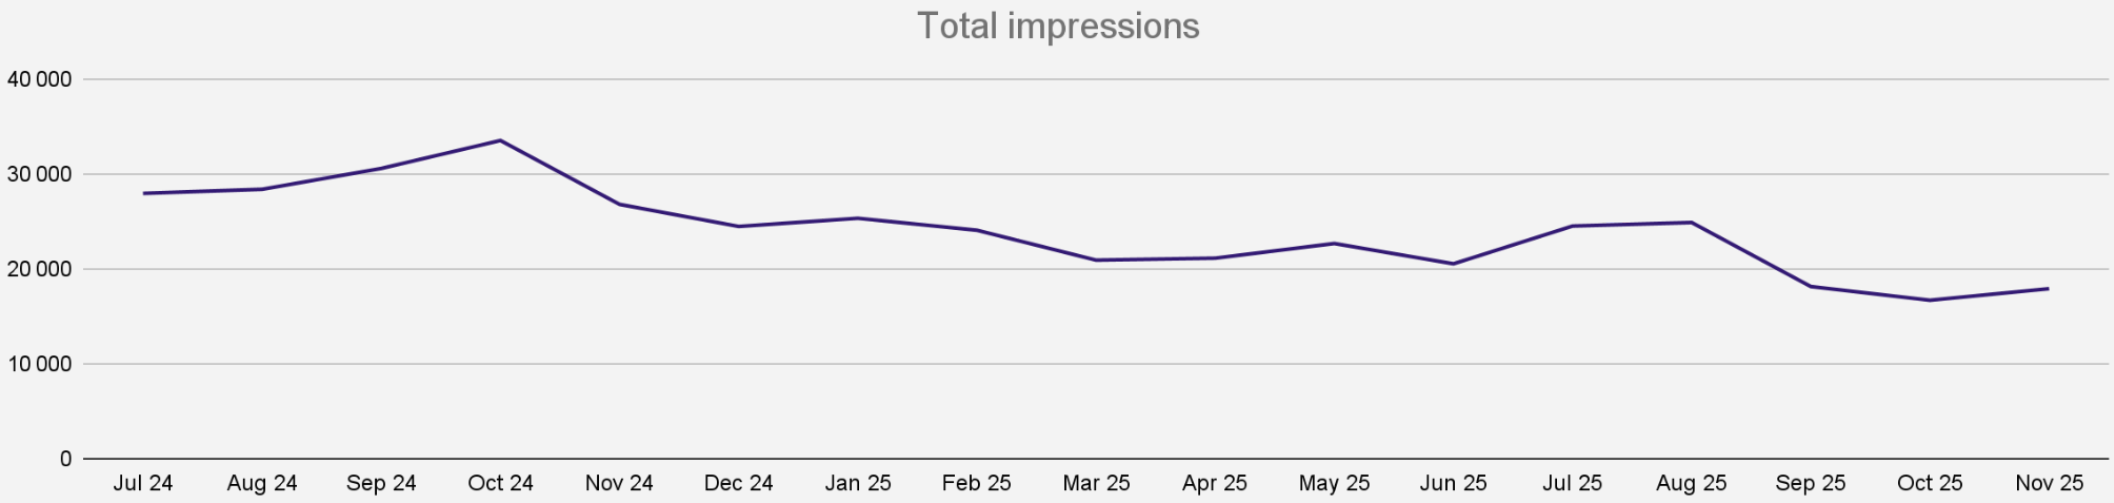
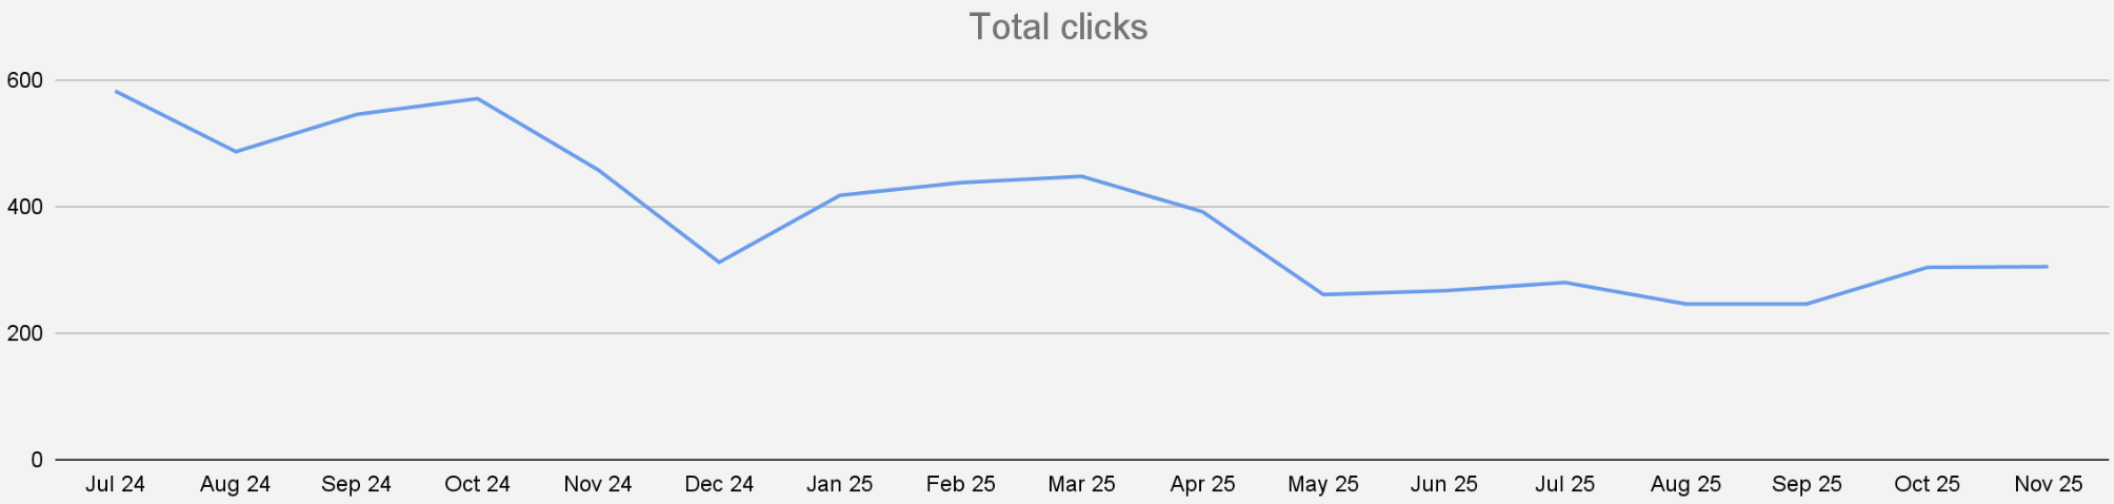
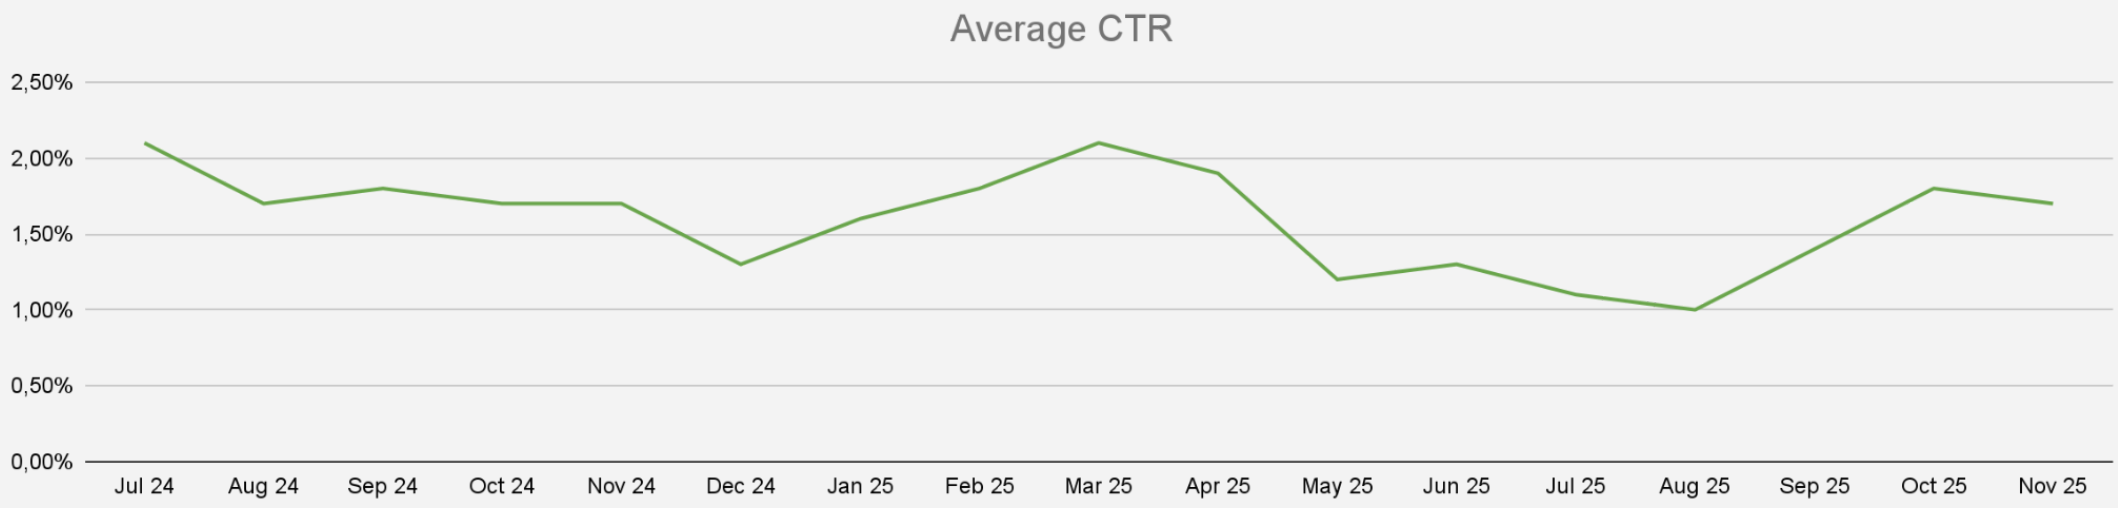
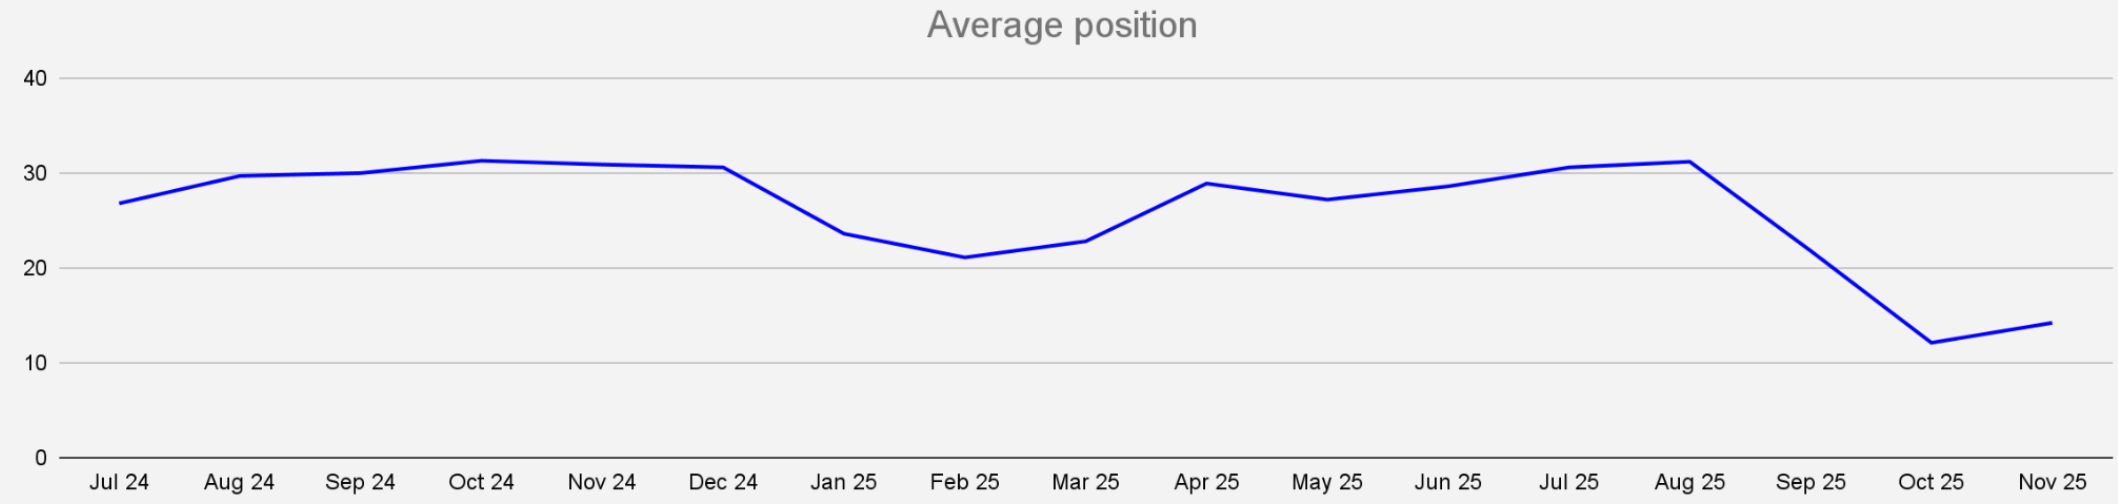
SEO Performance Evolution









📌 **Notes** :

- The long-term trend shows stabilization for **impressions** and **clicks.**
- **CTR** continues its gradual improvement, despite a small dip this month.

- **Average position** remains far above levels from early 2025.

👉 **Key takeaway:** The overall upward trend remains strong. As always, linking fluctuations to website updates or Google algorithm changes is key to understanding long-term patterns.

This analysis will provide a clearer understanding of the cause–effect relationships driving the site's SEO performance: whether the observed trends result from website changes or from Google algorithm updates.

ℹ️ Here are the major Google algorithm updates from July 2024:

- August 2024: high-quality content update (As part of the August Core Update, Google took a big focus on high-quality content. The algorithm update focused on delivering content that's actually helpful to users, rather than content that's built to rank well in search results. Ultimately, this new update focuses on helping searchers see more content that's genuinely helpful and relevant to them).
- November 2024: site reputation abuse (This update tackled parasite SEO — a tactic websites use to help them manipulate search rankings through third-party content on well-established domains).
- From Mars 2025: ongoing core updates (Google continues to roll out ongoing updates in 2025, focusing on improving search rankings and performance for searchers).

Top 10 keywords driving impressions

Most frequent queries driving impressions	Clicks	Impressions	CTR	Position
hermeticity	0	715	0 %	6,3
oneida research services	2	247	0,8 %	3,2
gross leak test	1	246	0,4 %	2,2
gross leak bubble tester	1	231	0,4 %	5,2
ors labs	1	150	0,7 %	3,6
package gas analysis	0	117	0 %	2,4
gross leak	0	117	0 %	3,2
ppmv	0	114	0 %	7,1
leak test	0	105	0 %	54,5
orslabs	1	103	1 %	5,6

📌 **Notes** :

- Branded queries remain dominant drivers of clicks.
- Hermeticity still generates many impressions (715) but no clicks.
- “Relative humidity to ppm” still performs well with a 10.5% CTR, confirming strong match to user intent.
- New keywords such as “frost point calculator” and “gross leak test procedure” appear in the top clicks, and “package gas analysis” appears in the top impressions, showing opportunities for expansion.

👉 **Key takeaway:** Branded traffic remains strong, but high-impression technical keywords still fail to convert. Optimizing titles and meta descriptions could strongly improve CTR and capture more qualified traffic. Despite generating very high impressions, hermeticity keyword is broad (may be used in many different contexts). It should be used to identify related, more precise search terms that match ORS Labs’ expertise.

📌 **Notes** :

- **Moisture Calculator** page remains the top performer in terms of clicks and impressions.
- **Gross leak test** and **high-sensitivity helium leak detection** pages gained visibility, with a clear increase in impressions, but the CTR remains very low.

👉 **Key takeaway:** Top-performing tools remain essential traffic drivers, but several high-visibility pages still fail to convert impressions into clicks. Click appeal remains the main weakness.

Conclusion

November 2025 shows a generally positive continuation of the SEO trends observed in recent months. Overall visibility improved, with a notable increase in impressions and organic sessions. Humidity conversions and moisture calculation tools remain the strongest organic entry points.

User acquisition is stable, but engagement remains fragile. This reinforces the need to improve landing-page relevance, UX clarity and internal linking, especially on high-impression technical pages.

Organic and direct channels continue to drive most of the traffic, and the email campaign likely contributed to higher direct activity.

👉 **Strategic priorities** for the coming months:

- **Improve engagement:** enhance content pages, add richer explanations, optimize UX, and reinforce internal linking.
- **CTR optimization:** refine titles and meta descriptions on pages with high impressions but low CTR.

👉 **Actions**: Update /outils/conversions-dhumidite/ page by using the structure proposed in October and writing the new content.
