SEO monitoring - May 2026

<https://www.orslabs.fr/>

This report provides an overview of the SEO performance of the website orslabs.fr for the period **from May 1 to May 31, 2026**.

Note: the figures for the current month are compared with those for the previous months, but also with those for the previous year over the same period (if available).

No SEO updates to the site were made in April 2026.

LinkedIn posts were published and 2 newsletters were sent in May.

Traffic source

Source	May 26	Apr 26	Mar 26	Feb 26	Jan 26	May 25
Organic Search	220	191	191	206	147	N/A
Direct	372	277	277	264	276	N/A
Organic Social	6	13	13	12	10	N/A
Referral	10	7	7	8	3	N/A
Paid search	10	72	72	20	3	N/A
Unassigned	58	1	1	2	0	N/A

Organic clicks vs. all clicks over the month (per day)

Vues au fil du temps

Jour ▼

📌 Notes :

- **Organic search** increased to 220 sessions (+15% vs April).
- **Direct traffic** rose significantly to 372 sessions (+34%).
- **Organic social** decreased to 6 sessions.
- **Referral traffic** increased slightly to 10 sessions.
- **Paid search** dropped sharply to 10 sessions.
- **Unassigned traffic** increased significantly to 58 sessions, which may warrant further investigation regarding traffic attribution.

👉 **Key takeaway:** May was characterized by a strong increase in both organic and direct traffic. The unassigned sessions may come from either from untracked paid search or untracked newsletter.

User behavior

Total number of users (unique)

New users

Number of pages by session

Bounce rate

Engagement rate

Average duration of a session

KPI	May 26	Apr 26	Mar 26	Feb 26	Jan 26	May 25
Total number of users (unique)	525	407 (29%)	393 (34%)	329 (60%)	568 (-8%)	N/A (N/A)
New users	501	377 (33%)	364 (38%)	300 (67%)	544 (-8%)	N/A (N/A)
Number of sessions	677	562 (20%)	512 (32%)	439 (54%)	721 (-6%)	N/A (N/A)
Number of pages by session	1,1	1,40 (-21%)	1,28 (-14%)	1,21 (-9%)	1,22 (-10%)	N/A (N/A)
Bounce rate	70,01%	64,23% (5,78)	69,34% (0,67)	71,07% (-1,06)	75,17% (-5,16)	N/A (N/A)
Engagement rate	29,99%	35,77% (-5,78)	30,66% (-0,67)	28,93% (1,06)	24,83% (5,16)	N/A (N/A)
Average duration of a session	0:01:22	0:03:14 (-0:01:52)	0:01:43 (-0:00:21)	0:01:44 (-0:00:22)	0:01:34 (-0:00:12)	N/A (N/A)

Notes :

- **Users (total and new)** increased significantly (+29% and +33%).
- **Sessions** rose to 677 (+20%).
- **Pages per session** decreased to 1.1.
- **Engagement rate** declined to 29.99%.
- **Session duration** dropped significantly to 1:22 after the unusually high level recorded in April (3:14).

 **Key takeaway:** Traffic volume increased substantially in May, but engagement metrics returned to levels closer to those observed earlier in the year. This reinforces the recurring pattern seen on the site: larger traffic volumes do not necessarily translate into deeper engagement, highlighting the importance of balancing acquisition growth with traffic quality.

SEO Performance Summary

Total impressions

Total clicks

Average CTR

Average position

Organic sessions

Organic traffic pageviews

KPI	May 26	Apr 26	Mar 26	Feb 26	Jan 26	May 25
Total impressions	18 121	17 396 (4%)	16 946 (7%)	21 779 (-17%)	20 334 (-11%)	22 674 (-20%)
Total clicks	205	211 (-3%)	250 (-18%)	227 (-10%)	250 (-18%)	261 (-21%)
Average CTR	1,10%	1,20% (-8%)	1,50% (-27%)	1,00% (10%)	1,20% (-8%)	1,20% (-8%)
Average position	11	10 (13%)	10 (9%)	13 (-16%)	15 (-29%)	27 (-60%)
Organic sessions	220	128 (72%)	206 (7%)	147 (50%)	215 (2%)	N/A (N/A)
Organic traffic pageviews	271	251 (8%)	250 (8%)	199 (36%)	264 (3%)	N/A (N/A)

Notes :

- **Impressions** increased to 18 121 (+4%).
- **Clicks** decreased slightly to 205 (-3%).
- **CTR** declined to 1.1%.
- **Average position** decreased by 1 position.
- **Organic sessions** increased sharply to 220 (+72%).
- **Organic pageviews** increased to 271 (+8%).

 **Key takeaway:** SEO visibility continued to improve in May, with higher impressions and significantly more organic sessions. While CTR and rankings softened slightly, overall SEO performance remains on a positive trajectory, driven by stronger organic traffic acquisition.

SEO Performance Evolution

👉 **Key takeaway:** The trends have remained stable over the past few months.

 Here are the [major Google algorithm updates](#) from July 2024:

- August 2024: high-quality content update (As part of the August Core Update, Google took a big focus on high-quality content. The algorithm update focused on delivering content that's actually helpful to users, rather than content that's built to rank well in search results. Ultimately, this new update focuses on helping searchers see more content that's genuinely helpful and relevant to them).
- November 2024: site reputation abuse (This update tackled parasite SEO — a tactic websites use to help them manipulate search rankings through third-party content on well-established domains).
- From March 2025: ongoing core updates (Google continues to roll out ongoing updates in 2025, focusing on improving search rankings and performance for searchers).

Top performing organic queries

Top 10 keywords driving clicks

Most frequent queries driving clicks	Clicks	Impressions	CTR	Position
ors calculator	3	32	9,4 %	4,5
oneida recherche services	3	19	15,8 %	3,5
relative humidity to ppm calculator	2	19	10,5 %	3,2
hermeticity	1	714	0,1 %	4,9
gross leak test	1	307	0,3 %	6,6
orslabs	1	143	0,7 %	10,1
leaksite	1	66	1,5 %	15,9
gross leak testing	1	60	1,7 %	6,5
relative humidity to ppm	1	12	8,3 %	2,9
rgadata	1	9	11,1 %	7,6

Top 10 keywords driving impressions

Most frequent queries driving impressions	Clicks	Impressions	CTR	Position
hermeticity	1	714	0,1 %	4,9
gross leak test	1	307	0,3 %	6,6
4.25e-3 "6.02e-3"	0	265	0 %	4,1
oneida research services	0	235	0 %	7,7
gross leak bubble tester	0	219	0 %	8,2
ors labs	0	175	0 %	12,4
orslabs	1	143	0,7 %	10,1
gross leak	0	101	0 %	2,7
ors france	0	100	0 %	19,3
iva ors	0	90	0 %	14,2

Notes :

- Search performance continues to rely on a mix of branded searches and highly targeted technical queries.
- Queries related to humidity conversion, moisture calculation, and gross leak testing continue to generate the most qualified traffic.
- Several branded searches (ORS Calculator, Oneida Recherche Services) maintain strong CTRs and rankings.

 **Key takeaway:** SEO performance continues to be driven by specialized technical searches rather than broad generic terms.

Most visited pages via natural referencing

Most popular pages	Clicks			Impressions			CTR			Position		
	May 26	Apr 26	Difference	May 26	Apr 26	Difference	May 26	Apr 26	Difference	May 26	Apr 26	Difference

/analyse-de-gaz/degazage-de-materiaux/	3	1	2	94	101	-7	3,2 %	1 %	2,2 %	10,7	17,9	-7,2

Notes :

- The **Moisture Calculator** remained the strongest organic traffic driver with 78 clicks and 5 541 impressions.
- The **Humidity Conversion Tool** continued its positive trend, gaining both clicks and impressions while improving its average ranking.
- The **HSHLD** page recorded one of the strongest improvements, with clicks increasing from 2 to 7 and visibility continuing to grow.
- **Technical PDF documents** continued to generate traffic.

👉 **Key takeaway:** Tool pages remain the site's strongest SEO assets, while the HSHLD page is beginning to show encouraging signs of growth. Technical PDF documents continue to support topical authority and remain promising candidates for future landing page development.

Conclusion

May marks a strong recovery month for ORS Labs. Traffic increased significantly across the site's main acquisition channels, driven by substantial growth in both direct and organic traffic. Total users, new users, and sessions all increased considerably compared with April, confirming renewed acquisition momentum.

At the same time, engagement metrics declined compared with the exceptional levels recorded in April. This suggests that the increase in traffic volume was accompanied by a broader audience with lower average engagement, a pattern frequently observed in technical B2B environments where highly specialized visitors tend to interact more deeply with content than broader audiences.

From an SEO perspective, the overall trajectory remains positive. Impressions continued to grow and organic traffic increased significantly. Although CTR and average position softened slightly, rankings remain substantially stronger than at the beginning of the year, indicating that the site's visibility gains are being maintained over time.

Tool-based content continues to be the strongest acquisition driver. The Moisture Calculator and Humidity Conversion Tool remain key assets, while the HSHLD page showed encouraging progress in both visibility and clicks. Technical PDF documents also continue to attract qualified traffic and reinforce ORS Labs' authority on highly specialized topics.

👉 **Strategic priorities** for the coming months:

- **Improve CTR** on high-impression technical pages.
- **Strengthen internal linking** to increase user depth and session value.
- **Continue optimizing** high-performing tool pages.
- **Leverage technical PDF content** by transforming key documents into optimized landing pages integrated within the site architecture.

👉 **Actions:**

- Publish the proposed content (sent in December) on /outils/conversions-dhumidite/ page (french and english versions) — Status: paused, waiting approval from ORS Labs.

- Rework content of the /tests-dhermeticite/hshld/ page based on the new proposed structure — Status: paused, waiting structure approval from ORS Labs.
- Identify high-visibility PDF documents and prioritize their conversion into structured HTML pages to enhance SEO impact and lead generation potential: we could start with Variable_leak_rate_phenomena_in_glass_to_metal_seals.pdf if you agree with the proposition. — Status: paused, waiting approval from ORS Labs regarding the proposal.
- Publish to proposed meta data for Gross Leak Test page — Status: paused, waiting approval from ORS Labs.

Glossary

SEO (Search Engine Optimization): Set of techniques aimed at improving a website's visibility in search engine results.

SERP (Search Engine Results Page): The page displayed by search engines (Google, Bing, etc.) showing results in response to a query.

Internal linking: The organization of a website's internal links that connect different pages together to improve navigation and search engine indexing.

Crawl: The process by which search engine bots browse and analyze a website's pages to decide whether or not to add them to their index.

Indexable: Describes a page that can be added to a search engine's index and therefore appears in search results. A non-indexable page will not be shown in the SERP.

Backlinks: Inbound links coming from other websites and pointing to a given site.

Impressions: The number of times a link appears in search engine results, regardless of whether it is clicked or not.

CTR (Click-Through Rate): The percentage of users who clicked on a link compared to the total number of impressions of that link in the SERP.

PAA (People Also Ask): A section in Google results displaying frequently asked questions related to the query, with answers from various websites.

Canonical URL: The canonical URL indicates which version of a page should be considered as the main one by search engines. It helps prevent duplicate content issues when multiple pages have very similar content.
