SEO monitoring - December 2025

https://www.orslabs.fr/

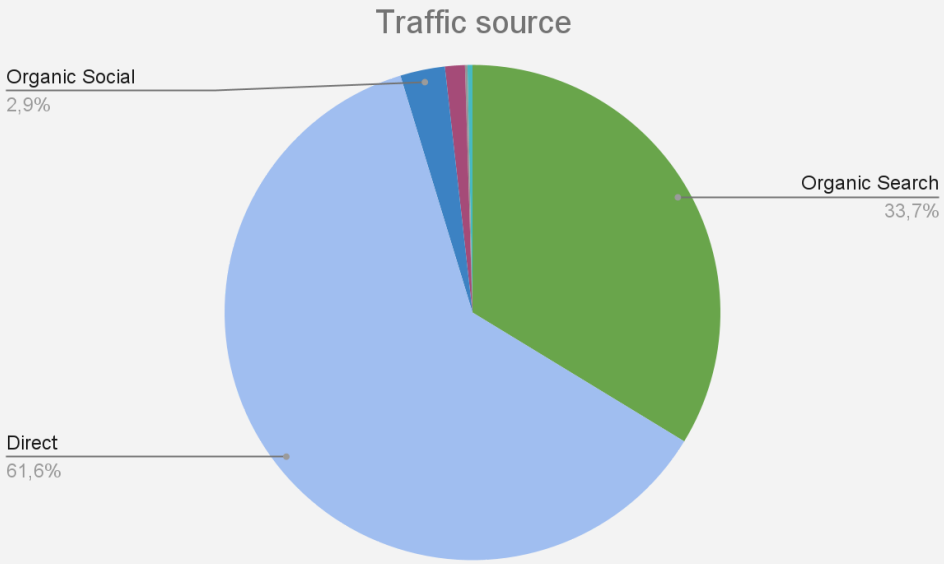
This report provides an overview of the SEO performance of the website orslabs.fr for the period **from December 1 to December 31, 2025**.

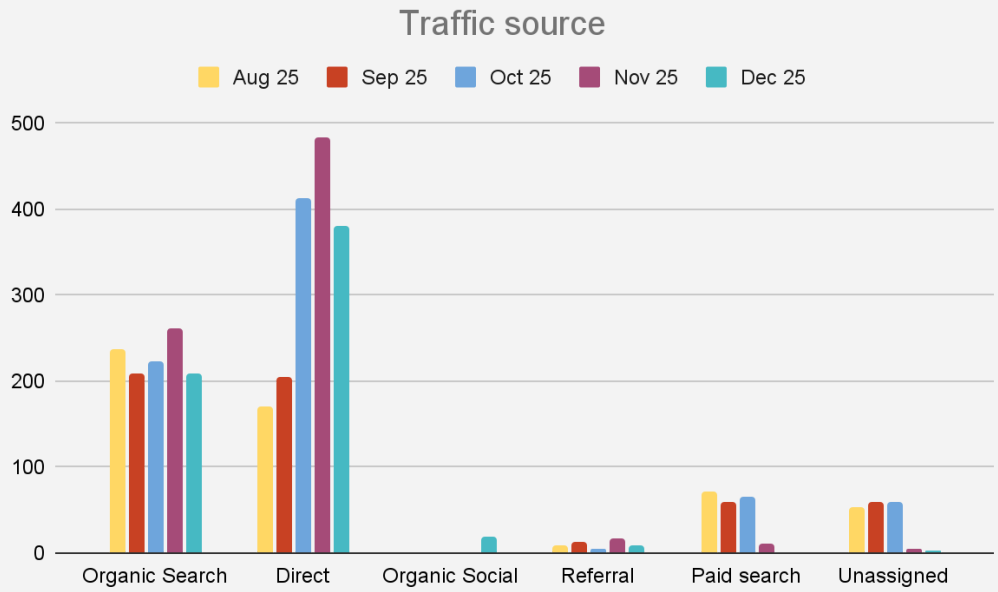
Note: the figures for the current month are compared with those for the previous months, but also with those for the previous year over the same period (if available).

No SEO updates to the site were made in November 2025.

LinkedIn posts were published during December. Newsletter?

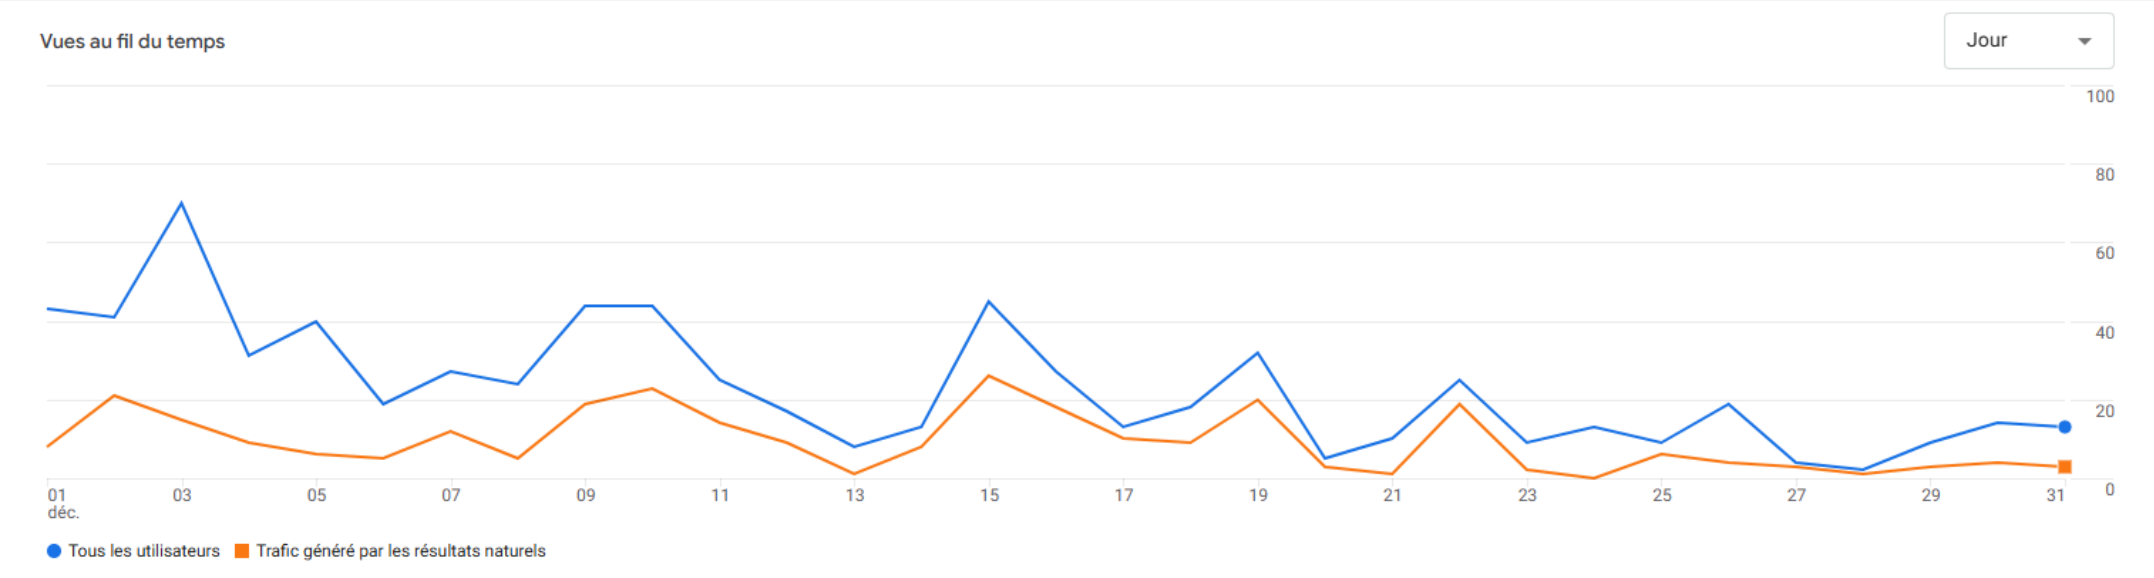
Traffic source





Source	Dec 25	Nov 25	Oct 25	Sep 25	Aug 25	Dec 24
Organic Search	**208**	261	223	209	237	N/A
Direct	**380**	484	412	204	171	N/A
Organic Social	**18**	0	0	0	0	N/A
Referral	**8**	16	5	12	9	N/A
Paid search	**1**	10	66	60	72	N/A
Unassigned	**2**	5	59	59	54	N/A

Organic clicks vs. all clicks over the month (per day)

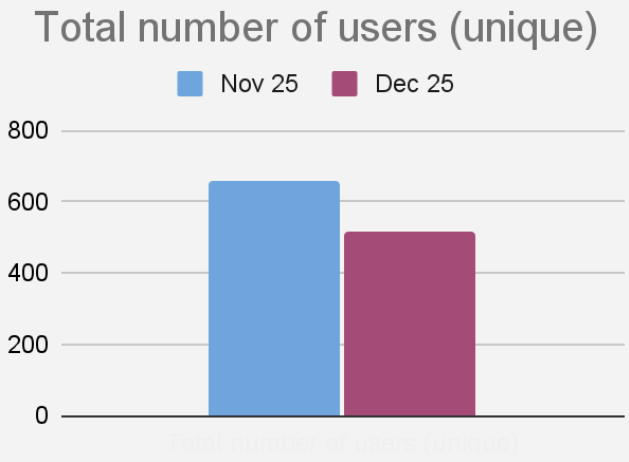


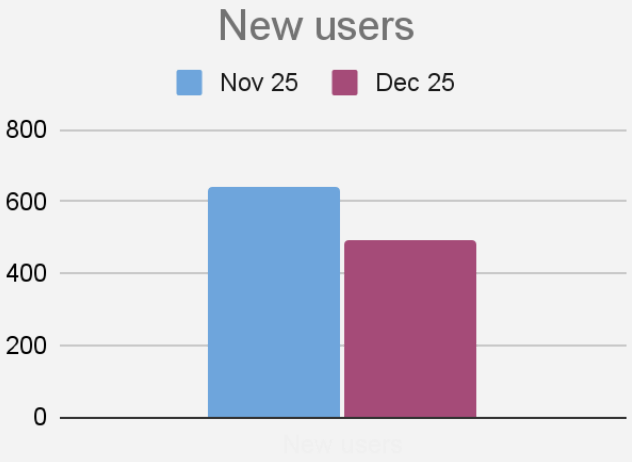
📌 **Notes** :

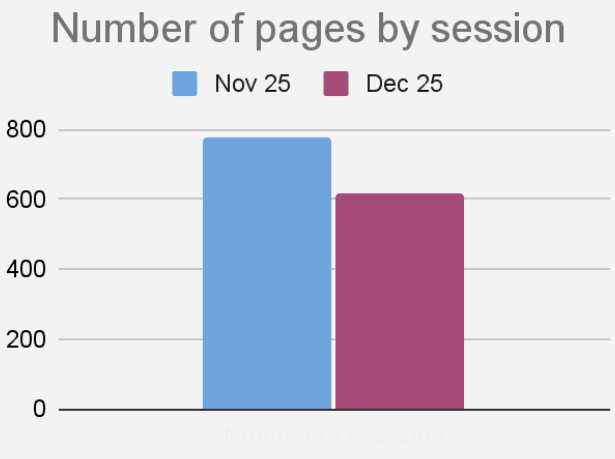
- **Organic traffic** decreased to 208 sessions (-20% vs November).
- **Direct traffic** also declined (-21%).
- **Organic social** appeared for the first time (**18 sessions**), probably due to the introduction of LinkedIn activities.
- **Referral traffic** decreased (8 vs 16).
- **Paid search** almost disappeared (only 1 remaining).
- **Unassigned sessions** continued to fall (1 vs 10).

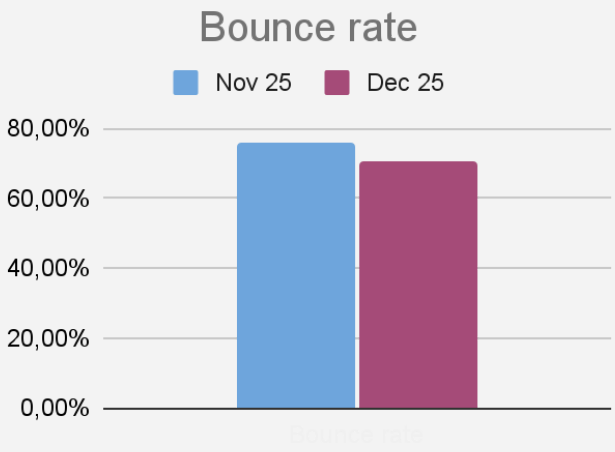
👉 **Key takeaway**: December shows a general decline in traffic across most channels, mainly organic and direct, likely driven by seasonality. Acquisition remains heavily dependent on organic and direct traffic, while referral and paid channels contribute marginally. The appearance of organic social is positive and deserves to be pursued.

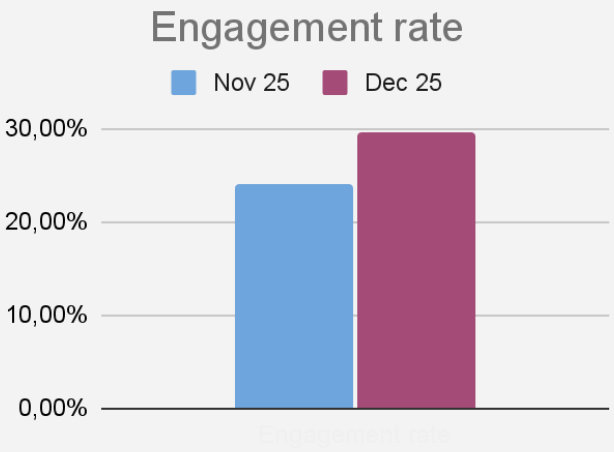
User behavior

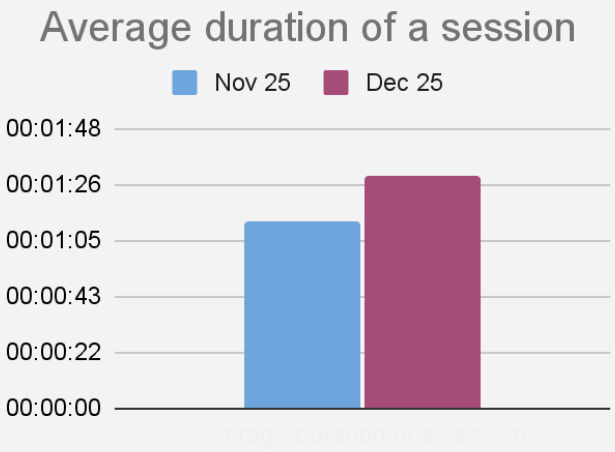












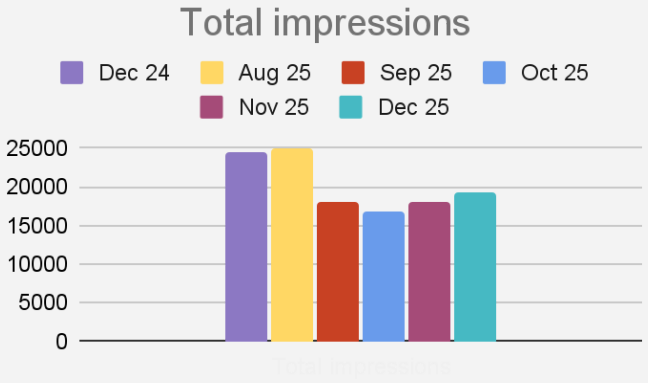
KPI	Dec 25	Nov 25	Oct 25	Sep 25	Aug 25	Dec 24
Total number of users (unique)	**517**	657 (-21%)	686 (-25%)	420 (23%)	432 (20%)	N/A (N/A)
New users	**493**	641 (-23%)	608 (-19%)	341 (45%)	356 (38%)	N/A (N/A)
Number of sessions	**617**	777 (-21%)	764 (-19%)	544 (13%)	545 (13%)	N/A (N/A)
Number of pages by session	**1,16**	1,16 (0%)	1,11 (5%)	1,26 (-8%)	1,20 (-3%)	N/A (N/A)
Bounce rate	**70,50%**	75,93% (-5,43)	71,90% (-1,40)	61,76% (8,74)	64,59% (5,91)	N/A (N/A)
Engagement rate	**29,50%**	24,05% (5,45)	28,10% (1,40)	38,24% (-8,74)	35,41% (-5,91)	N/A (N/A)
Average duration of a session	**0:01:30**	0:01:12 (0:00:18)	0:01:04 (0:00:26)	0:01:50 (-0:00:20)	0:01:57 (-0:00:27)	N/A (N/A)

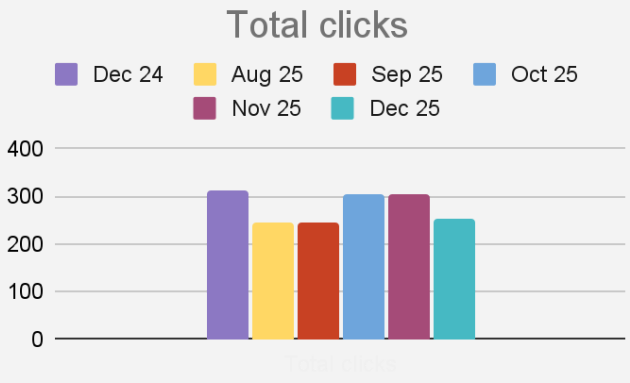
📌 **Notes** :

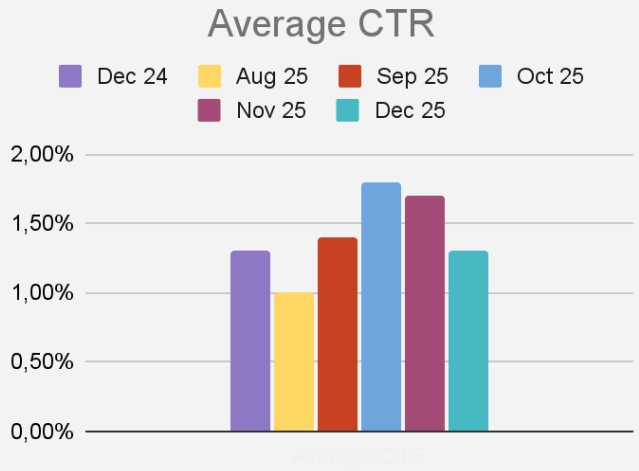
- **Users and sessions** dropped this month.
- **Pages per session** remained stable at 1.16.
- **Bounce/engagement rate and session duration** improved noticeably.

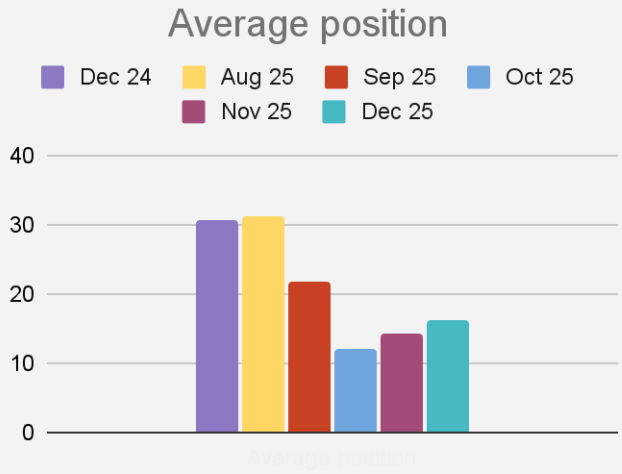
👉 **Key takeaway**: While traffic volume declined sharply in December, engagement quality improved. Users bounce less, stay longer, and engage more with the content. This suggests that the remaining traffic is more qualified, even though overall visibility and acquisition slowed due to the end of year festive period.

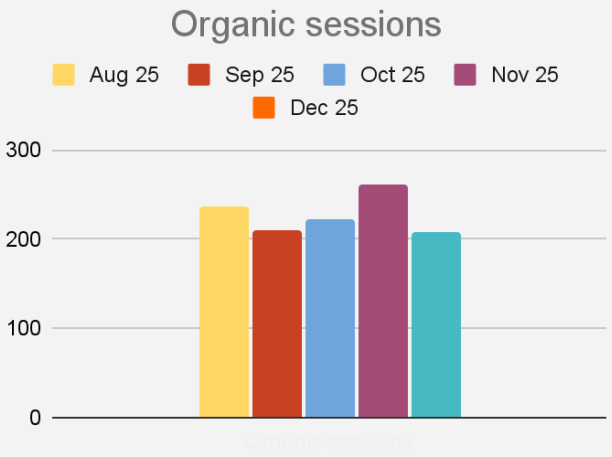
SEO Performance Summary

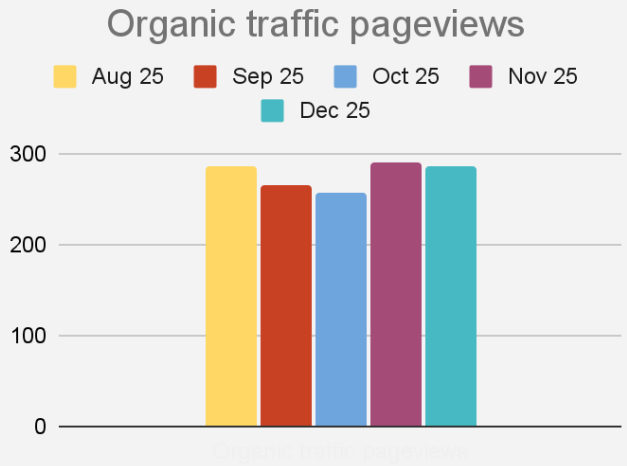












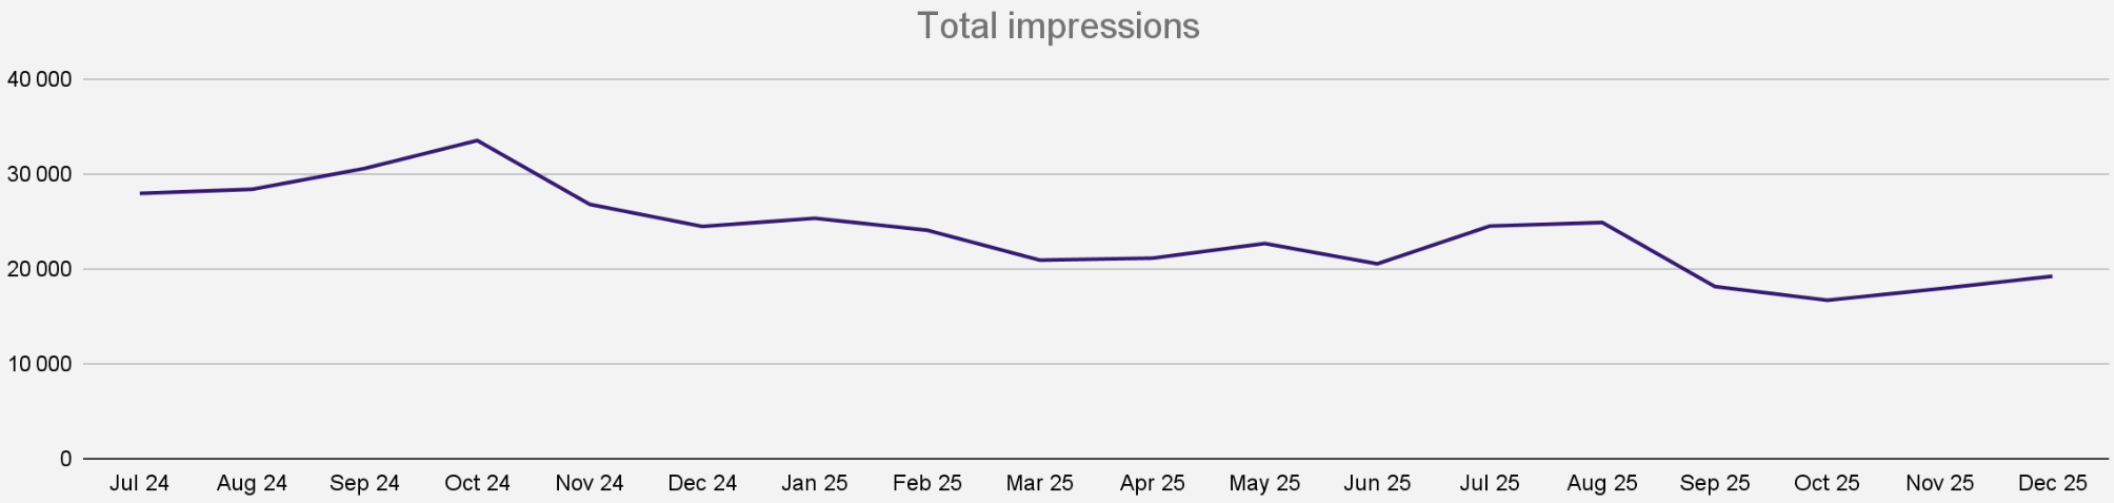
KPI	Dec 25	Nov 25	Oct 25	Sep 25	Aug 25	Dec 24
Total impressions	**19 222**	17 910 (7%)	16 692 (15%)	18 135 (6%)	24 888 (-23%)	24 476 (-21%)
Total clicks	**251**	305 (-18%)	304 (-17%)	246 (2%)	246 (2%)	312 (-20%)
Average CTR	**1,30%**	1,70% (-24%)	1,80% (-28%)	1,40% (-7%)	1,00% (30%)	1,30% (0%)
Average position	**16**	14 (14%)	12 (34%)	22 (-26%)	31 (-48%)	31 (-47%)
Organic sessions	**208**	261 (-20%)	223 (-7%)	209 (0%)	237 (-12%)	N/A (N/A)
Organic traffic pageviews	**287**	291 (-1%)	257 (12%)	265 (8%)	286 (0%)	N/A (N/A)

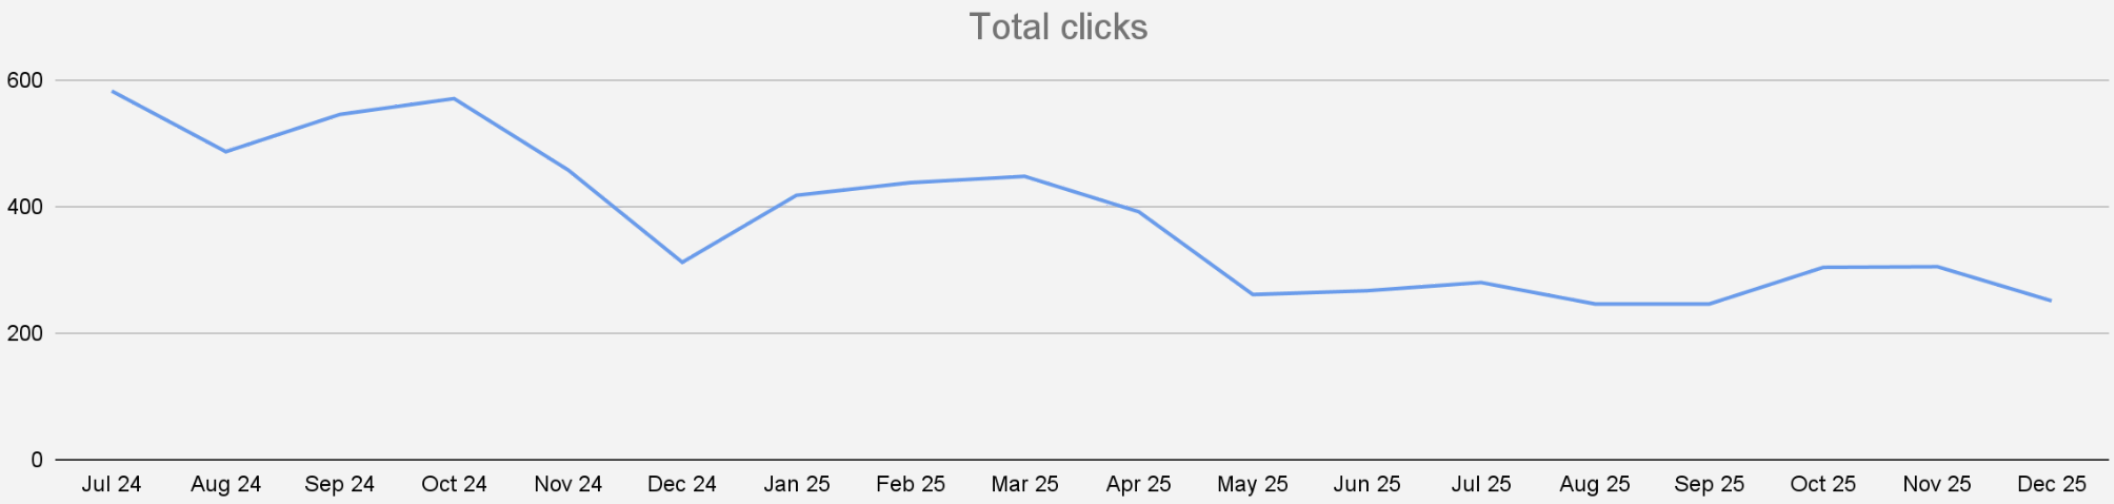
📌 **Notes** :

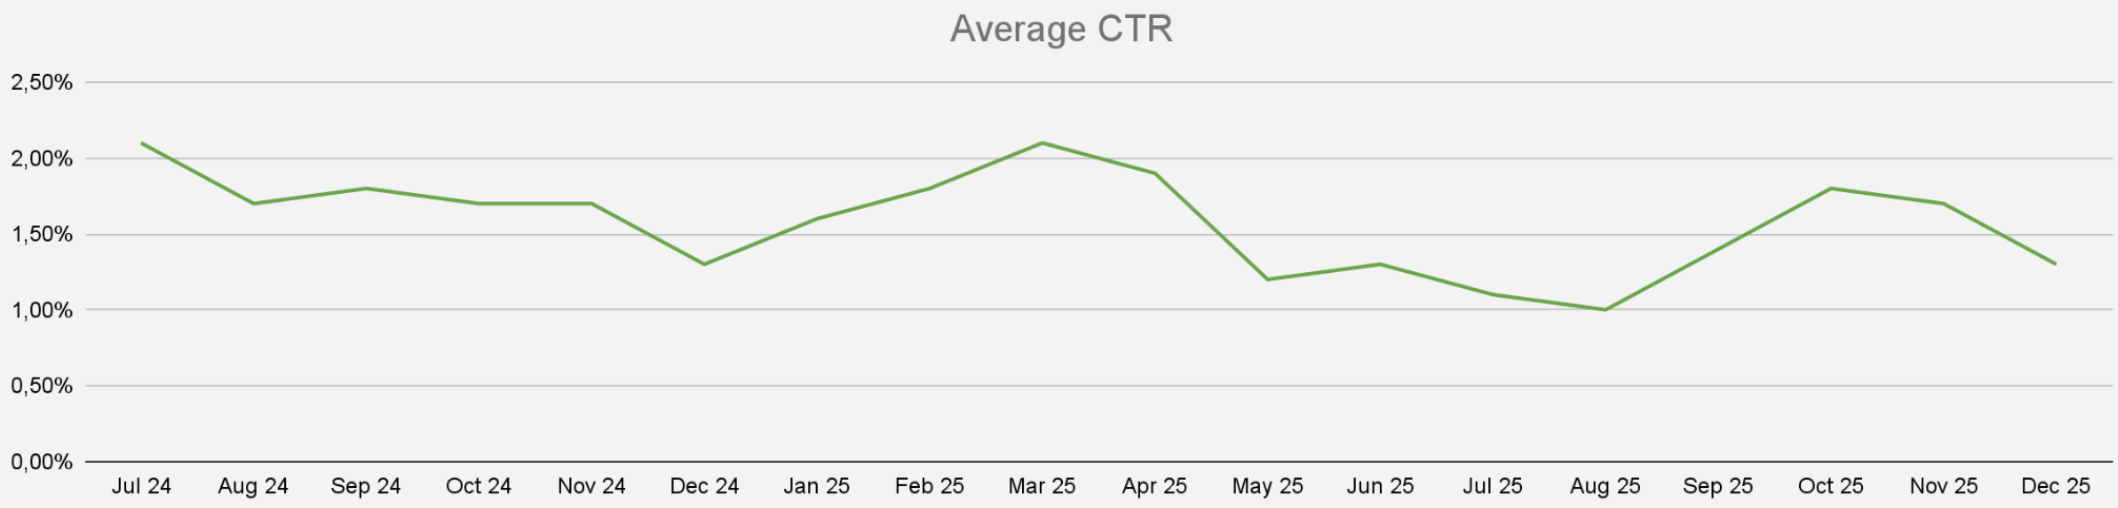
- **Impressions** increased to 19 222 (+7% vs November).
- **Clicks and CTR** dropped significantly.
- **Average position** decreased slightly (-2 positions).
- **Organic sessions** declined from 261 to 208.
- **Pageviews** remained stable.

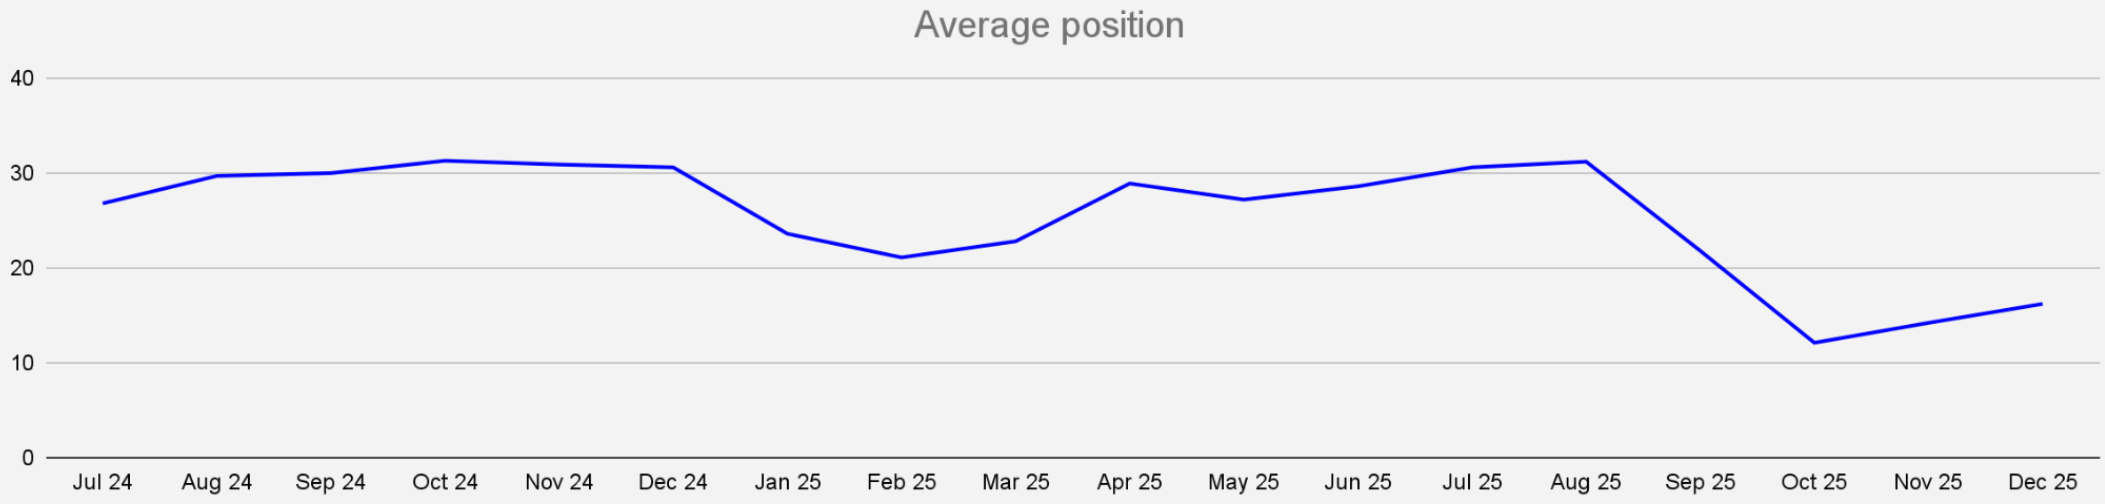
👉 **Key takeaway:** Visibility continued to grow, but traffic efficiency declined. The site appeared more often in SERPs but attracted fewer clicks, due to a lower CTR and slightly weaker rankings. This confirms that click appeal and keyword relevance, rather than visibility alone, are the main challenges this month.

SEO Performance Evolution









📌 **Notes** :

- The long-term trends for **impressions** and **clicks** remain positive, despite short-term fluctuations
- The **CTR** fluctuates, but the smoothed trend remains stable.

- **Average position** remains far better than in early 2025.

👉 **Key takeaway:** December represents a temporary slowdown rather than a reversal. Seasonal effects explain most of the decline.

This analysis will provide a clearer understanding of the cause–effect relationships driving the site's SEO performance: whether the observed trends result from website changes or from Google algorithm updates.

ℹ️ Here are the major Google algorithm updates from July 2024:

- August 2024: high-quality content update (As part of the August Core Update, Google took a big focus on high-quality content. The algorithm update focused on delivering content that's actually helpful to users, rather than content that's built to rank well in search results. Ultimately, this new update focuses on helping searchers see more content that's genuinely helpful and relevant to them).
- November 2024: site reputation abuse (This update tackled parasite SEO — a tactic websites use to help them manipulate search rankings through third-party content on well-established domains).
- From Mars 2025: ongoing core updates (Google continues to roll out ongoing updates in 2025, focusing on improving search rankings and performance for searchers).

Top performing organic queries

Top 10 keywords driving clicks

Most frequent queries driving clicks	Clicks	Impressions	CTR	Position
gross leak test	7	321	2,2 %	9,3
relative humidity to ppm	6	21	28,6 %	2,1
orslabs	3	101	3 %	7,6
ors calculator	3	60	5 %	6,3
ors lab	3	19	15,8 %	2,6
oneida research	1	47	2,1 %	5,5
gross leak testing	1	46	2,2 %	1,8
gross leak test procedure	1	39	2,6 %	1,5
gross leaks	1	7	14,3 %	2,4
hermeticity	0	619	0 %	5,7

Top 10 keywords driving impressions

Most frequent queries driving impressions	Clicks	Impressions	CTR	Position
hermeticity	0	619	0 %	5,7
gross leak test	7	321	2,2 %	9,3
gross leak bubble tester	0	259	0 %	8,1
oneida research services	0	239	0 %	5,8
hermetic package analysis	0	149	0 %	27,1
ors labs	0	141	0 %	3,6
leak test	0	129	0 %	56,9
relative humidity calculator	0	125	0 %	29,2
helium leak detection	0	102	0 %	34,7
orslabs	3	101	3 %	7,6

📌 **Notes** :

- Branded queries remain strong drivers of clicks.
- “Gross leak test” remains the top non-branded keyword (7 clicks).
- “Relative humidity to ppm” performs exceptionally well (28.6% CTR: only 21 impressions generated 6 clicks).
- Hermeticity again generated high impressions (619) with zero clicks, confirming broad but non-specific intent.
- “Relative humidity to ppm” still performs well with a 10.5% CTR, confirming strong match to user intent.
- Several high-impression keywords (gross leak bubble tester, helium leak detection, relative humidity calculator) still show 0% CTR.

👉 **Key takeaway:** December confirms a clear contrast between highly targeted keywords, which convert very well, and broad technical terms, which generate visibility but little engagement. Broad queries such as hermeticity should be used as topic indicators, while optimization efforts should focus on more precise, intent-driven keywords.

Most visited pages via natural referencing

Most popular pages	Clicks			Impressions			CTR			Position		
	Dec 25	Nov 25	Difference	Dec 25	Nov 25	Difference	Dec 25	Nov 25	Difference	Dec 25	Nov 25	Difference

/wp-content/uploads/2019/03/ORS-SOP_MEL1053.pdf	7	4	**3**	39	50	**-11**	17,9 %	8 %	**9,9 %**	5,1	4,4	**0,6**
/en/hermeticity/hshld-high-sensitivity-helium-leak-detection/	3	4	**-1**	1 501	1 026	**475**	0,2 %	0,4 %	**-0,2 %**	28,1	21,1	**7**
/en/	3	8	**-5**	836	865	**-29**	0,4 %	0,9 %	**-0,6 %**	4,6	4,8	**-0,2**
/tests-dhermeticite/hshld/	3	1	**2**	491	478	**13**	0,6 %	0,2 %	**0,4 %**	35,5	35,3	**0,2**
/tests-dhermeticite/grosses-fuites/	3	1	**2**	293	247	**46**	1 %	0,4 %	**0,6 %**	18,8	20,6	**-1,8**

📌 **Notes** :

- **Moisture Calculator** remained the top page.
- **Conversions d'humidite** saw a sharp drop in clicks (-47) and visibility.
- **Gross leak test** gained clicks and impressions but still shows weak CTR.
- **High-sensitivity helium leak detection page** gained strong visibility (+475 impressions) despite a decline in position.
- The **homepage** (french version) gained clicks but lost rankings and impressions.

👉 **Key takeaway:** Tools remain central to organic traffic, but ranking losses and declining CTR impacted performance. High-visibility technical pages continue to struggle at the SERP level, reinforcing the need for metadata optimization and clearer positioning.

Conclusion

December 2025 marks a clear slowdown in traffic and acquisition, largely driven by seasonality (reduced demand). Organic and direct traffic declined significantly, while referral and paid channels remained marginal. Despite this, tracking quality improved and a promising signal from organic social appeared.

From an SEO perspective, visibility continued to grow, with more impressions, but performance efficiency declined. Lower CTR and slightly weaker rankings resulted in fewer clicks and organic sessions. This confirms that for some pages, the current challenge is the conversion at the SERP level.

On the positive side, engagement metrics improved noticeably: bounce rate decreased, session duration increased, and engagement rate rose. This indicates that the traffic reaching the site is more qualified, even if less numerous.

Keyword and page analyses show a clear pattern: intent-driven content performs very well, confirming the relevance of ORS Labs' expertise. Broader technical topics generate strong visibility and represent clear opportunities for improvement with better positioning and SERP optimization. Tools remain the strongest SEO assets and a solid foundation for future growth.

👉 **Strategic priorities** for the coming months:

- **Improve CTR**: optimize titles and meta descriptions on high-impression pages.
- **Strengthen key pages**: update and enrich strategic tools and technical pages.

👉 **Actions**:

- Publish the proposed content (sent in December) on /outils/conversions-dhumidite/ page (french and english versions).
- Rework the structure of the /tests-dhermeticite/hshld/ page to improve its average position (35) and increase its CTR (0.6%).

Glossary

SEO (Search Engine Optimization): Set of techniques aimed at improving a website's visibility in search engine results.

SERP (Search Engine Results Page): The page displayed by search engines (Google, Bing, etc.) showing results in response to a query.

Internal linking: The organization of a website's internal links that connect different pages together to improve navigation and search engine indexing.

Crawl: The process by which search engine bots browse and analyze a website's pages to decide whether or not to add them to their index.

Indexable: Describes a page that can be added to a search engine's index and therefore appears in search results. A non-indexable page will not be shown in the SERP.

Backlinks: Inbound links coming from other websites and pointing to a given site.

Impressions: The number of times a link appears in search engine results, regardless of whether it is clicked or not.

CTR (Click-Through Rate): The percentage of users who clicked on a link compared to the total number of impressions of that link in the SERP.

PAA (People Also Ask): A section in Google results displaying frequently asked questions related to the query, with answers from various websites.

Canonical URL: The canonical URL indicates which version of a page should be considered as the main one by search engines. It helps prevent duplicate content issues when multiple pages have very similar content.
