organic sessions** decreased to 177 (-8%).
- **Organic pageviews** remained broadly stable (-2%).

 **Key takeaway:** July shows a temporary decline in search visibility and clicks, while average rankings remained stable. The fact that CTR and rankings did not deteriorate significantly suggests that the main issue is reduced search exposure rather than a broad loss of ranking performance.

SEO Performance Evolution

👉 **Key takeaway:** July represents a setback in visibility rather than in overall ranking performance. The site's SEO foundations remain stronger than a year ago, but the decline in impressions and clicks highlights the need to monitor visibility closely and continue strengthening the pages and topics with the greatest growth potential.

 Here are the [major Google algorithm updates](#) from July 2024:

- August 2024: high-quality content update (As part of the August Core Update, Google took a big focus on high-quality content. The algorithm update focused on delivering content that's actually helpful to users, rather than content that's built to rank well in search results. Ultimately, this new update focuses on helping searchers see more content that's genuinely helpful and relevant to them).
- November 2024: site reputation abuse (This update tackled parasite SEO — a tactic websites use to help them manipulate search rankings through third-party content on well-established domains).
- From March 2025: ongoing core updates (Google continues to roll out ongoing updates in 2025, focusing on improving search rankings and performance for searchers).

Top performing organic queries

Top 10 keywords driving clicks

Most frequent queries driving clicks	Clicks	Impressions	CTR	Position
gross leak test	3	224	1,3 %	5,1
orslabs	3	163	1,8 %	13,8
oneida research services	2	241	0,8 %	8,1
ors calculator	2	33	6,1 %	4,2
ors lab	2	17	11,8 %	3,7
gross leak	1	106	0,9 %	2,5
moisture calculator	1	60	1,7 %	8
rga mass table	1	3	33,3 %	4,7
ors service	1	2	50 %	6
hermeticity	0	963	0 %	4,8

Top 10 keywords driving impressions

Most frequent queries driving impressions	Clicks	Impressions	CTR	Position
hermeticity	0	963	0 %	4,8
oneida research services	2	241	0,8 %	8,1
gross leak test	3	224	1,3 %	5,1
ors labs	0	219	0 %	15,7
gross leak bubble tester	0	201	0 %	8,9
orslabs	3	163	1,8 %	13,8
gross leak	1	106	0,9 %	2,5
internal vapor analysis	0	100	0 %	16,2
ors france	0	84	0 %	16,5
leaksite	0	81	0 %	11,3

Notes :

- Search performance continues to be driven by a combination of branded searches and highly specialized technical queries.
- Relative humidity to ppm disappeared from the top 10 tables.
- Gross leak test remains the main non-branded query driving clicks, with 3 clicks, 224 impressions and a position of 5.1, confirming its strong visibility but still relatively low CTR.
- Gross leak ranks particularly well at position 2.5, although its search volume remains limited.
- Branded searches continue to generate traffic.
- A new query “rga mass table” entered into the top 10 table with a CTR at 33.3% and a position at 4.7.
- A new branded query “ors service” entered into the top 10 table with a CTR at 50% and a position at 6.

 **Key takeaway:** ORS Labs continues to perform best on highly targeted technical searches and branded queries.

/analyse-de-gaz/cylindre/	3	0	3	30	42	-12	10 %	0 %	10 %	7,6	8,8	-1,3

Notes :

- The **Moisture Calculator** page remained a major traffic driver despite a slight decline in clicks and impressions.
- The **Humidity Conversion Tool** page also experienced a decrease in clicks and impressions. Despite the decline, it remains one of the site's strongest-performing pages with a 4.3% CTR.
- The **Gross Leak Test** page continued its positive trend with higher clicks, improved CTR.
- Several **technical PDF documents** remained visible in organic search. But the Hermeticity of Electronic Packages PDF experienced a significant ranking decline compared to June.

👉 **Key takeaway:** July shows a broadly decline, most likely due to the summer holidays period.

Conclusion

July shows a slight slowdown in overall traffic and a more significant decline in search visibility compared with June. Organic sessions decreased by 8%, while impressions and clicks fell more sharply. However, the site's average position remained stable at 12 and CTR remained broadly unchanged, suggesting that the decline is primarily related to reduced search exposure, probably due to summer holidays rather than a broad deterioration in ranking performance.

From a longer-term perspective, the SEO trajectory remains stronger than a year ago. Average position is significantly better than in July 2025, while organic traffic and total users also remain above last year's levels.

The analysis of queries and landing pages continues to highlight the importance of highly targeted technical content.

The performance of the technical PDF documents remains mixed, but several continue to generate meaningful organic visibility. This supports the existing strategy of identifying the most promising PDFs and progressively transforming them into optimized HTML landing pages. This approach could help ORS Labs make better use of existing expert content, strengthen internal linking and convert existing search visibility into additional qualified traffic.

Overall, July shows a seasonal slowdown rather than clear evidence of a deterioration in SEO performance. While search visibility and organic traffic declined compared with June, rankings and CTR remained relatively stable, and the site's SEO performance remains stronger than a year ago. The coming months will be important to determine whether visibility and traffic recover after the summer period.

👉 **Strategic priorities** for the coming months:

- **Improve CTR** on high-impression technical pages.
- **Strengthen internal linking** to increase user depth and session value.
- **Continue optimizing** high-performing tool pages.
- **Leverage technical PDF content** by transforming key documents into optimized landing pages integrated within the site architecture.

👉 **Actions:**

- Publish the proposed content (sent in December) on /outils/conversions-dhumidite/ page (french and english versions) — Status: paused, waiting approval from ORS Labs.
- Rework content of the /tests-dhermeticite/hshld/ page based on the new proposed structure — Status: paused, waiting structure approval from ORS Labs.
- Identify high-visibility PDF documents and prioritize their conversion into structured HTML pages to enhance SEO impact and lead generation potential: we could start with Variable_leak_rate_phenomena_in_glass_to_metal_seals.pdf if you agree with the proposition. — Status: paused, waiting approval from ORS Labs regarding the proposal.
- Publish to proposed meta data for Gross Leak Test page — Status: paused, waiting approval from ORS Labs.

Glossary

SEO (Search Engine Optimization): Set of techniques aimed at improving a website's visibility in search engine results.

SERP (Search Engine Results Page): The page displayed by search engines (Google, Bing, etc.) showing results in response to a query.

Internal linking: The organization of a website's internal links that connect different pages together to improve navigation and search engine indexing.

Crawl: The process by which search engine bots browse and analyze a website's pages to decide whether or not to add them to their index.

Indexable: Describes a page that can be added to a search engine's index and therefore appears in search results. A non-indexable page will not be shown in the SERP.

Backlinks: Inbound links coming from other websites and pointing to a given site.

Impressions: The number of times a link appears in search engine results, regardless of whether it is clicked or not.

CTR (Click-Through Rate): The percentage of users who clicked on a link compared to the total number of impressions of that link in the SERP.

PAA (People Also Ask): A section in Google results displaying frequently asked questions related to the query, with answers from various websites.

Canonical URL: The canonical URL indicates which version of a page should be considered as the main one by search engines. It helps prevent duplicate content issues when multiple pages have very similar content.
