SEO monitoring - April 2026

<https://www.orslabs.fr/>

This report provides an overview of the SEO performance of the website orslabs.fr for the period **from April 1 to April 30, 2026**.

Note: the figures for the current month are compared with those for the previous months, but also with those for the previous year over the same period (if available).

No SEO updates to the site were made in March 2026.

LinkedIn posts were published in April, but no newsletter was sent.

Traffic source

Source	Apr 26	Mar 26	Feb 26	Jan 26	Dec 25	Apr 25
Organic Search	191	206	147	215	208	N/A
Direct	277	264	276	484	380	N/A
Organic Social	13	12	10	8	18	N/A
Referral	7	8	3	5	8	N/A
Paid search	72	20	3	8	1	N/A
Unassigned	1	2	0	0	2	N/A

Organic clicks vs. all clicks over the month (per day)

📌 Notes :

- **Organic search** slightly declined to 191 sessions (-7% vs March), but remained broadly stable compared with previous months.
- **Direct traffic** increased slightly to 277 sessions (+5%).
- **Organic social** remained stable at 13 sessions.
- **Referral traffic** remained stable at 7 sessions.
- **Paid search** increased significantly to 72 sessions.

👉 **Key takeaway:** April shows overall stability across the main acquisition channels, with organic and direct traffic remaining the site's primary traffic sources. The strong increase in paid search suggests active campaigns this month.

User behavior

Total number of users (unique)

New users

Number of pages by session

Bounce rate

Engagement rate

Average duration of a session

KPI	Apr 26	Mar 26	Feb 26	Jan 26	Dec 25	Apr 25
Total number of users (unique)	407	393 (4%)	329 (24%)	568 (-28%)	517 (-21%)	N/A (N/A)
New users	377	364 (4%)	300 (26%)	544 (-31%)	493 (-24%)	N/A (N/A)
Number of sessions	562	512 (10%)	439 (28%)	721 (-22%)	617 (-9%)	N/A (N/A)
Number of pages by session	1,4	1,28 (9%)	1,21 (16%)	1,22 (15%)	1,16 (21%)	N/A (N/A)
Bounce rate	64,23%	69,34% (-5,11)	71,07% (-6,84)	75,17% (-10,94)	70,50% (-6,27)	N/A (N/A)
Engagement rate	35,77%	30,66% (5,11)	28,93% (6,84)	24,83% (10,94)	29,50% (6,27)	N/A (N/A)
Average duration of a session	0:03:14	0:01:43 (0:01:31)	0:01:44 (0:01:30)	0:01:34 (0:01:40)	0:01:30 (0:01:44)	N/A (N/A)

Notes :

- **Users (total and new)** increased slightly (+4%).
- **Sessions** increased to 562 (+10%).
- **Pages per session** improved further to 1.4, its best level in the reporting period.
- **Engagement rate** increased strongly to 35.77%, the best performance in recent months.
- **Session duration** almost doubled to 3:14, indicating significantly deeper user interaction.*

*The pages that retained the most the users were:

- /en/tools/moisture-calculator/ (7:31)
- /analyse-de-gaz/cylindre/ (5:13)
- /?AdGroup=EnviroMechTesting&ppc_keyword=environmental%20test%20chambers (5:07)
- /sur/les-differents-sites/ (5:01)
- /outils/evolution-du-contenu-gazeux/ (4:24)
- /tests-dhermeticite/hshld/ (4:01)
- /analyse-de-gaz/degazage-de-materiaux/ (3:04)
- /en/about/ (2:54)

- [/en/hermeticity/gross-leak-test/](#) (2:50)
- [/en/gas-analysis/iva/](#) (2:29)
- [/outils/conversions-dhumidite/](#) (2:22)
- [/outils/evolution-du-contenu-gazeux/?lang=fr](#) (2:15)

👉 **Key takeaway:** April marks a significant improvement in engagement quality. Users are not only visiting the site more frequently but also interacting more deeply with the content, reinforcing the idea that ORS Labs continues to attract highly qualified technical audiences.

SEO Performance Summary

Total impressions

Total clicks

Average CTR

Average position

Organic sessions

Organic traffic pageviews

KPI	Apr 26	Mar 26	Feb 26	Jan 26	Dec 25	Apr 25
Total impressions	17 396	16 946 (3%)	21 779 (-20%)	20 334 (-14%)	19 222 (-9%)	21 130 (-18%)
Total clicks	211	250 (-16%)	227 (-7%)	250 (-16%)	251 (-16%)	392 (-46%)
Average CTR	1,20%	1,50% (-20%)	1,00% (20%)	1,20% (0%)	1,30% (-8%)	1,90% (-37%)
Average position	10	10 (-3%)	13 (-25%)	15 (-37%)	16 (-41%)	29 (-67%)
Organic sessions	128	206 (-38%)	147 (-13%)	215 (-40%)	208 (-38%)	N/A (N/A)
Organic traffic pageviews	251	250 (0%)	199 (26%)	264 (-5%)	287 (-13%)	N/A (N/A)

Notes :

- **Impressions** increased slightly to 17,396 (+3%).
- **Clicks** decreased to 211 (-16%).
- **CTR** declined to 1.2% (vs 1.5% in March).
- **Average position** remained stable around 10.
- **Organic sessions** decreased to 128 (-38%).
- **Organic pageviews** remained stable at 251.

 **Key takeaway:** SEO visibility and rankings remained stable in April, but the decrease in clicks and organic sessions suggests weaker conversion from SERP visibility into traffic. This reinforces the importance of improving CTR and click attractiveness on high-impression pages.

SEO Performance Evolution

👉 **Key takeaway:** The trends have remained stable over the past few months. The average position continues to improve slowly.

This analysis will provide a clearer understanding of the cause–effect relationships driving the site’s SEO performance: whether the observed trends result from website changes or from Google algorithm updates.

 Here are the [major Google algorithm updates](#) from July 2024:

- August 2024: high-quality content update (As part of the August Core Update, Google took a big focus on high-quality content. The algorithm update focused on delivering content that’s actually helpful to users, rather than content that’s built to rank well in search results. Ultimately, this new update focuses on helping searchers see more content that’s genuinely helpful and relevant to them).
- November 2024: site reputation abuse (This update tackled parasite SEO — a tactic websites use to help them manipulate search rankings through third-party content on well-established domains).
- From March 2025: ongoing core updates (Google continues to roll out ongoing updates in 2025, focusing on improving search rankings and performance for searchers).

Top performing organic queries

Top 10 keywords driving clicks

Most frequent queries driving clicks	Clicks	Impressions	CTR	Position
hermeticity of electronic packages	4	13	30,8 %	1,3
orslabs	3	123	2,4 %	10
oneida research services	2	257	0,8 %	7
oneida recherche services	2	13	15,4 %	2
ors lab	2	13	15,4 %	9,8
gross leak test	1	221	0,5 %	4,5
moisture calculator	1	78	1,3 %	7,2
package gas analysis	1	33	3 %	16,9
moisture content of air calculator	1	25	4 %	6,5
moisture content in air calculator	1	22	4,5 %	8,5

Top 10 keywords driving impressions

Most frequent queries driving impressions	Clicks	Impressions	CTR	Position
hermeticity	0	701	0 %	5,3
oneida research services	2	257	0,8 %	7
gross leak test	1	221	0,5 %	4,5
ors labs	0	168	0 %	10,7
gross leak bubble tester	0	157	0 %	8,2
what is the relative humidity of air that has one-third of its maximum possible amount of moisture? a 50 % b 25 % c 33 % d 67 %	0	143	0 %	7,8
orslabs	3	123	2,4 %	10
4.25e-3 "6.02e-3"	0	123	0 %	4,5
gross leak	0	91	0 %	2,6

iva ors	0	79	0 %	12,4
---------	---	----	-----	------

 **Notes** : Search performance continues to rely on a mix of branded searches and highly targeted technical queries.

A very specific technical query “hermeticity of electronic packages” achieved strong CTR and ranking, reinforcing the value of intent-driven, problem-solving content in attracting qualified users.

 **Key takeaway:** SEO performance continues to be driven by specialized technical searches rather than broad generic terms. The strongest opportunities remain in expanding highly targeted engineering and calculation-related content that aligns closely with user intent.

Most visited pages via natural referencing

Most popular pages	Clicks			Impressions			CTR			Position		
	Apr 26	Mar 26	Difference	Apr 26	Mar 26	Difference	Apr 26	Mar 26	Difference	Apr 26	Mar 26	Difference

/pdf/ORS France - Interpretation of RGA Data.pdf	4	3	1	254	255	-1	1,6 %	1,2 %	0,4 %	8,2	7,9	0,3
/en/	3	2	1	575	763	-188	0,5 %	0,3 %	0,3 %	7,4	5,6	1,9
/pdf/ORS France - Cylinder Instructions Of Use.pdf	3	1	2	108	123	-15	2,8 %	0,8 %	2 %	11,9	6,2	5,7
/outils/evolution-du-contenu-gazeux/	3	3	0	86	94	-8	3,5 %	3,2 %	0,3 %	8,5	7,3	1,2

Notes :

- The **Moisture Calculator** remained the strongest organic traffic driver with 76 clicks and continued growth in impressions.
- The **Humidity Conversion Tool** experienced a decrease in clicks but maintained strong visibility and significantly improved ranking (position 9 vs 14.7 previously).
- Several **technical PDF documents** maintained good visibility and engagement, particularly Hermeticity of Electronic Packages and Hydrogen Desorption From Packaging Alloy.

👉 **Key takeaway:** Tool pages remain the site's strongest SEO assets, while strategic service pages continue to build ranking momentum. Technical PDFs also continue to demonstrate their value as authority-building content and remain strong candidates for future optimized landing pages.

Conclusion

April confirms the overall stabilization of the site's SEO performance following the fluctuations observed earlier in the year. Traffic levels remained relatively consistent across the main acquisition channels, while direct traffic and paid search both increased during the month.

The most notable evolution in April concerns engagement quality. Nearly all engagement indicators improved significantly, including engagement rate, pages per session, and especially average session duration. These results suggest that ORS Labs is continuing to attract highly qualified technical audiences who interact more deeply with the content.

From an SEO perspective, rankings remained stable at one of the best levels observed in the reporting period, and impressions continued to grow slightly. However, clicks and organic sessions declined compared with March, showing that improved visibility alone does not systematically translate into traffic gains. This highlights the growing importance of CTR optimization and SERP attractiveness as the site enters a more mature SEO phase.

Technical and tool-based content continues to drive the strongest performance. The Moisture Calculator and Humidity Conversion Tool remain key acquisition assets, while strategic service pages such as Gross Leak Test continue to strengthen their ranking foundations.

Technical PDF documents also remain valuable authority assets. Their continued visibility reinforces the strategic opportunity to transform the most relevant PDFs into optimized HTML landing pages capable of improving internal linking, strengthening topical authority, and generating more qualified conversion pathways.

👉 **Strategic priorities** for the coming months:

- **Improve CTR** on high-impression technical pages.
- **Strengthen internal linking** to increase user depth and session value.
- **Continue optimizing** high-performing tool pages.
- **Leverage technical PDF content** by transforming key documents into optimized landing pages integrated within the site architecture.

👉 **Actions:**

- Publish the proposed content (sent in December) on /outils/conversions-dhumidite/ page (french and english versions) — Status: paused, waiting approval from ORS Labs.
- Rework content of the /tests-dhermeticite/hshld/ page based on the new proposed structure — Status: paused, waiting structure approval from ORS Labs.
- Identify high-visibility PDF documents and prioritize their conversion into structured HTML pages to enhance SEO impact and lead generation potential: we could start with Variable_leak_rate_phenomena_in_glass_to_metal_seals.pdf if you agree with the proposition. — Status: paused, waiting approval from ORS Labs regarding the proposal.
- Publish to proposed meta data for Gross Leak Test page — Status: paused, waiting approval from ORS Labs.

Glossary

SEO (Search Engine Optimization): Set of techniques aimed at improving a website's visibility in search engine results.

SERP (Search Engine Results Page): The page displayed by search engines (Google, Bing, etc.) showing results in response to a query.

Internal linking: The organization of a website's internal links that connect different pages together to improve navigation and search engine indexing.

Crawl: The process by which search engine bots browse and analyze a website's pages to decide whether or not to add them to their index.

Indexable: Describes a page that can be added to a search engine's index and therefore appears in search results. A non-indexable page will not be shown in the SERP.

Backlinks: Inbound links coming from other websites and pointing to a given site.

Impressions: The number of times a link appears in search engine results, regardless of whether it is clicked or not.

CTR (Click-Through Rate): The percentage of users who clicked on a link compared to the total number of impressions of that link in the SERP.

PAA (People Also Ask): A section in Google results displaying frequently asked questions related to the query, with answers from various websites.

Canonical URL: The canonical URL indicates which version of a page should be considered as the main one by search engines. It helps prevent duplicate content issues when multiple pages have very similar content.
