SEO monitoring - January 2026

https://www.orslabs.fr/

This report provides an overview of the SEO performance of the website orslabs.fr for the period **from January 1 to January 31, 2026**.

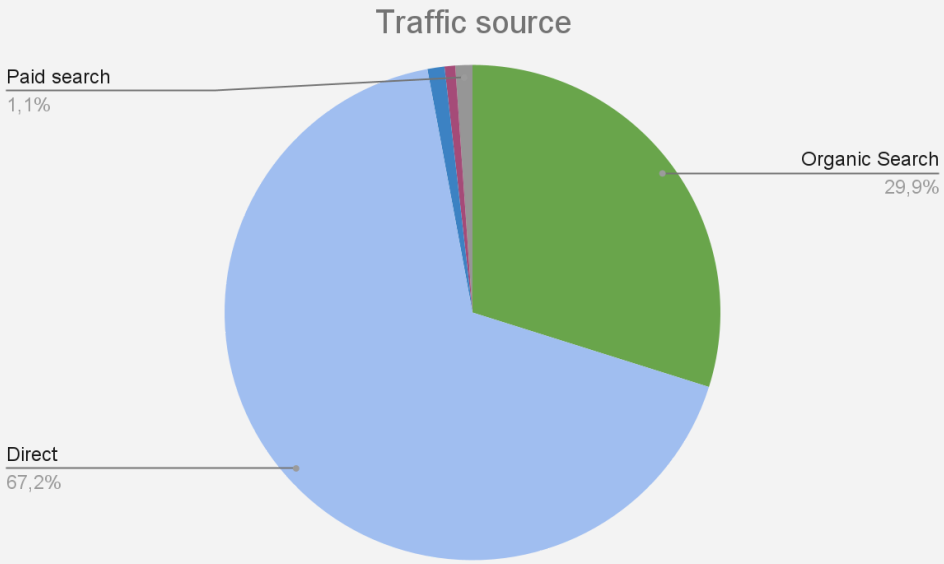
Note: the figures for the current month are compared with those for the previous months, but also with those for the previous year over the same period (if available).

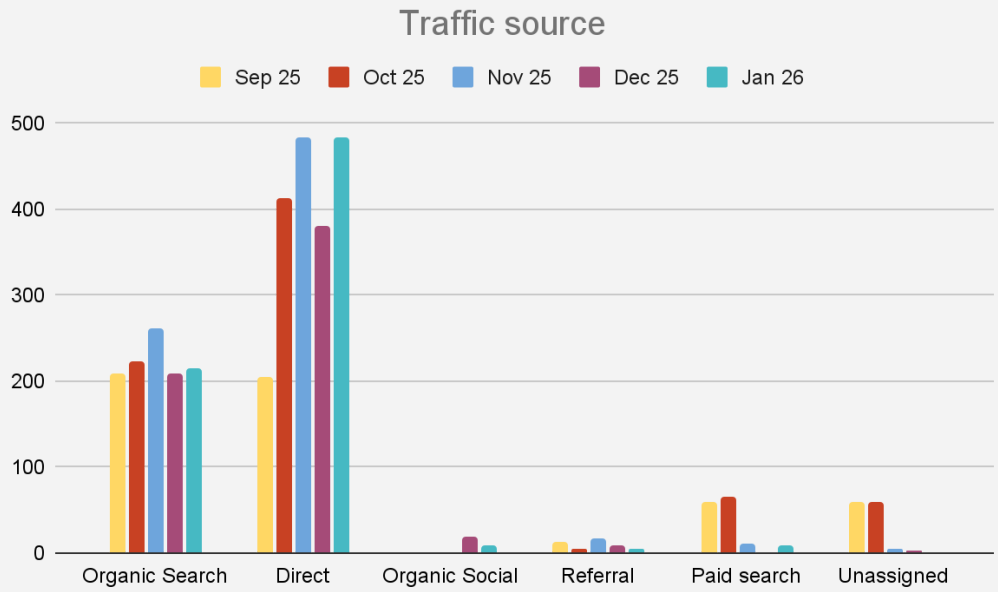
No SEO updates to the site were made in December 2025.

LinkedIn posts were published during January.

A new page “Organic Mass Spectrometry” has been put online (in both languages) at the end of January.

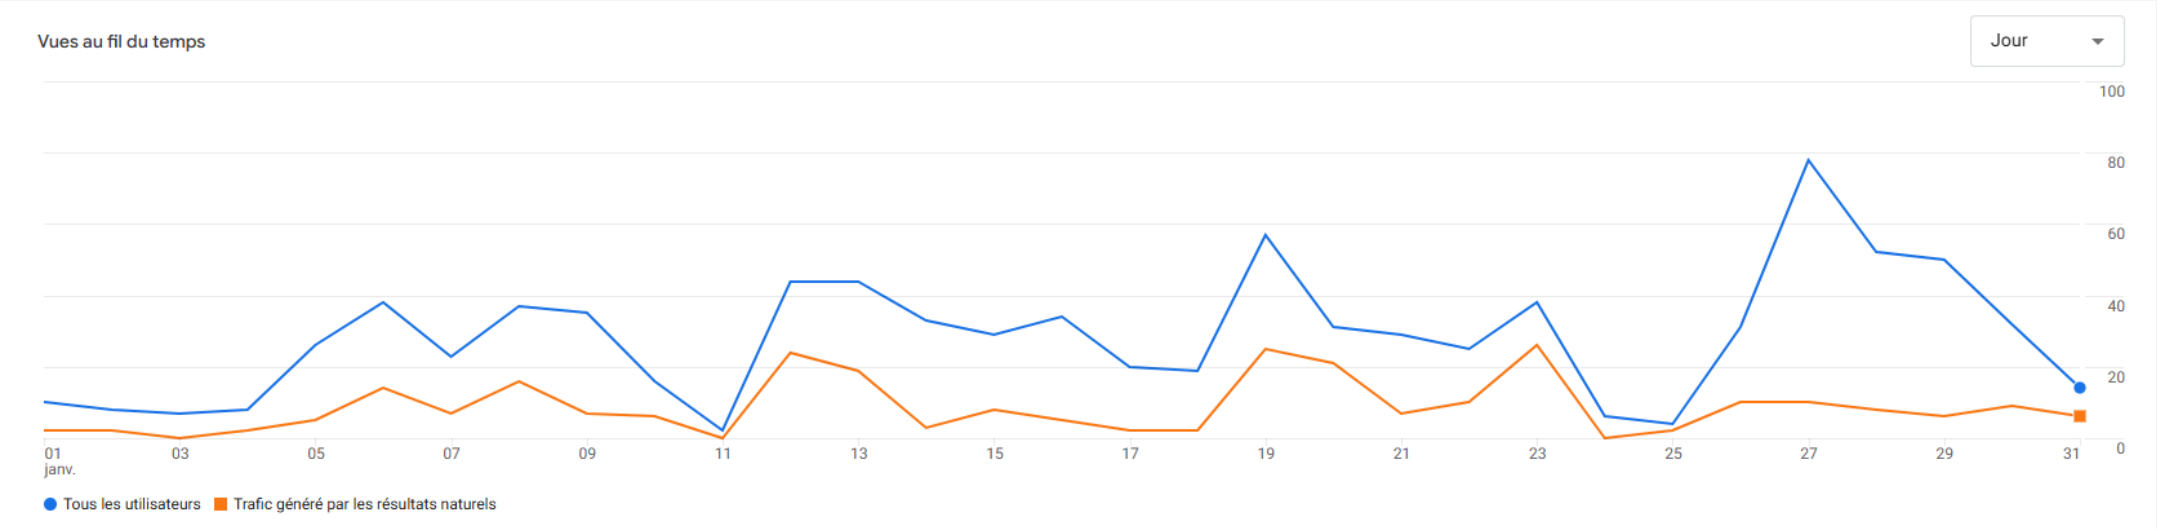
Traffic source





Source	Jan 26	Dec 25	Nov 25	Oct 25	Sep 25	Jan 25
Organic Search	**215**	208	261	223	209	N/A
Direct	**484**	380	484	412	204	N/A
Organic Social	**8**	18	0	0	0	N/A
Referral	**5**	8	16	5	12	N/A
Paid search	**8**	1	10	66	60	N/A
Unassigned	**0**	2	5	59	59	N/A

Organic clicks vs. all clicks over the month (per day)

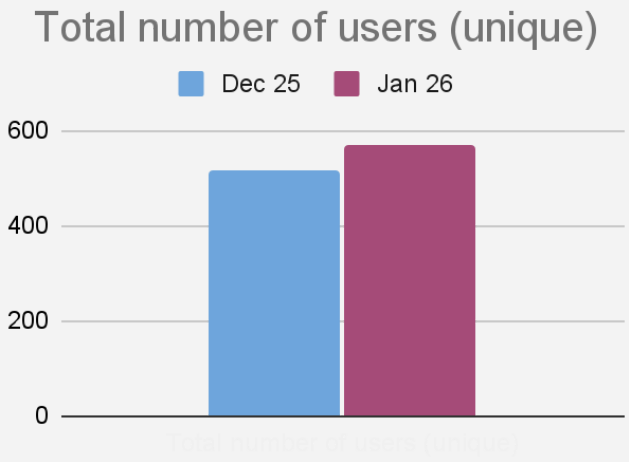


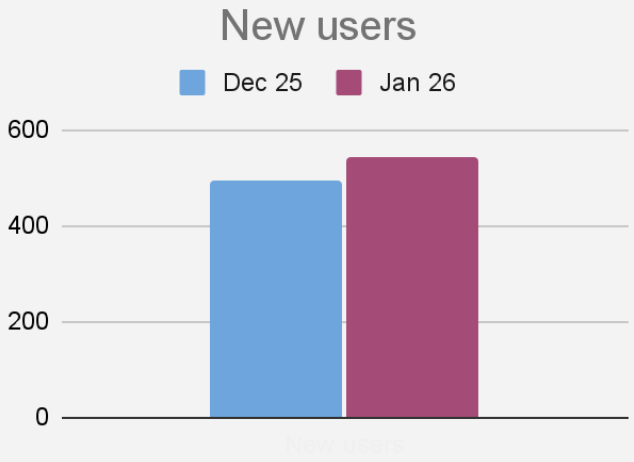
📌 **Notes** :

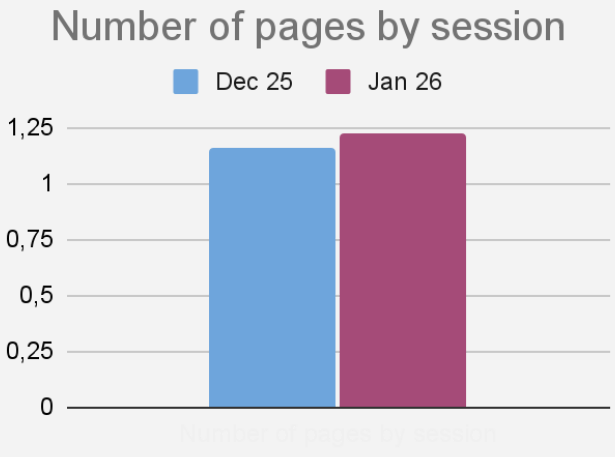
- **Organic traffic** slightly increased to 215 sessions (+3% vs December).
- **Direct traffic** rose significantly to 484 sessions (+27%), returning to November levels.
- **Organic social** decreased (8 vs 18), but LinkedIn activity continues to generate measurable traffic.
- **Referral traffic** declined slightly (5 vs 8).
- **Paid search** increased marginally (8 vs 1).

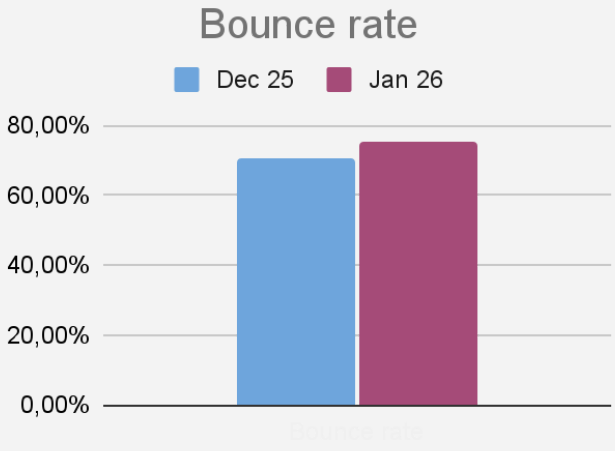
👉 **Key takeaway**: January shows a recovery in overall traffic, mainly driven by strong direct traffic and a slight rebound in organic sessions. Acquisition continues to rely primarily on organic and direct channels, while other sources remain secondary. The post-holiday period appears to have reactivated demand.

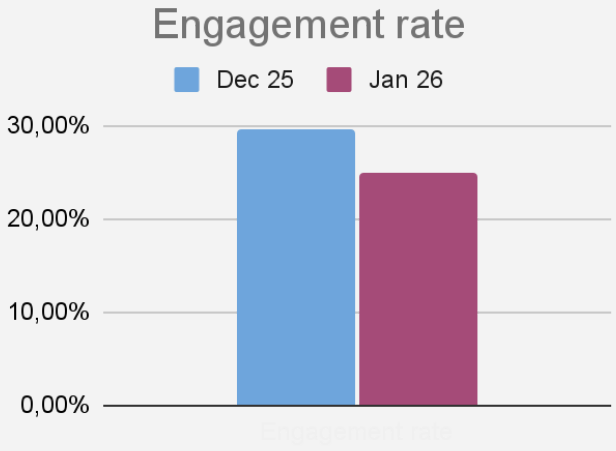
User behavior

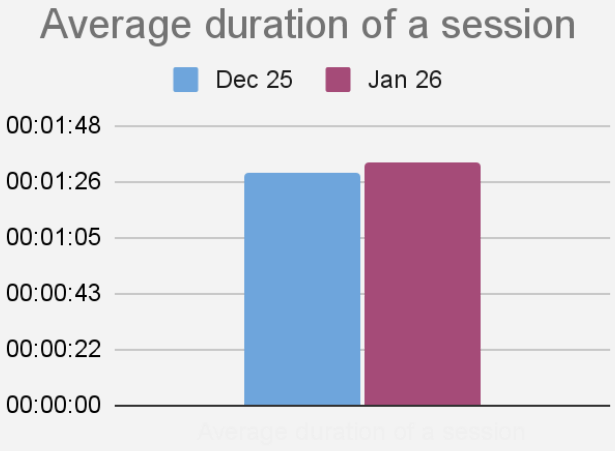












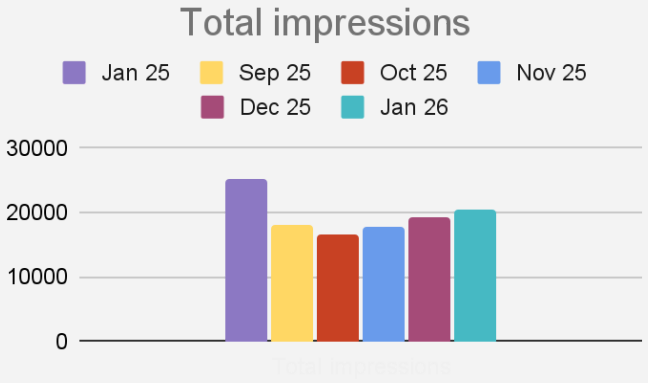
KPI	Jan 26	Dec 25	Nov 25	Oct 25	Sep 25	Jan 25
Total number of users (unique)	**568**	517 (10%)	657 (-21%)	686 (-25%)	420 (23%)	N/A (N/A)
New users	**544**	493 (10%)	641 (-23%)	608 (-19%)	341 (45%)	N/A (N/A)
Number of sessions	**721**	617 (17%)	777 (-21%)	764 (-19%)	544 (13%)	N/A (N/A)
Number of pages by session	**1,22**	1,16 (5%)	1,16 (0%)	1,11 (5%)	1,26 (-8%)	N/A (N/A)
Bounce rate	**75,17%**	70,50% (4,67)	75,93% (-5,43)	71,90% (-1,40)	61,76% (8,74)	N/A (N/A)
Engagement rate	**24,83%**	29,50% (-4,67)	24,05% (5,45)	28,10% (1,40)	38,24% (-8,74)	N/A (N/A)
Average duration of a session	**0:01:34**	0:01:30 (0:00:04)	0:01:12 (0:00:18)	0:01:04 (0:00:26)	0:01:50 (-0:00:20)	#VALUE!

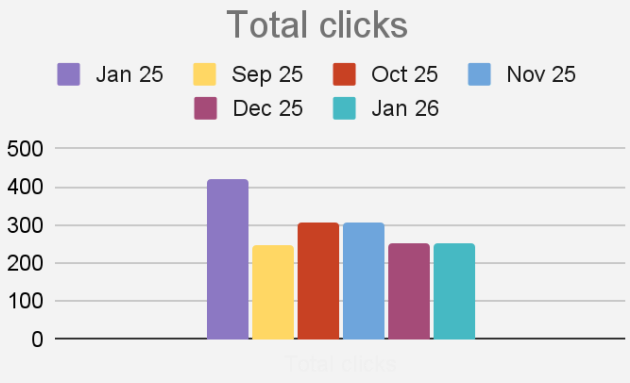
📌 **Notes** :

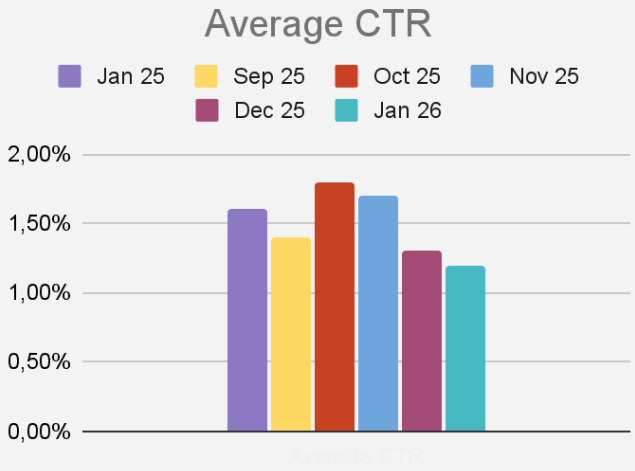
- **Users and sessions** increased this month (respectively +10% and +17%).
- **Pages per session** improved to 1.22.
- **Engagement rate** decreased to 24.83% (-4.67).
- **Session duration** slightly increased to 1:34.

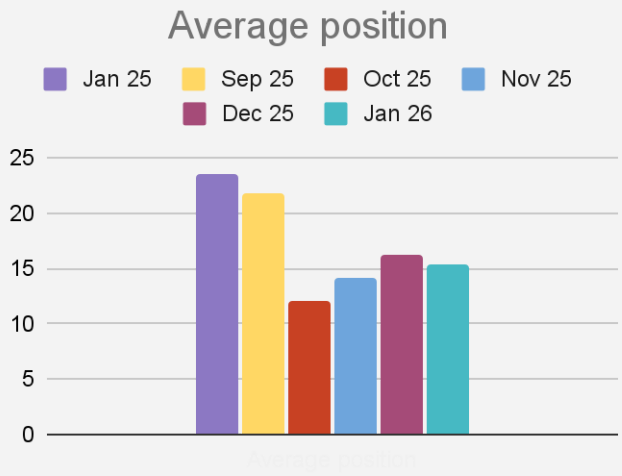
👉 **Key takeaway**: Traffic volume rebounded in January, with more users and sessions. However, engagement metrics slightly deteriorated compared to December, suggesting that increased traffic did not fully translate into deeper interaction. A broader observation emerges from the recent months: traffic quality appears more decisive than traffic quantity. Periods with lower overall volume tend to generate stronger engagement metrics, highlighting the importance of attracting highly intent-driven users. This pattern is frequently observed in technical B2B environments, where highly targeted and intent-driven traffic tends to generate stronger engagement than broader, higher-volume audiences.

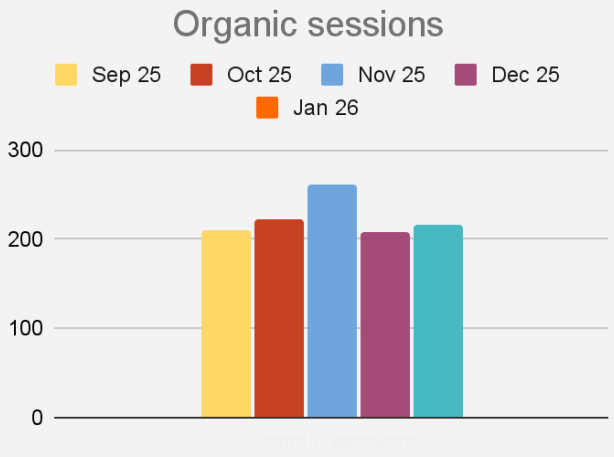
SEO Performance Summary

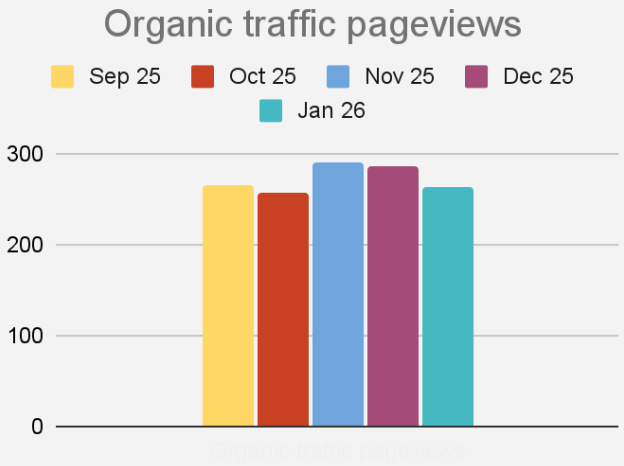












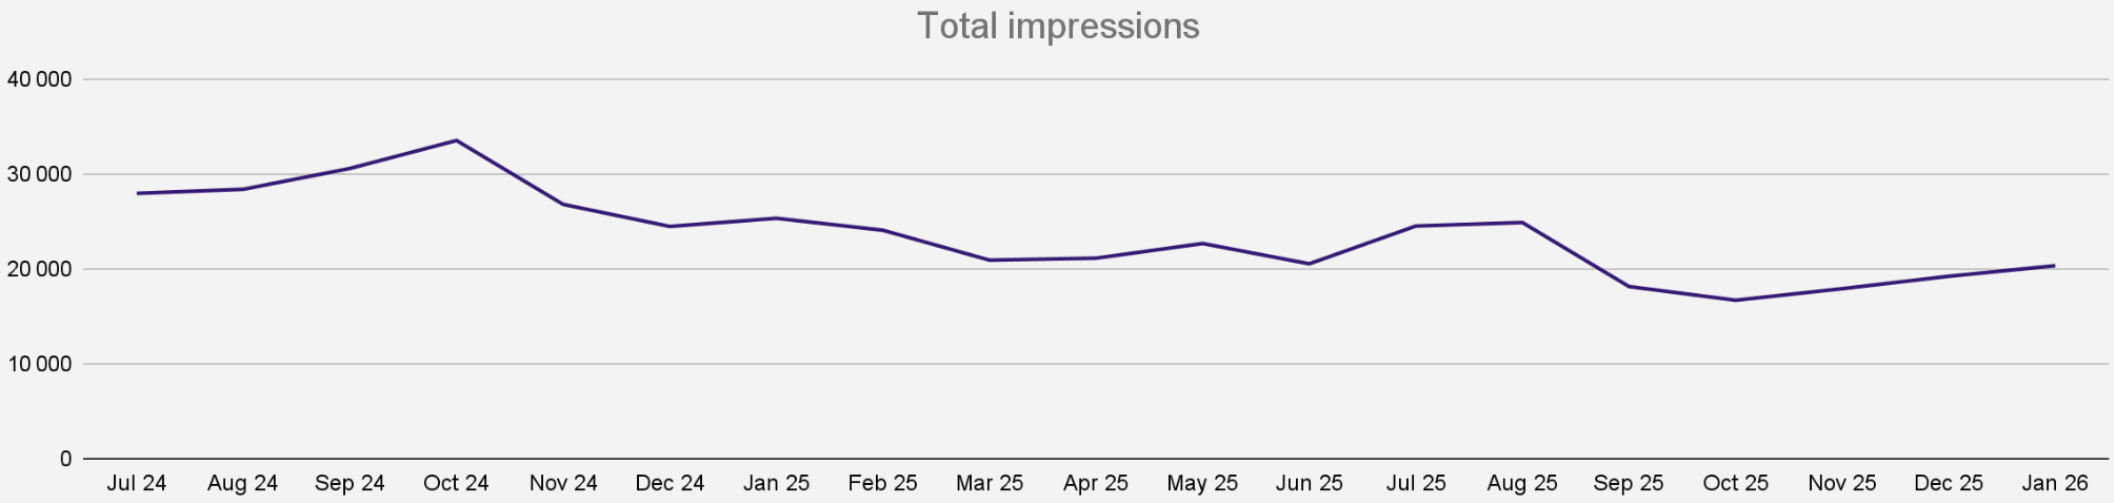
KPI	Jan 26	Dec 25	Nov 25	Oct 25	Sep 25	Jan 25
Total impressions	**20 334**	19 222 (6%)	17 910 (7%)	16 692 (15%)	18 135 (6%)	25 336 (-20%)
Total clicks	**250**	251 (0%)	305 (-18%)	304 (-17%)	246 (2%)	418 (-40%)
Average CTR	**1,20%**	1,30% (-8%)	1,70% (-24%)	1,80% (-28%)	1,40% (-7%)	1,60% (-25%)
Average position	**15**	16 (-6%)	14 (14%)	12 (34%)	22 (-26%)	24 (-35%)
Organic sessions	**215**	208 (3%)	261 (-20%)	223 (-7%)	209 (0%)	N/A (N/A)
Organic traffic pageviews	**264**	287 (-8%)	291 (-1%)	257 (12%)	265 (8%)	N/A (N/A)

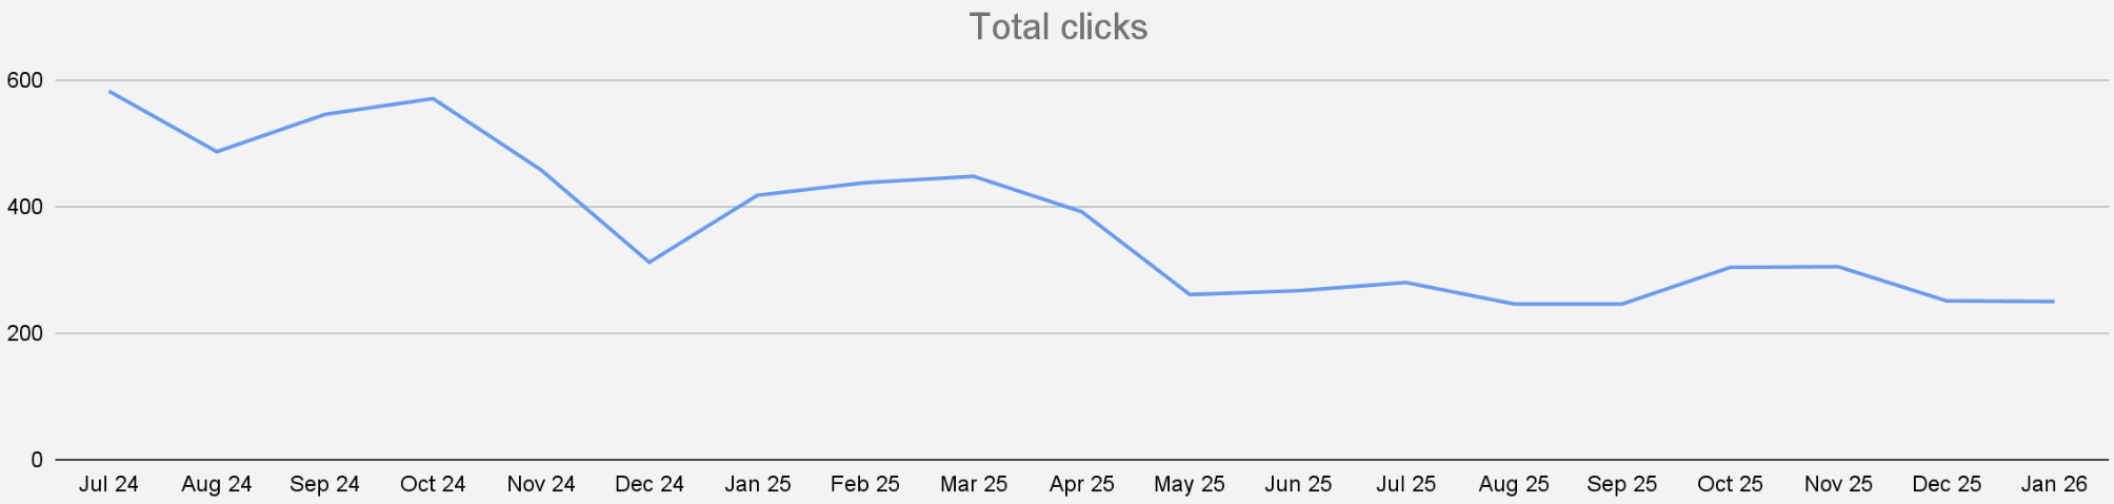
📌 **Notes** :

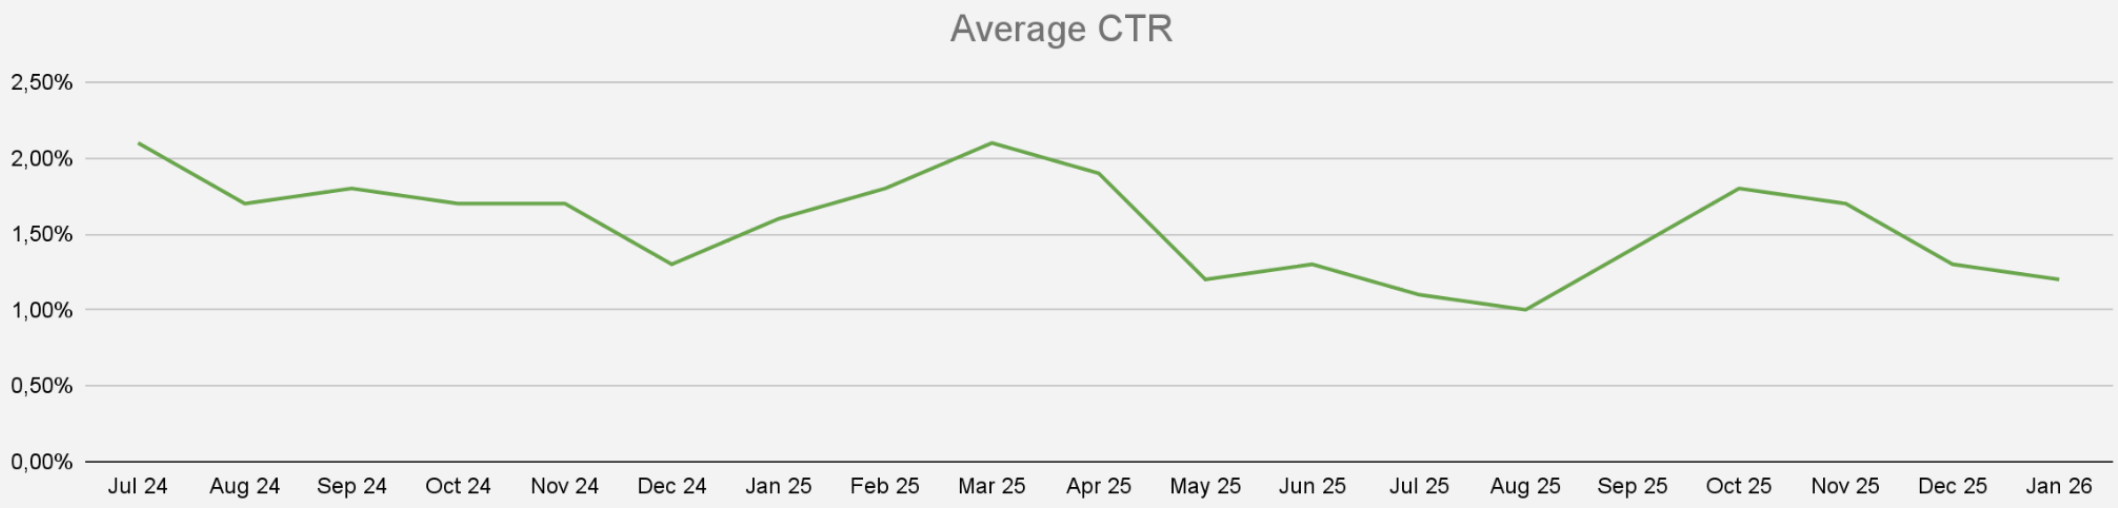
- **Impressions** increased to 20,334 (+6%).
- **Clicks** remained stable (250 vs 251).
- **CTR** slightly declined to 1.2%.
- **Average position** remains stable (15 vs 16).
- **Organic sessions** increased slightly (215 vs 208).
- **Organic pageviews** decreased (264 vs 287).

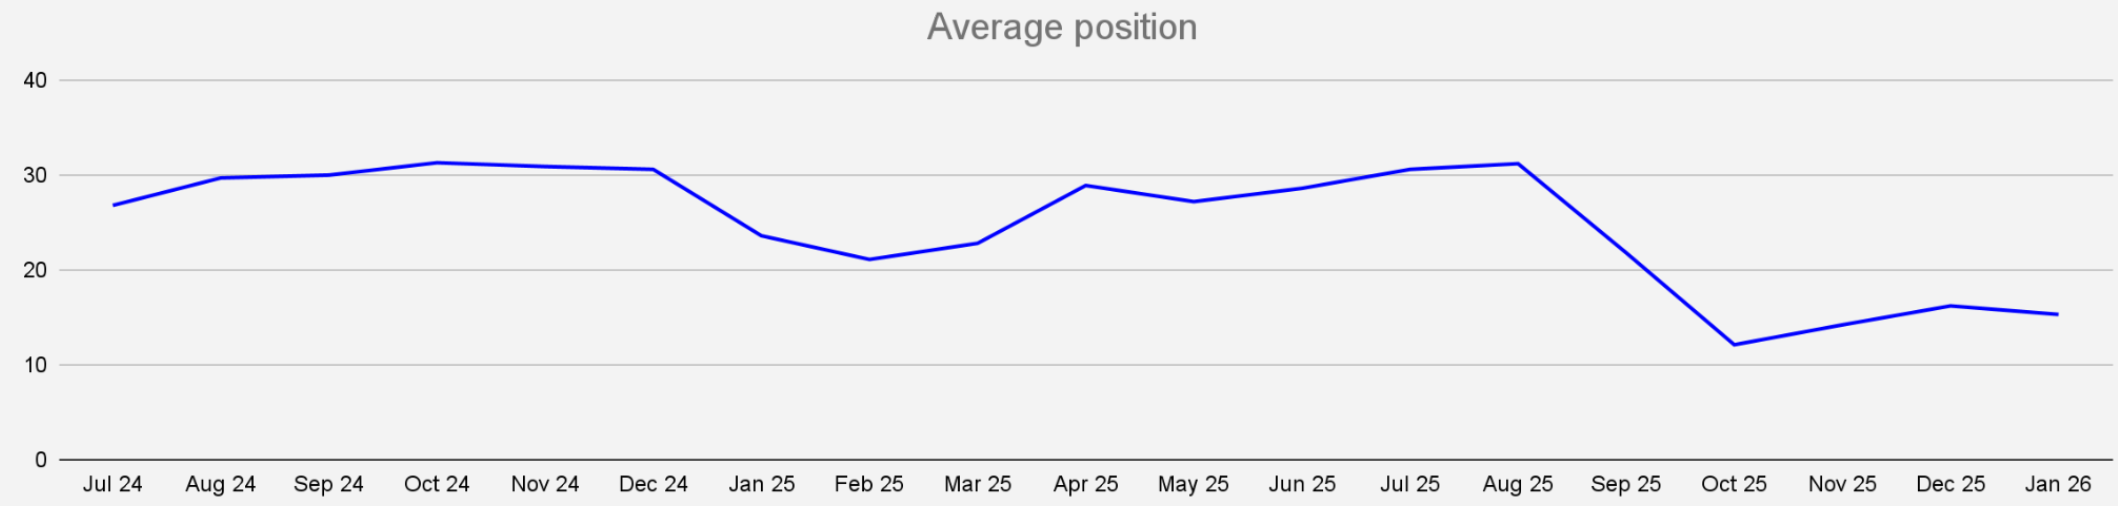
👉 **Key takeaway:** Visibility continues to grow steadily, while clicks remain stable.

SEO Performance Evolution









📌 **Notes** :

- The upward trend in **impressions** continues into January.
- **Click's** trend remains stable from May 2025.

- The **CTR** fluctuates, but the smoothed trend remains stable.
- **Average position** has stabilized since October 2025 and remains far better than in early 2025.

👉 **Key takeaway:** January confirms a stable and progressive SEO trajectory, with gradual improvements in visibility and rankings. Performance fluctuations appear normal.

This analysis will provide a clearer understanding of the cause–effect relationships driving the site's SEO performance: whether the observed trends result from website changes or from Google algorithm updates.

ℹ️ Here are the major Google algorithm updates from July 2024:

- August 2024: high-quality content update (As part of the August Core Update, Google took a big focus on high-quality content. The algorithm update focused on delivering content that's actually helpful to users, rather than content that's built to rank well in search results. Ultimately, this new update focuses on helping searchers see more content that's genuinely helpful and relevant to them).
- November 2024: site reputation abuse (This update tackled parasite SEO — a tactic websites use to help them manipulate search rankings through third-party content on well-established domains).
- From Mars 2025: ongoing core updates (Google continues to roll out ongoing updates in 2025, focusing on improving search rankings and performance for searchers).

Top performing organic queries

Top 10 keywords driving clicks

Most frequent queries driving clicks	Clicks	Impressions	CTR	Position
gross leak test	3	362	0,8 %	13,8
orslabs	2	98	2 %	13
relative humidity to ppm calculator	2	37	5,4 %	1,9
oneida recherche services	2	15	13,3 %	1,9
gross leak bubble tester	1	235	0,4 %	10,8
ors calculator	1	69	1,4 %	4,9
iva ors	1	60	1,7 %	6,7
oneida research	1	58	1,7 %	9,6
hshld	1	56	1,8 %	6,8
fine and gross leak testing	1	40	2,5 %	7,2

Top 10 keywords driving impressions

Most frequent queries driving impressions	Clicks	Impressions	CTR	Position
hermeticity	0	736	0 %	4,8
gross leak test	3	362	0,8 %	13,8
oneida research services	0	248	0 %	5,8
gross leak bubble tester	1	235	0,4 %	10,8
ors labs	0	175	0 %	10,4
convert relative humidity to moisture content plastic film	0	134	0 %	5,3
relative humidity calculator	0	125	0 %	29,1
humidity calculator	0	112	0 %	39,1
sampling cylinder	0	110	0 %	34,6
orslabs	2	98	2 %	13

📌 **Notes** :

- The data reveals a clear segmentation between high-intent long-tail queries and broad technical keywords.
- Highly specific queries such as “relative humidity to ppm calculator” rank in top positions and generate strong CTR, confirming excellent intent alignment.
- Despite the high number of impressions for "hermeticity", this term is too generic to be of interest to ORS Labs.
- ORS Labs is consistently visible on core technical topics (leak testing, hermeticity, humidity measurement), indicating strong topical authority.
- Branded queries remain stable and continue to support click volume.

👉 **Key takeaway:** The data indicates that ORS Labs has successfully built visibility and authority within its core technical domains. The main growth opportunity lies in improving SERP positioning and intent alignment to convert existing visibility into qualified traffic.

Most visited pages via natural referencing

Most popular pages	Clicks			Impressions			CTR			Position		
	Jan 26	Dec 25	Difference	Jan 26	Dec 25	Difference	Jan 26	Dec 25	Difference	Jan 26	Dec 25	Difference

/en/hermeticity/leak-site/	4	2	**2**	286	303	**-17**	1,4 %	0,7 %	**0,7 %**	7,4	8,6	**-1,2**
/pdf/Hydrogen_Desorption_From_Packaging_Alloy.pdf	4	3	**1**	170	100	**70**	2,4 %	3 %	**-0,6 %**	14,6	9,2	**5,4**
/wp-content/uploads/2019/03/ORS-SOP_MEL1053.pdf	4	7	**-3**	54	39	**15**	7,4 %	17,9 %	**-10,5 %**	7,6	5,1	**2,5**

📌 **Notes** :

- **Moisture Calculator** and **Conversions d'humidite** remain the top performing pages.
- **Gross leak test** page improved in ranking but experienced a decline in impressions and clicks.
- Several **technical PDF resources** gained impressions and clicks, highlighting interest in in-depth technical content.

👉 **Key takeaway:** The visibility of technical PDF documents highlights strong interest in in-depth scientific content. Converting these PDFs into optimized landing pages and integrating them into the internal linking structure could be an opportunity to turn passive technical assets into active SEO and conversion drivers.

Conclusion

January 2026 confirms a recovery following the seasonal slowdown observed in December. Traffic volume increased across key indicators, with growth in users, sessions, and direct traffic. Organic sessions also slightly improved, reflecting renewed activity after the holiday period.

From an SEO perspective, the site continues to strengthen its visibility. Impressions increased, confirming a structurally positive trajectory. Click volume remained stable. The long-term trend remains healthy and progressive.

At the same time, engagement metrics slightly softened as traffic increased — a pattern frequently observed in technical B2B environments, where highly targeted traffic tends to interact more deeply than broader audiences. This reinforces the importance of prioritizing qualified acquisition over pure volume growth.

Keyword analysis confirms a mature SEO phase: ORS Labs has strong visibility in its core technical domains. Highly intent-driven queries perform efficiently.

Tool pages remain the strongest organic assets, particularly the Moisture Calculator, which continues to consolidate its leadership.

Technical PDF documents represent a strategic opportunity. Their performance demonstrates a strong interest in in-depth scientific content. Converting these high-performing PDFs into optimized landing pages — enriched with structured content, internal links, and clear calls to action — would transform these technical resources into effective SEO and conversion drivers, strengthening subject authority while more efficiently directing qualified traffic to core services.

👉 **Strategic priorities** for the coming months:

- **Improve CTR** on high-impression technical pages.
- **Strengthen internal linking** to increase user depth and session value.
- **Continue optimizing** high-performing tool pages.
- **Leverage technical PDF content** by transforming key documents into optimized landing pages integrated within the site architecture.

👉 **Actions**:

- Publish the proposed content (sent in December) on /outils/conversions-dhumidite/ page (french and english versions).
- Rework the structure of the /tests-dhermeticite/hshld/ page to improve its average position and increase its CTR.
- Identify high-visibility PDF documents and prioritize their conversion into structured HTML pages to enhance SEO impact and lead generation potential: we could start with Variable_leak_rate_phenomena_in_glass_to_metal_seals.pdf if you agree with the proposition.

Glossary

SEO (Search Engine Optimization): Set of techniques aimed at improving a website's visibility in search engine results.

SERP (Search Engine Results Page): The page displayed by search engines (Google, Bing, etc.) showing results in response to a query.

Internal linking: The organization of a website's internal links that connect different pages together to improve navigation and search engine indexing.

Crawl: The process by which search engine bots browse and analyze a website's pages to decide whether or not to add them to their index.

Indexable: Describes a page that can be added to a search engine's index and therefore appears in search results. A non-indexable page will not be shown in the SERP.

Backlinks: Inbound links coming from other websites and pointing to a given site.

Impressions: The number of times a link appears in search engine results, regardless of whether it is clicked or not.

CTR (Click-Through Rate): The percentage of users who clicked on a link compared to the total number of impressions of that link in the SERP.

PAA (People Also Ask): A section in Google results displaying frequently asked questions related to the query, with answers from various websites.

Canonical URL: The canonical URL indicates which version of a page should be considered as the main one by search engines. It helps prevent duplicate content issues when multiple pages have very similar content.
